

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

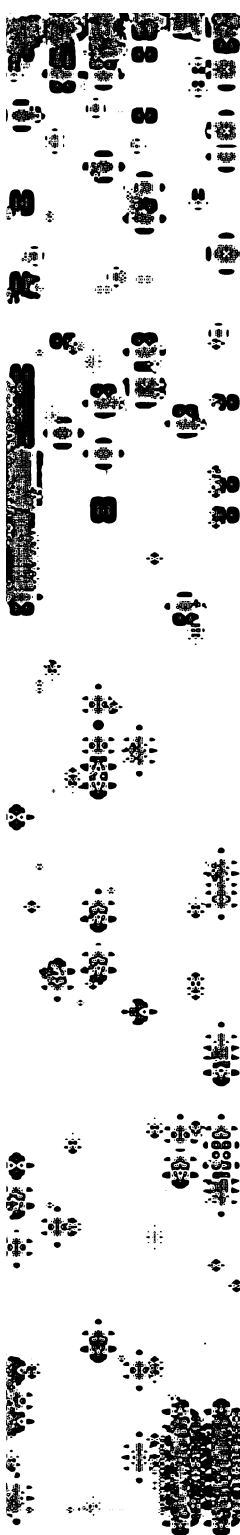

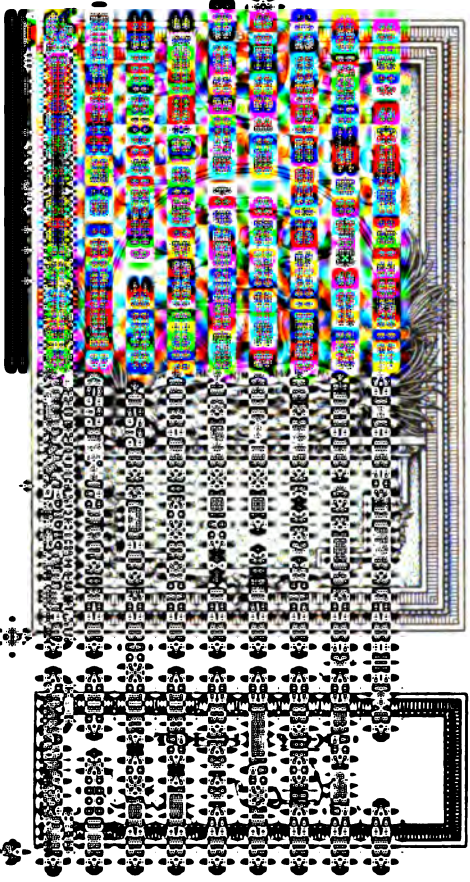

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

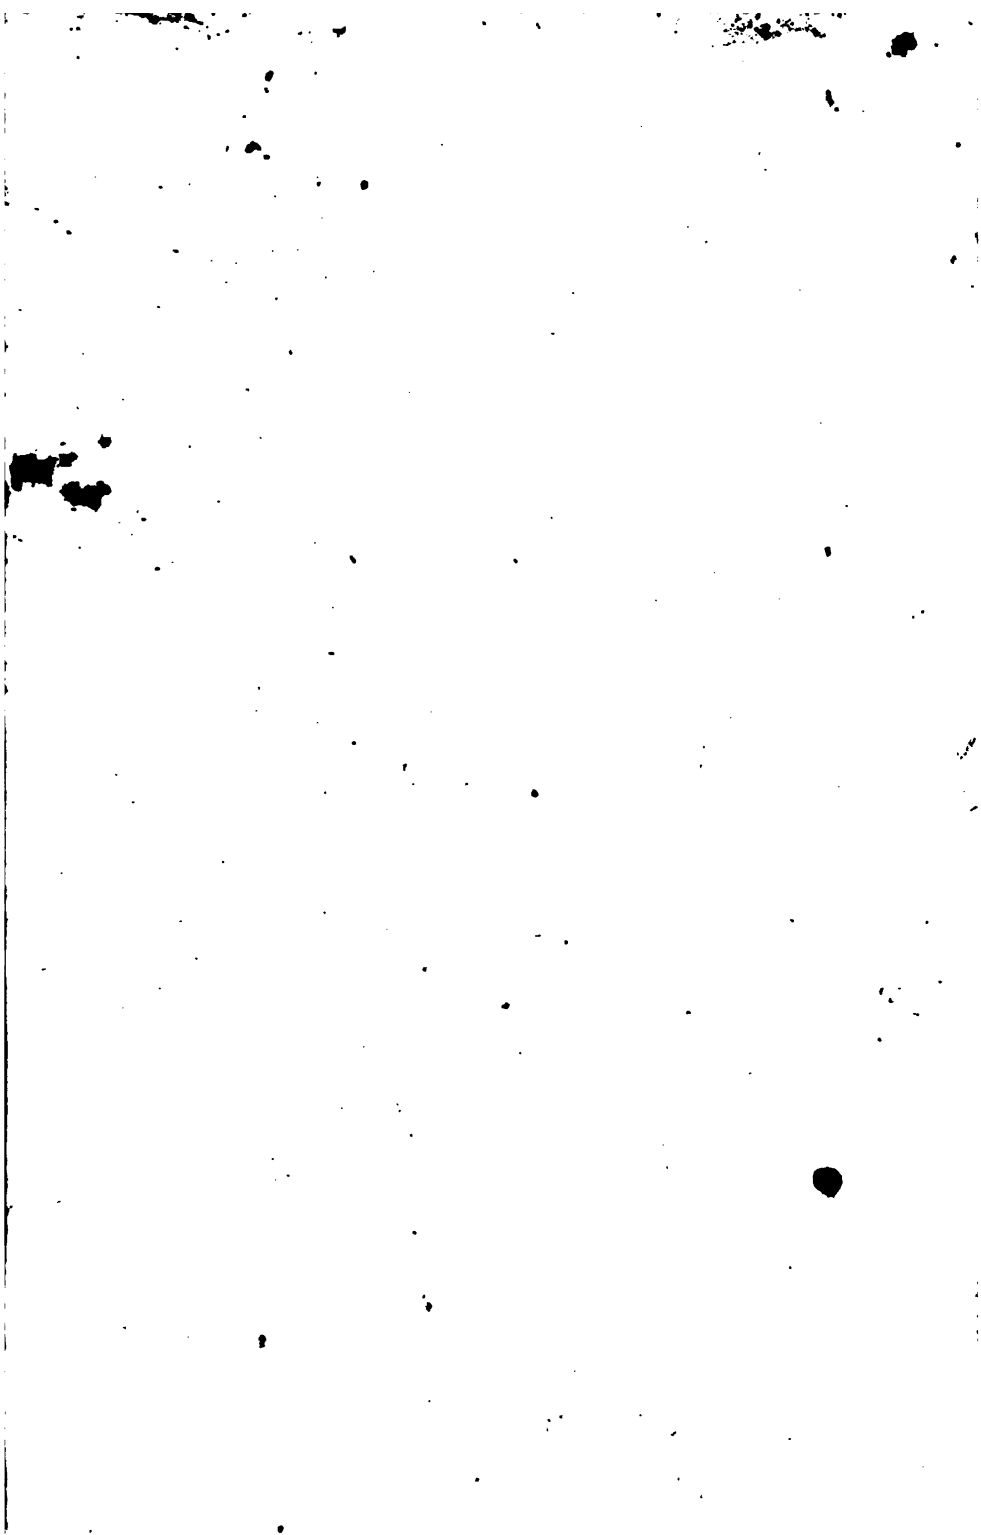

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

CAPT. JOHN KIRBY, HARBOR MASTER.

CAPT. H. C. MILLER, PORT WARDEN.

Office, Main Street Bridge.

Annual Message

OF THE

MAYOR

TO

The City Council,

DELIVERED APRIL 16, 1883,

Hon. R. R. HERRICK, Mayor.

INAUGURAL ADDRESS

OF

HON. JOHN H. FARLEY

MAYOR.

MAYOR'S ANNUAL MESSAGE.

To the Honorable City Council:

GENTLEMEN— At this, the close of my second administration as Mayor, I deem it proper to note the progress made in municipal affairs during my term of office, and to present a comprehensive statement of their condition and management during that time, and also to make a few suggestions in reference to the future conduct thereof which experience and observation have led me to believe will be of benefit to the city in the future. As is shown by Table No. 1, the bonded debt of the city had increased from \$802,050 in the year 1866 to \$9,284,100 January 1st, 1879. Of this \$6,455,100 was created during the six years preceding 1879. The bonded debt January 1st, 1883, was \$6,693,100, a reduction in the past four years of \$2,591,000, with a tax levy less than that of the years preceding.

TABLE No. 1.

Tax levy.	Year. Jan. 1.	Bonded debt.	Rate of int. on bonds issued each year.	Yearly increase of bonded debt.	Yearly decrease of bonded debt.
17.25	1866	\$ 802,050 00	7 and 6	\$ 68,170 00	
17.25	1867	860,000 00	7 and 6	57,950 00	
19.75	1868	916,700 00	7 and 6	56,700 00	
19.25	1869	1,229,500 00	7 and 6	312,800 00	
20.3-20	1870	1,646,700 00	7 and 6	417,200 00	
20.75	1871	2,337,800 00	7 and 6	691,100 00	
12.50	1872	2,467,000 00	7 and 6	129,200 00	
15.50	1873	2,829,000 00	7 and 6	362,000 00	
16.55	1874	5,183,600 00	7 and 6	2,354,600 00	
18.65	1875	7,261,000 00	7 and 6	2,077,400 00	
18.75	1876	8,097,900 00	7 and 6	836,900 00	
18.75	1877	8,604,900 00	7 and 6	507,000 00	
17.85	1878	9,054,164 58	6 and 5	449,264 58	
15.35	1879	9,284,100 00	6 and 7	229,935 42	
15.05	1880	8,591,100 00	6		\$493,000 00
15.75	1881	7,915,250 00	5		675,850 00
14.05	1882	7,064,450 00	4		850,800 00
14.3-20	1883	6,693,100 00	3.65 and 4		371,350 00

Total bonded indebtedness January 1, 1879 \$9,284,100 00

" " " " " 1883 6,693,100 00

Making a decrease of the bonded debt in four years \$2,591,000 00

While the Sinking Fund of 1862 has paid a large amount of the bonded debt, and contributed to the payment of the city's part of repaving streets, it will be seen by reference to Table No. 2 that on the 1st day of January, 1883, there was, within \$277,895.02, as large a fund in the combined Sinking Funds as shown on the 1st day of January, 1879. In the year 1878 an act amendatory of the original Viaduct act

was passed by the General Assembly, which provided for the levy of an annual tax, not exceeding two mills, to meet at maturity outstanding bonds issued during the construction of the Viaduct, and known as the Viaduct and Canal Sinking Fund. Since that date a levy has been made for that purpose, but not to the extent of two mills. The condition of the Sinking Funds, January 1st, 1883, is shown by the following table:

TABLE No. 2.

Jan. 1st, 1879—Sinking Fund of 1862	\$1,816,600 53	
“ “ “ “ “ General	12,392 23	
Total		\$1,829,082 76
Jan. 1st, 1883—Sinking Fund of 1862	\$1,121,802 12	
“ “ “ —Viaduct Sinking Fund	420,521 97	
“ “ “ —General “ “	8,863 75	
Total		\$1,551,187 74
Decrease		\$ 277,895 02

There was expended during the past four years in paving; repaving, constructing sewers, extending the water works, and other permanent improvements, the sum of \$1,390,806.93, which amount was paid from revenues raised without borrowing but \$100,000, for which Water Works extension bonds were issued. Of this sum thus expended for permanent improvements, \$535,942.91, was for paving and repaving our public streets, and \$635,588.52 for the enlargement of the Water Works. The city has paid and assumed \$967,499.27 since 1879 of special taxes assessed for certain special improvements, the collection of which was enjoined by the courts. In addition to this an unprecedentedly large expenditure has been necessary in keeping in passable condition the worn-out wood, concrete and McAdam paved streets. The rapid growth of our city has made extra demands upon

the several departments, and a consequent yearly increase of expenditures therein. But notwithstanding this, in none of the four past years have the ordinary expenses of the City Government equaled those of the years 1875 or 1876, as will be seen by the following table:

TABLE No. 3.

	Ordinary expenses	Decrease over 1876
1875.....	\$887,078 26	
1876.....	930,748 12	
1877.....	888,488 20	\$ 42,259 83
1878.....	793,392 35	147,355 77
1879.....	732,290 44	198,457 68
1880.....	784,017 62	146,730 50
1881.....	811,651 08	119,097 04
1882.....	845,306 19	85,441 93
Ordinary expenses from 1875 to 1879, were.....		\$3,489,707 02
“ “ “ “ 1879 “ 1883, were.....		3,173,265 33
Decrease.....		\$ 316,441 69

Table No 4 shows the saving in the interest account in 1883 over 1879 to be \$170,316.49.

TABLE No. 4.

Interest paid on debt in all forms by the city in 1879.....	\$601,151 00
“ “ “ “ “ “ “ “ “ “ 1883.....	430,834 51
Decreases in interest account.....	\$170,316 49

Table No. 5, showing the decrease in daily interest charge in 1883 from 1879, also the per capita debt in 1879 and 1883.

TABLE No. 5.

Interest paid per diem in 1879 was.....	\$1,646 99
" " " " " 1883 is	1,180 37
<hr/>	
Decrease per diem in interest account.....	\$ 466 62
<hr/>	
The per capita debt in 1879 was.....	\$61 89
" " " " " 1883 is	34 38
<hr/>	
Reduction in four years.....	\$27 51

By the above table it will be observed that the interest to be paid by the city in 1883 will be \$466.62 less per day than in 1879, and that the per capita debt of the city has been diminished nearly one-half.

Having secured the geographical and natural advantages in the location of a city, there is no way so effective and speedy to secure its permanent growth and prosperity as by a wise and judicious financial policy — one which will secure and make uniform a reasonably low tax rate from year to year. In the close competition which there is among the manufacturing and mercantile industries of the country, it often happens that a tax of a few mills upon the necessary capital employed is felt as a heavy burthen. It may, in some instances, equal the entire margin of profit in the business. In casting about for a place in which to establish an industry, capitalists will choose that city which, other things being equal, imposes the least burthen upon their resources, and if located within one where the tax rate is high, they will either

remove or make shift to conceal sufficient of their property to reduce their taxes to a reasonable sum. Whenever a low and uniform tax rate becomes the established policy of a city, and definite assurance is thereby given to capital, it will no longer dodge the assessor or take the risk of the evasion of the law ; but, on the contrary, the true wealth of a city will appear upon the tax duplicate and bear its proportion of the tax required to maintain good government, and as much will be collected from the increased tax duplicate as by a high tax rate upon a less valuation. The rate of levy and valuation for the past eight years will serve as an illustration. From 1875 to 1879, there was a shrinkage in valuation on the duplicate of \$3,165,638.00. The average levy during this period was 17.32 mills on the dollar. From 1879 to 1883 there was an increase in valuation of \$12,544,573.00. The average levy was 14.72 mills on the dollar.

TABLE No. 6.

Levy.	Year.	Valuation.	Decrease in valuation, 1875 to 1879.	Increase in valuation, 1879 to 1883.
18.75	1875	\$73,305,277 00		
18.75	1876	73,562,237 00		
18.85	1877	71,206,122 00		
15.35	1878	70,130,639 00	\$3,165,638 00	
15.05	1879	70,548,104 00		
15.75	1880	73,647,194 00		
14.05	1881	*79,586,156 00		
14.3-20	1882	82,684,212 00		\$12,544,573 00

* The revaluation of 1880 only increased the tax duplicate \$5,988,962.00,

Comparisons are odious, especially when they are not in our favor, but as affording a practical illustration of the point I wish to impress upon you, I submit the following comparison of Cleveland with Detroit:

Detroit's levy for 1882 was 12.00 mills; amount tax duplicate.	\$94,891,407 00
*Cleveland's " " " " 14 1-20 " " " "	79,586,156 00
Produced in Detroit.....	\$1,194,108 49
" " Cleveland.....	1,118,186 49
	\$75,922 00

* The tax levy of 1881 was the revenue used in 1882. The valuation of real and personal property in 1882 was \$82,684,212. The revenues derived from the increase will be used during 1883.

Twelve and nine-tenths mills produced in Detroit \$75,922 more than 14 1-20 mills in Cleveland. Detroit being substantially out of debt, has nearly the entire revenue with which, after paying the ordinary expense of maintaining the city government of the year, to invest in permanent improvements. In order to secure a low and uniform tax rate, and at the same time keep pace with the requirements of a growing city, it is necessary that no large proportion of the revenue raised by taxation should be expended in the payment of interest, consequently our bonded debt should be extinguished or placed under the control of the city. (The manner of accomplishing this I will suggest hereafter.)

By the following table it will be seen that for the ordinary running expenses of the city a very small tax levy is required, while for the payment of interest and debt a large proportion of the amount collected annually is absorbed. In the year 1879, the amount of interest paid by the city was \$601,151, which was \$6,906.94 in excess of the levy for the ordinary expenses of that year. The levy was only 7 13-20 mills on the dollar for the ordinary expenses in 1882, yet it required a total levy of 14 1-20 mills on the dollar in order to meet the interest and maturing debt of the year.

The tax levy to meet the current expense of the City Government for 1882 was as follows, to-wit;

Bridge.....	4-20	mills	
Dredging.....	8-20	"	
Fire Department.....	1 19-20	"	
General Fund.....	1	"	
Infirmary.....	4-20	"	
Lighting.....	1 2-20	"	
Parks.....	4-20	"	
Police Department.....	1 17-20	"	
Street.....	15-20	"	
	7 13-20	"	which produced \$620,772.04
<hr/>			
Total amount of levy.....	14 1-20	"	" " " \$1,118,186.40

The excess absorbed in interest and sinking funds amounted to \$49,-414.45, except \$35,813.77 used in purchase of park and repaving.

Interest paid in 1879 was.....	\$601,151 00
Levy for ordinary expenses in 1879 was.....	504,244 06

Interest account over expense account in 1879 was.....\$ 6,906 94

If it is desirable that the tax rate become uniform and stable in order to secure protection to our business interests, then the permanent improvements which are needed should be in a measure forecast, and be steadily and uniformly prosecuted, not faster, however, than funds can be supplied for such purposes from such low and uniform levy without running into debt. To enter upon and press many expensive improvements into two or three years, relying wholly upon the credit of the city, will defeat the attainment of this end. The effect of this latter course is to excite great activity for a time in the sphere of improvements, based upon a constantly increased indebtedness, which at length becomes so burdensome as to necessitate a suspension of all improvements for a time, until the people shall be able, by submitting to oppressive taxation, to lessen the principal of the debt and lighten the exactions for interest. This course also creates fluctuations in the labor market. The activity en-

gendered by this crowding process causes an unusual and unnatural demand for labor, wages are, for the time being, increased, mechanics and laborers are imported to meet the demand. When the days of reaction come, as they surely will, and the city is forced to suspend its efforts, its employes are suddenly thrown out of work into enforced idleness. Take, for illustration, the years 1873 and 1874. Municipal corporations all over the land vied with each other in making public improvements and in piling upon themselves municipal debt, from the effects of which many have not yet fully recovered. In some instances property was absolutely confiscated for the taxes imposed. Our own city was not an exception to the common practice. In the years 1873 and 1874, the bonded debt of the city was increased \$4,432,000, which required an additional tax levy of \$283,580 yearly to meet the interest, an amount which, had a different policy been pursued, would have gone far towards paying for the improvements which were made, instead of having been entirely lost to the tax-payer. In order to illustrate the evil of the policy of creating a large bonded debt covering a long period of years, I have prepared the accompanying table showing the workings of this method in paying for the Viaduct. Work upon this structure was begun in 1873, and the entire cost, amounting to \$2,138,000, was paid with borrowed money. The first bonds were issued in 1873, and additional issues were made at varying intervals as the work progressed, until it was completed, in 1878. They bear interest at seven, six and five per cent., and are payable twenty and thirty years from date. Their payment was extended over this period so that, as it was claimed, posterity might help to bear the burthen of its cost. What is the result? When the installment for 1883 is paid, there will then have been paid for interest on the Canal and Viaduct debt \$1,052,660, a sum equal to one-half the cost of the Viaduct; yet the

original debt remains undiminished. As the city has little revenue except by direct taxation, and as it makes no difference whether the tax collected goes to pay principal or interest, would it not have been better to have paid for the work as it was being performed by revenue derived from taxation and the use of means within the control of the city? As it is, we will pay annually, for twenty years, \$131,210 for interest on Viaduct bonds; also into the Viaduct sinking fund, to meet these bonds at maturity, the annual sum of \$100,650, making a total of \$231,860 which will be raised each year, to which add for the thirty-year bonds \$62,500, when, if the bonds are met at maturity, we shall have paid as follows:

Original cost of Viaduct	\$2,138,000 00
Total interest paid on bonds.....	2,686,700 00
Excess of interest over cost	\$ 548,700 00
Total expense when paid.....	\$4,824,700 00

Amount of Viaduct bonds outstanding, and interest on same.

Rate of interest.	Bonds.	Mature.	Time.	Total interest.
7 per cent. . . .	\$148,000 00	1893	20 years	\$207,200 00
7 " "	270,000 00	1894	20 "	378,000 00
6 " "	300,000 00	1895	20 "	360,000 00
6 " "	500,000 00	1896	20 "	600,000 00
5 " "	125,000 00	1907	30 "	187,500 00
6 " "	225,000 00	1897	20 "	270,000 00
6 " "	570,000 00	1898	20 "	684,000 00
Total interest.....				\$2,686,700 00
Total bonds.....				2,138,000 00
Total Viaduct bonds and interest.....				\$4,824,700 00

The Canal bonds, amounting to \$275,000, are not included in the above, the city having received from the Valley Rail-

road Company \$265,000 of its 7 per cent. bonds for the lease to the said company of the canal lands.

I propose now to show how the present Water Works debt and interest, together with the cost of the contemplated extension of the Water Works, can be liquidated within twelve years from date by the issue of only \$300,000 more bonds, and without any levy whatever after the year 1886. The present debt, January 1st, 1883, for Water Works purposes, is \$900,000. It is estimated that the cost of constructing the new reservoir, the land, and the necessary extension of the main pipes will amount to \$1,200,000. Bonds to the amount of \$100,000 were issued for this purpose in 1882, and are included in the above sum of \$900,000. Only \$300,000 will be issued — \$100,000 each year for three consecutive years. By proper management we can pay the balance of the cost of this improvement, viz., \$800,000, and provide for the payment of the entire Water Works debt, principal and interest, at maturity from the earnings of the department. The aggregate amount to thus be provided for will be \$2,626,850. (A practical illustration is furnished us in the policy adopted in 1880. It was discovered that unless the water supply was increased a failure to meet the demand upon this department was imminent. Steps were taken to enlarge the works to meet this demand. The expense, amounting to over \$200,000, was provided for by authority to issue the bonds of the city to that amount. The work was undertaken and prosecuted to completion and paid for from the earnings of the department without a resort to the use of bonds, none of which were issued.)

The following table shows the amount of bonds now outstanding, those yet to be issued, the dates of maturity, the aggregate interest at maturity, the estimated additional cost for Water Works extension, and the source whence is to be

derived the necessary revenue to meet all as demanded, without the aid of taxation after 1886 :

Bonds maturity in 1892.....	\$400,000 00
“ “ “ 1893.....	200,000 00
“ “ “ 1895.....	200,000 00
	100,000 00
Total.....	\$900,000 00

Total indebtedness of the Water Works Department, including outstanding bonds, bonds to be issued, and additional cost of contemplated improvement :

Bonds outstanding in 1881.....	\$800,000 00	
Bonds issued “ 1882.....	100,000 00	
“ to be issued “ 1883.....	100,000 00	
“ “ “ “ 1884.....	100,000 00	
“ “ “ “ 1885.....	100,000 00	
Additional cost of contemplated improvement.....	800,000 00	
Interest on bonds from 1886 to 1894.....	626,850 00	
Total.....		\$2,626,850 00
Net earnings of the department from 1882 to 1894 inclusive, at an average of \$200,000 per year.....		2,600,000 00
Difference.....		\$26,850 00

Net earnings of department for 1879.....	\$126,374 13
“ “ “ “ “ 1880.....	146,463 08
“ “ “ “ “ 1881.....	171,205 61
“ “ “ “ “ 1882.....	185,779 82

From this table it will be observed that the average yearly gain in the net earnings of the Department during the past three years was \$19,801.89. The amount of net earnings

from 1883 to 1894, both inclusive, with the ratio of increase of the last three years, will be \$3,773,905.26. This amount will provide for the indebtedness as hereinabove set forth, leaving a balance of \$1,147,055.26, which can be used as needed to extend water pipes, etc., to this may be added also the revenue derived from investment, after 1886, on the yearly earnings under the control of the Sinking Fund Commissioners.

As has been shown, provision has been made to meet the Viaduct bonded debt by a direct annual tax levy. This accumulation, together with the earnings of the funds in the hands of the Sinking Fund Commissioners, go to the credit of the Viaduct Sinking Fund, and will secure payment of this class of bonds-at maturity, no portion of which can be paid until the year 1893, from which date some portions fall due annually to the year 1907 inclusive. The amount to the credit of this fund January 1st, 1883, was \$420,521.87. If the policy of using the earnings of the Water Works in the construction of the extension be adopted, and not more than \$300,000 of Water bonds be issued, the entire Water Works debt is provided for, including the contemplated enlargement. The General Sinking Fund will be replenished by annual tax levies, as in the past, as long as there is any outstanding bonded debt not otherwise provided for. Whatever policy be pursued, however, the present bonded debt of the city has a sinking fund pledged for its redemption.

We now come to the sinking Fund of 1862. The objects for which this Sinking Fund was created have been accomplished, the Water Works bonds for which it was pledged, have all been paid, and a balance remains in the Fund January 1st, 1883, of \$1,121,802.12. The question naturally arises: what is the best disposition to make of this Fund? By an amendment to the original act of 1862, passed one year ago, it was provided that "the residue of said Fund, after

providing for repaving of streets and extension of Water Works, shall be applied to the payment of the general bonded indebtedness of the city." With a view to securing to the tax-payers the benefit of all taxes collected to meet the interest on bonds hereafter issued, would it not be good financing hereafter to sell all general bonds issued by the city to the Sinking Fund of 1862, until the entire residue of said fund is absorbed? The bonds to bear a reasonable rate of interest and to be cancelled at the pleasure of the City Council, after this fund becomes exhausted, thus placing to that extent the debt under the control of the city, and instead of selling the choicest securities now held by this fund, transfer them to the Viaduct Sinking Fund as rapidly as the yearly tax and earnings of said Viaduct Fund will permit. If this is done, the bonded debt of the city will be provided for as follows, leaving the fund of 1862 with which to hold the control of any future issue of bonds :

Water Works bonds outstanding at completion of contemplated extension, to be paid with its earnings.....	\$1,200,000 00
Viaduct bonds to be paid by Viaduct Sinking Fund.....	2,138,000 00
Special bonds paid by assessment.....	750,000 00
	<hr/>
	\$4,088,000 00
Deduct Water Works bonds yet to be issued.....	300,000 00
	<hr/>
	\$3,788,000 00
Funded and General bonds maturing during the years intervening to 1897, to be paid from General Sinking Funds...	\$2,905,100 00
	<hr/>
Total bonded debt January 1, 1883.....	\$6,693,100 00
Amount of Sinking Fund of 1862 as a capital by which to control and extinguish debt after the repaving is completed, January 1, 1883	\$1,121,802 12

The practice of borrowing money whenever any improvement is to be made by the city is a pernicious one. Especially is this so where bonds are issued extending over

long periods of time, so that at maturity the interest thereon equals or exceeds the principal or the original cost of the improvement. The demand for improvements will continue as the city grows, and for the most part must be yielded to. If this practice be also continued and money raised to pay therefor upon the credit of the city, no sooner will one improvement be completed than another will follow, and each in turn will be delivered to the city with a mortgage thereon, which, before it is lifted, will equal if not exceed double the cost of the improvement itself. The result is that the taxpayers who bear the burthen must pay twice for every improvement they get. The amount of interest paid by the city during the past four years only, was \$2,133,245.97. Had the practice prevailed in the past of paying for what we got as we went along, this enormous sum might have been raised and expended for permanent improvements, while the rate of taxation would have remained unchanged. There should be an effort to extricate the city from debt as rapidly as it can be done without inconvenience or detriment to her growth, in order that her people may reap the full benefit of the revenue collected from them by taxation. This can be accomplished without suspension of needed improvements, provided it be prosecuted systematically, and all high pressure notions avoided. When we realize that the interest paid by the city during the past four years would have paid for so large a structure as the Viaduct, it is easy to see that more valuable improvements can be made on the "pay as you go" principle than by the credit system. There is, at the present time, a pressing need for an intercepting sewer to relieve the Cuyahoga River of the filth that is now emptied into it from Walworth and Kingsbury Runs, and sewers along its banks. Unless this is built, it will not be many years before our water supply will become so contaminated as to be unfit for use. This important improvement is a uni-

versal public necessity, and will cost, according to the report of Rudolph Hering, the engineer employed by you the past year, \$764,000. This work will require years for its completion, and being divided into three parts or sections, as suggested in the report submitted, the section or part most needed, and which should be first constructed, is that which embraces Walworth Run and the sewers along the line thereof. The estimated cost of this section is \$195,000, and there should be no delay in beginning work upon it. Although the other portions of this sewer, especially the Kingsbury Run section, are much needed and should be built with all reasonable haste, still the necessity for them is not so great but that the construction of them can be delayed until after the Walworth Run section is completed. By building one section at a time, the project can be kept steadily and continuously under way and completed and paid for within the next four or five years without enlarging the city debt or increasing the tax levy.

There is no immediate urgency for a new City Hall. The present building will fully answer the requirements of all the departments until the expiration of the lease in the year 1900. A large part of the building is not used or needed for city business, and the city derives a revenue from its rentals which will increase in amount from this time to its termination. The rooms are well lighted and ventilated and supplied with all needed conveniences. The structure would be no discredit to a city of even greater pretensions than Cleveland. It is fully as good as our people can afford to furnish their officials and servants. When we have provided pure water, proper sewerage, paved and well lighted streets, and adequate police and fire protection, there will then be time enough to consider elevated highways, embellished Parks, and a City Hall, and then, I doubt not, will be as soon as our constituents will consent to furnish the money.

The following tables, compiled from the full and comprehensive report of City Auditor Ford, will show the management of the funds of the city during the year ending December 31, 1882. Table No. 1 exhibits the receipts and disbursements of each fund for 1882, and the balances on hand January 1, 1883:

TABLE No. 1.
RECEIPTS AND DISBURSEMENTS.

Name of fund.	Receipts including balance on hand January 1, 1882.	Disbursements.	Balance on hand January 1, 1883.
Armory.....	\$ 692 73	\$ 677 74	\$ 14 99
Bridge.....	38,802 48	34,122 15	4,680 33
Dredging.....	80,831 50	74,494 78	6,336 72

Lighting.....	101,167 71	100,162 07	1,005 64
Market.....	40,717 56	39,416 25	1,301 31
Police Court.....	30,772 86	26,068 73	4,704 13
Police Department.....	152,106 18	148,039 10	4,067 08
Park.....	16,492 99	13,963 94	2,529 05
Street.....	95,117 04	94,525 77	591 27
Sanitary.....	21,051 75	20,329 32	722 43
Sinking for general bonds	118,673 04	109,809 29	8,863 75
Viaduct and Canal Sink.	420,521 87	420,521 87
Water Works.....	417,533 49	393,268 72	24,264 77
Sinking Fund of 1862, together with the earnings of 1882.....	1,343,663 76	221,861 64	1,121,802 12
Total.....	\$3,709,825 90	\$2,081,568 89	\$1,638,311 29

* By an oversight in not transferring \$20,000 appropriated from the Water Works to the interest account before January 1st, this account is shown to be overdrawn \$10,084.28, whereas in fact it should have been in credit \$9,945.72.

It will be seen that the entire monied resources of the city for 1882, estimating the assets of the several sinking funds at par, was \$3,709,825.90; the disbursements \$2,081,568.89, and the balance on hand January 1st, 1883, \$1,638,311.29, and every fund except the Interest in credit.

Table No. 2 presents an analyzed statement of the disbursements from the General Funds. The total disbursements from these funds was \$1,372,638.38. The ordinary expenses, including Water Works, was \$917,244.41. The sum of \$25,100, while it shows in this table an expenditure, was a transfer from one fund to other funds, and must appear as an expenditure in keeping the accounts. There has been expended by the General Fund during the year, as shown, for new buildings, land, and Water Works extension, the sum of \$375,276.67.

TABLE No. 2.
ANALYZED STATEMENT OF DISBURSEMENTS—GENERAL FUND.

Table No. 3 shows an increase of \$33,655.11 in ordinary expenses over 1881. This increase I attribute to the natural result of the demands of a growing city. The increase has been uniform since 1879. The excess in 1880 over 1879 was \$51,727.18; in 1881 over 1880, \$27,633.46; and as shown, last year the excess was \$33,655.11. The cost of running the city departments in 1879 was \$198,457.68 less than in 1876, and notwithstanding this yearly increase, it cost \$85,441.93 less in 1882 than in 1876. The principal increase in expenses as shown, is in the Fire, Police, Street, Sanitary and Lighting Funds.

TABLE No. 3.

Table No 6 is a full statement of all forms of indebtedness of the city, as well as a comparison of the same with January 1st, 1882. By this table is shown a reduction during the year of \$223,205.55, while in fact it should be \$285,-

578.85. The item "temporary loans," amounting to \$63,373.30, can in no way be considered a debt, although it must appear so in making up this table. This amount represents advances made to property owners during the past year for street improvements, and will be paid back within the year. This table also shows the reduction of debt in all forms during the past four years.

TABLE No. 6.

COMPARISON OF THE CITY DEBT IN ALL FORMS JANUARY 1,
1882 AND 1883.

<i>January 1, 1882.</i>		
General bonds outstanding	\$5,888,250 00

Total.....	\$307,310 71	\$94,347 57	\$212,963 14

PUBLIC IMPROVEMENTS.

The reduction of the bonded debt of the city, together with the use of means at your disposal, have enabled the prosecution, without any increase of indebtedness, of a much larger amount of permanent improvements during the past year than for many years prior thereto, and will permit its continuance during the present year with the same vigor and

to the same extent. Several contracts have already been executed looking to the construction of several miles of paving. Water Works extension, and other valuable and needed improvements during the year 1883, to be paid for without recourse to the credit of the city, except the bonds that may be issued to pay for a portion of the work done by the Water Works Department. During the past year 7 68-100 miles of first-class Medina stone pavement and 4 34-100 miles of sewers have been laid at an expense of \$491,168.27, as well as other permanent work. The aggregating cost of all was \$945,751.34. We are now in condition to proceed steadily, year by year, with reasonable expenditure for improvements, and to pay for the same without increasing the tax levy or indebtedness, a consummation long looked for and much desired.

POLICE DEPARTMENT.

This department has rendered much valuable service during the past year in the protection of the lives and property of our citizens as well as in the preservation of order and the enforcement of law, and is especially deserving of commendation for efficiency and good conduct during the labor trouble in the Eighteenth ward. Notwithstanding the extraordinary demands made upon the funds of this department, at the close of the year it had to its credit the sum of \$4,413.13. Two new station houses have been built and paid for at a cost of about \$12,000; also repairs upon the Central Station to the extent of \$2,000. All of the station houses, except at Newburgh, have been renovated and placed in good condition. One lot was purchased, upon which was built the Swiss Street Station house. The lot upon which the Willson Avenue Station House was erected was donated by Mr. Morgan. The force has been increased by the addi-

tion of twelve patrolmen during the year, giving a total of 174, of which number 140 are patrolmen. Much more has been accomplished in permanent improvements during the past year than during several years preceding, the ability to pay for which has been largely due to the management of the police court through its efficient officers. As soon as the funds will admit, there should be a station house built and properly equipped in the Fifteenth ward; also the introduction of the system already adopted by several other cities, (and the same which I urged upon your consideration in a former message,) known as the Rapid Transit or Police Telephone System. Wherever it has been introduced it meets with the highest commendation, and is, in my opinion, more effective and less expensive than any means yet known by which to make police work meet the requirements of the age in a large city.

FIRE DEPARTMENT.

The efficiency of this department has been fully equal to that of any preceding year. It to-day, as in the past, takes rank for efficiency with the best in this country. Its officers and men are active, well disciplined and courteous. This department is deserving of your fostering care to the end, that such aid be furnished as is required to maintain their present high reputation.

WATER WORKS.

The report of the Trustees and Superintendent are worthy your careful consideration. This department has become one of the most important in the city, and its close relation to the vital interests of the city, makes it necessary that its management be kept under the control of men

of ripe experience and sound judgment. The property in their charge has cost over three million dollars, and the extension now under prosecution will swell this amount to over four millions. The management of the department during the past few years cannot but be satisfactory. In the past there has been a steady increase in the revenues, and if the same care be exercised in the future as in the past, this department will from this time on not only be self-sustaining but will provide for all future reasonable demands of our citizens. Their report shows a net earning in 1882 of \$186,301.43, and that there was expended in permanent improvements and extension of works during the year the sum of \$355,968.23, and that the average increase in earnings for the past three years was \$19,801.89. The earnings of this department used in construction, as shown, will provide for all future demands of the public.

THE WORK HOUSE AND HOUSE OF REFUGE AND CORRECTION.

With the management of these institutions during the past year we have reason to be satisfied. The report of this department shows that economy and business tact have been exercised in the management of its affairs, which have produced good results financially.

January 1, 1882, the balance in the City Treasury to the credit of the Work House Fund was.....	\$ 4,650 51
Book accounts collected during the year.....	38,771 70
Realized from sale of brushes.....	62,337 54
Fines and sundry sales.....	8,403 32
	<hr/>
Receipts of year.....	\$114,163 12
Disbursements of year.....	93,354 94
	<hr/>
Balance on hand January 1, 1883.....	\$ 20,808 18

Considering the fact that in May, 1881, the former Board of Directors asked that a tax be levied which should secure for the use of this department the sum of \$25,000; and the impression made thereby which induced the making of the levy in 1882. No part of the levy of 1882, amounting to over \$16,000, has, up to this date, January 1, 1883, been used, and will be placed to the credit of this fund, in addition to the balance, \$20,808.18, shown above, presents a condition of affairs which must be gratifying to all. There have been also many valuable permanent improvements made and paid for since August 1st, 1881, at a cost of \$8,692.84, exclusive of the labor performed by the inmates. This labor has been used largely in the construction of the several new buildings as well as the general repairs at the institutions. The plan adopted by the new Board of using this labor has proved a success, and exhibits good business management.

PARKS.

Through the generosity of a public spirited citizen the city has become the possessor of another beautiful park. This gift will be an enduring monument to the donor, whose name it bears. It will be cherished and cared for by the city for all time, and generations yet unborn will acknowledge their gratitude to the memory of the giver for having furnished to them a free pleasure ground. The Commissioners recommend the purchase of the ravine through which Doan Brook runs, from Wade to Gordon's Park. This recommendation should be acted upon at an early day, as at present there are no improvements upon this land, and it can be purchased or appropriated at a small cost, and when acquired will make for Cleveland a large and beautiful Park. There has been expended upon the Parks of the city during the past year the sum of \$13,963.94. The balance credit to this fund January 1st, 1883, was \$2,529.05.

LICENSE.

Steps looking to the enactment of a wholesome license law by which to relieve the burthen imposed upon real and personal property, is worthy your attention. Heretofore little revenue has been derived from this source. There is no good reason why persons doing business requiring extra police and fire protection should not contribute to their share of this burthen. The entire revenue derived from license in 1882 was \$15,904, of which amount \$4,780 was from the Dog tax. There is no other city with such a record.

CONCLUSION.

At the municipal election four years ago, when called upon to assume the responsible position of Mayor, I promised to devote my entire time and energies to the duties of the office. In doing so I have found the position no sinecure. The burden of municipal taxation, a result of the ill-advised methods of management in the past, was causing much complaint. The administration of my immediate predecessor had done much in checking lavish departmental expenditures, and requiring all departments to live strictly within their income. But he was powerless to prevent the issuing of bonds to pay for improvements then under way for which no other means had been provided. To him much credit is due for the stand he took against extravagance and mismanagement in every direction. To continue the good work begun by him, and to lift from the shoulders of the tax-payers as much of the burden, which was the source of their complaint, as was possible, has been the object of my efforts. To accomplish this, I have devoted my time and labor. With the results obtained I feel satisfied and amply repaid.

To the several Departments and Boards of the City Government, and the members of this and former Councils who

have encouraged me by their support and contributed by their aid, I desire to tender my grateful acknowledgements. It is with a feeling of great relief that I now cast the mantle of office upon the shoulders of my successor, than whom there are none more worthy to wear it, nor more able to bear the cares, responsibilities and high honor which attaches to the chief executive office of this beautiful and prosperous city.

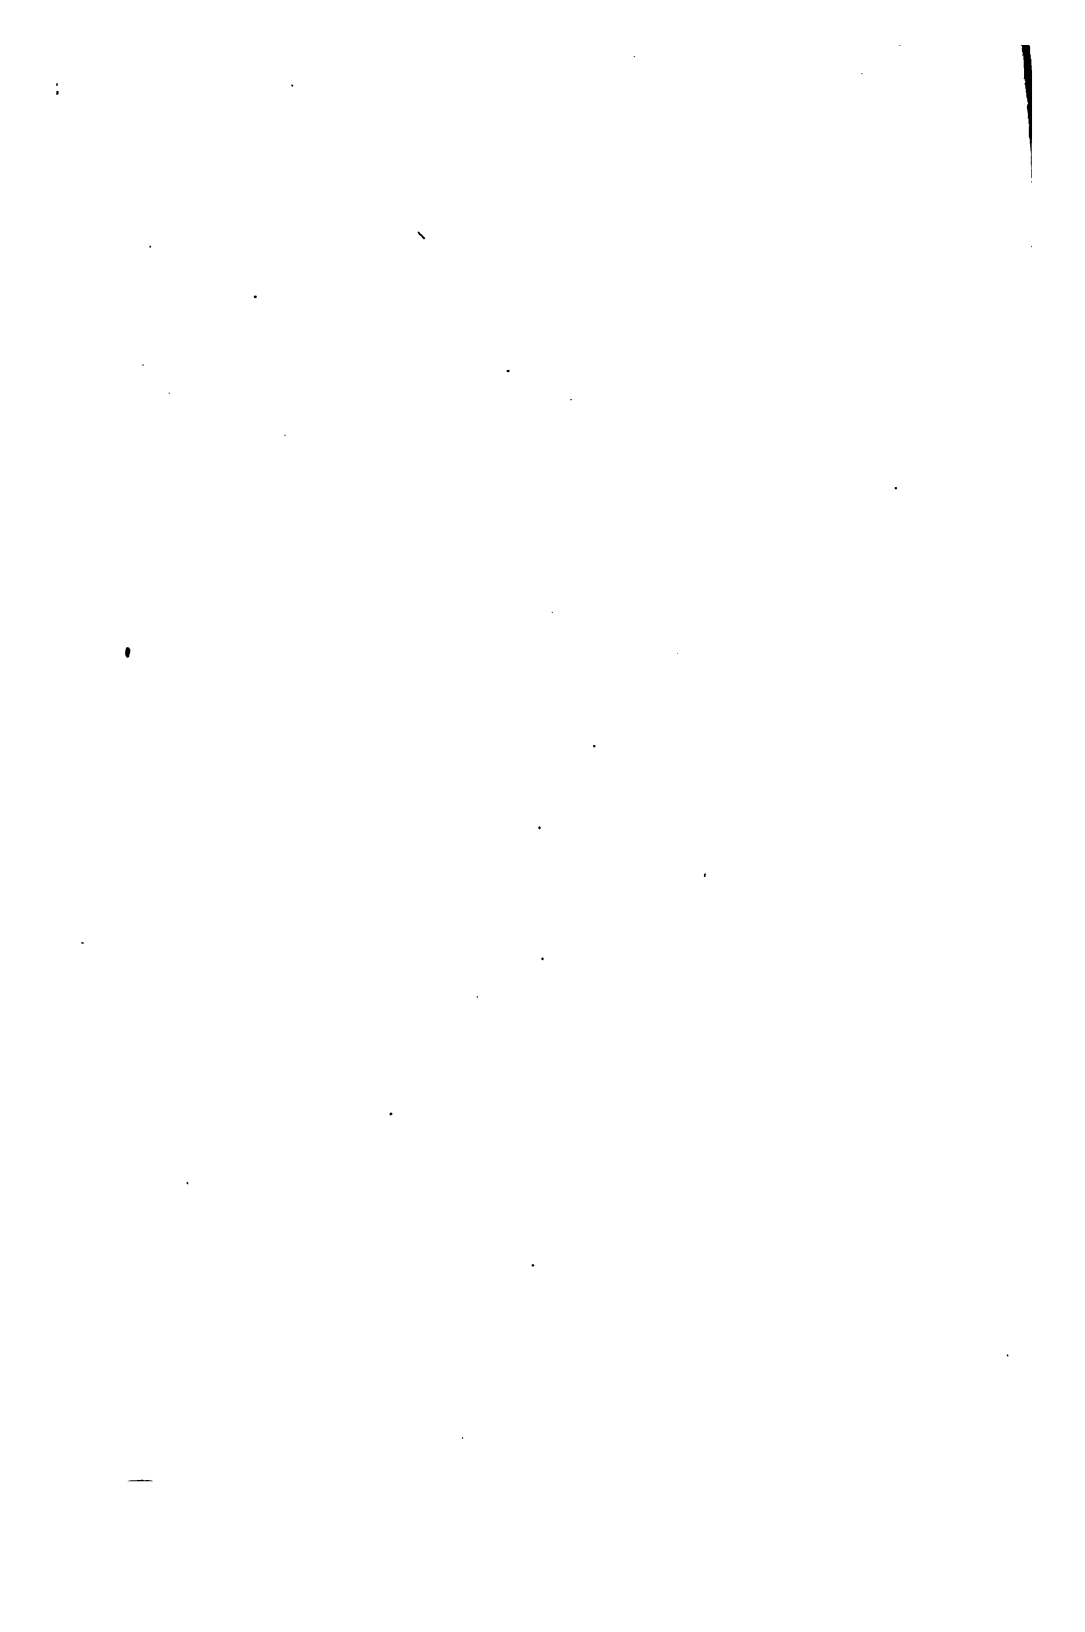

Respectfully submitted,

R. R. HERRICK, *Mayor.*

INAUGURAL ADDRESS

OF

Hon. JNO. H. FARLEY, Mayor.

INAUGURAL ADDRESS.

Gentlemen of the Council:

By the act of the majority of the citizens of Cleveland, expressed in accordance with the law of the State and the cherished custom of our country, we, to-night, enter upon our official duties. It is my earnest hope that we devote ourselves to a faithful performance of those duties, with a manly determination to shirk none of the responsibilities devolving upon us. I hope you will not consider it offensive or meddling, on my part, to offer suggestions for your consideration. My former experience, and, I trust, proper motives prompt me to impart my views, with the hope that you will give to my suggestions such study and attention only as your duty and best judgment may dictate.

Gentlemen of the Council, the great danger that besets justice, a danger that you will often be called upon to face, is the "lobby." Remember that you are the guardians of the rights of all our citizens, and that the lobby only represents special interests; that it is your duty to stand between

the general interests of the people and the selfish special interests of individuals or factions. To further protect the general interest and discourage the growth and perpetuity of the lobby, I would recommend the adoption of such rules and orders as will prohibit lobbyists and solicitors from entering within the bar of the chamber. Without desiring to cast the slightest reflection on any part of the present Council, but for the purpose of elevating the tone and character of the body, believing it to be a healthy safe-guard to fair, unbiased legislation, I recommend the passage of an ordinance amendatory to Chapter XVIII of the Revised Ordinances, making it a misdemeanor, punishable by expulsion, for any member of the City Council to accept anything of value as a fee or retainer for any service to be performed as such member, and to bar any member from voting upon any subject in which he may be interested as attorney or principal. In order to prevent hasty, ill-considered legislation, and to make the journal the complete record the Statutes contemplated, I recommend that Section 1693, page 527, Revised Statutes (so long violated) be strictly complied with, which statute reads as follows: "Ordinances, resolutions and by-laws shall require for their passage or adoption a concurrence of a majority of all the members elected, and the vote on their passage or adoption shall be taken by yeas and nays, and recorded on the journal."

I would also respectfully recommend the passage of an ordinance amending the sections of the Revised Ordinances regulating the duties of the City Weigher, Lumber Inspectors, and, in fact, all officers paid by fees, in such manner as will compel such officers to report monthly a full and complete transcript of fees received and work performed. As our city covers more territory, probably, than other cities in the States of equal population, so also, in the same ratio, will the care of streets, sewers, lighting, etc., be relatively

more expensive than in cities more compactly built and possessing narrow streets. Either the present method of street cleaning by contract is a failure, or the levy for the street fund has been inadequate, or mismanaged. If, in your judgment, the method is faulty, an appeal should be made to the Legislature next year to change the law. You will remember, however, that the fund provided for all purposes for this year is fixed by levy of last year. Thus, gentlemen, you must understand that while you will be importuned and criticized by the press and your constituents on account of the uncleanness and darkness of the streets, you will be confronted with the limited condition of the funds on hand, which limit the law prescribes, and you must respect and cannot exceed it. In connection with the subject of street cleaning, I would suggest and recommend that Section 903 of the Revised Ordinances be amended so as to prohibit the scattering broadcast, through the streets, of hand bills, "dodgers," or other advertising devices; and also to prohibit the depositing in streets, sweepings, shavings, dressings of telegraph poles, or other litter from new buildings, stores or dwellings. One of the most important demands on your attention is the subject of hospital accommodation for the unfortunate victims of accidents. Humanity and the good name of the city demand that immediate arrangements be made either by procuring accommodations at the hospitals now in existence, or the establishment of quarters sufficient to meet the requirements of decency by the city. I hope your honorable body will embrace the earliest opportunity next winter to petition the Legislature to pass an act authorizing cities of our grade to regulate and inspect steam boilers, and to allow the appointment of a board of inspectors to examine, qualify, and license men in charge of the same. Such a law would go far to increase public safety from boiler

explosions, and would decrease the smoke nuisance, now so much complained of, the best and cheapest smoke preventive yet discovered being intelligent stoking and good fuel.

I desire to impress upon the Council the necessity for an increase of the Fire Department Fund. That department was considerably short last year, and you cannot fail to remember that a great portion of the apparatus is old and worn, and should be replaced with new. The lighting of streets is also an important feature and should not be neglected. You will, however, in this particular, again be confronted with a lack of funds for the current year. The experiment of lighting by the present system of electricity is found to be about two and one-half times more expensive than the old system, although darkness has been increased in many localities, within a radius supposed to be illuminated by masts, by removing gas lamps in order to make a favorable showing, in cost, for the electric mast system. I desire to call your attention to this matter now, that you may give it careful study, and act intelligently on this subject when the present lighting contracts expire. I would recommend that in certain streets, when electric lighting may be desired by the property owners, it be granted only on condition that they consent to a special tax per foot front on streets so lighted for all additional cost above the cost of ordinary street lighting. The just cause of complaint against taxation is not so much on account of the amount raised, as the manner in which it is expended. You must insist that all contracts for improvemants be carried out to the letter, and no work accepted or paid for that does not fully meet all the provisions of the contracts. I would recommend, in view of our recent and past experience in floods, an amendment to Section 646 of the Revised Ordinances, to prohibit the building of bridge piers in the center of streams for any

bridge above Columbus street, and that all such piers be built on shore so as to avoid any obstruction to the free flow of drift and ice.

I also call your attention to Section 393 of the Revised Ordinances, which creates the position of Port Warden, a position neither useful nor ornamental, enacted for the purpose of healing the wounds of a defeated candidate. In justice to your constituents the office should be abolished, and the expenditure put to better use. I respectfully call your attention to the unbusiness-like provisions of Section 206 of the Revised Ordinances, defining the duties of Cemetery Trustees. The bills and business of this department should pass through the hands of the City Auditor, and be subjected to the inspection of auditing committees, in the same manner as the accounts of other departments. Their funds should be paid out only upon the vouchers of the Auditor on the Treasurer, and their receipts should be deposited with the City Treasurer. As now conducted, neither Auditor nor Treasurer has any knowledge of this department. I hope you will concede the necessity of having all the accounts properly checked, and one set of books that will at all times show the condition of all the departments. I trust that you will immediately take the necessary steps for the correction of this error.

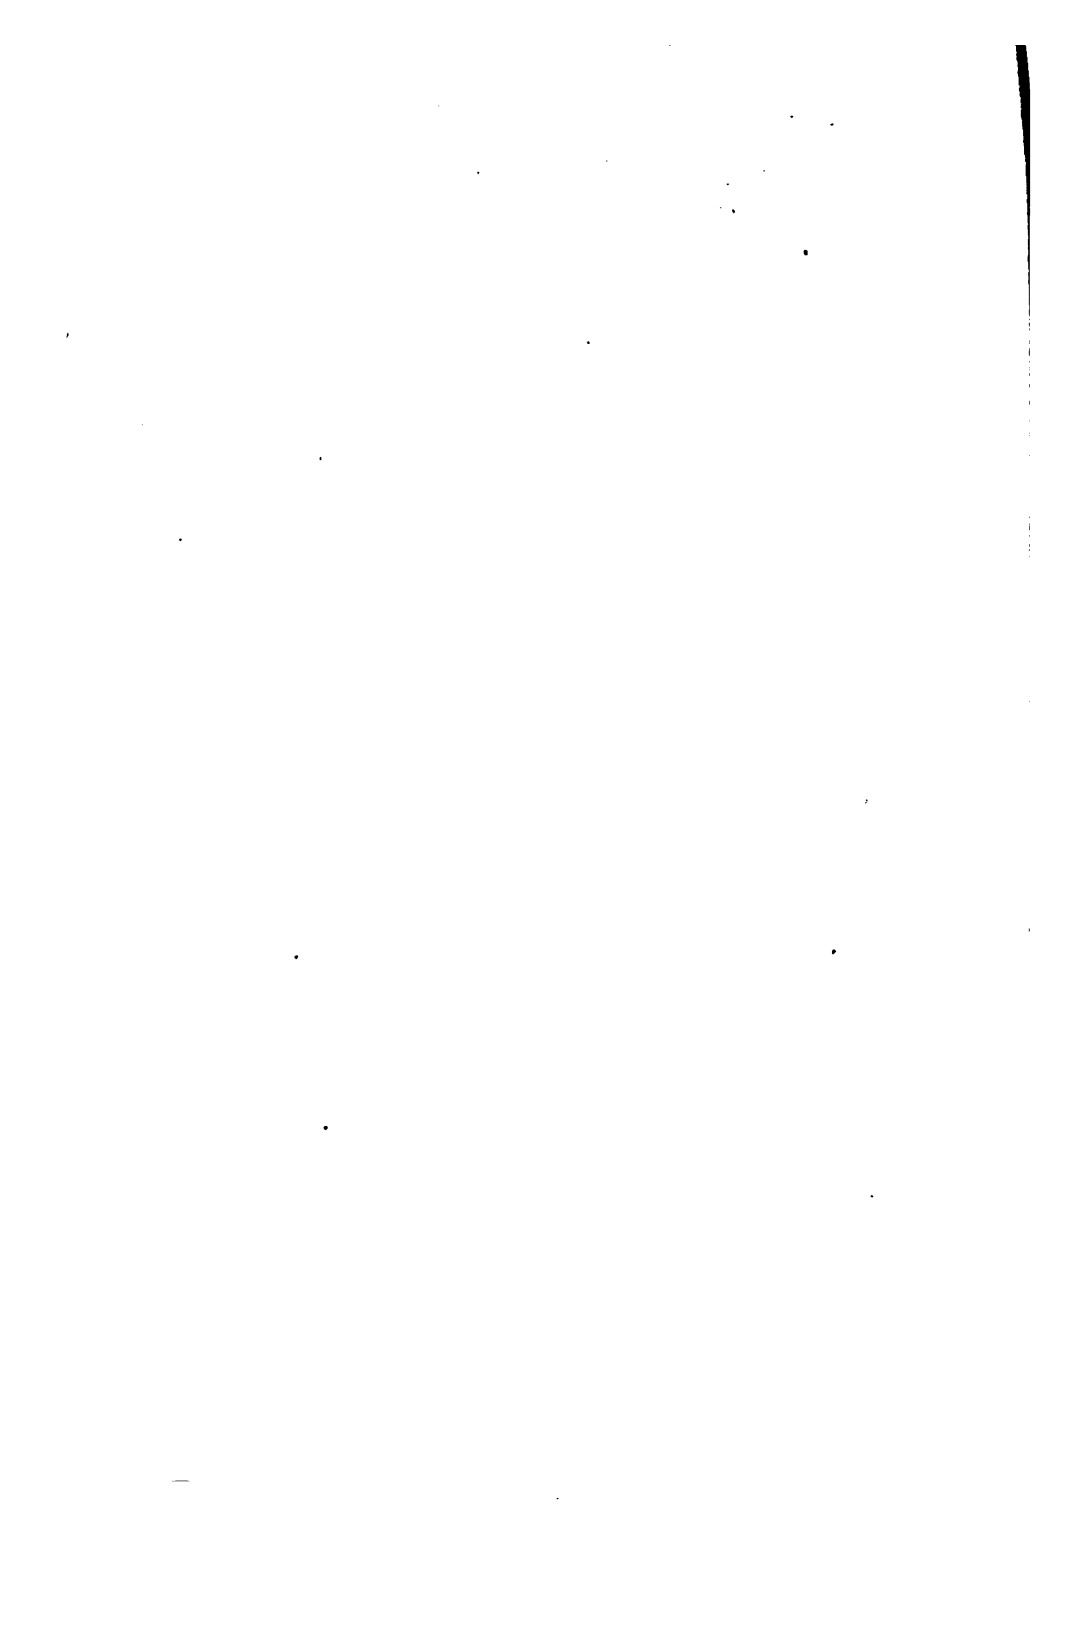

Without desiring to cast any reflections, but in justice to the retiring Treasurer, and as a matter of satisfaction to the citizens of the city, I respectfully recommend that a competent committee of disinterested persons be appointed by your honorable body to thoroughly audit the books and accounts of the Treasurer's office from the beginning of the fiscal year of 1869 to date. I would respectfully recommend that Chapter XXII of the Revised Ordinances be so amended as to require the City Treasurer to deposit all moneys that may

come into his possession in not-less than three national banks of the city under the supervision of the Treasurer, City Auditor, and the Committee on Finance of the City Council ; and that the earnings on said deposits shall be credited to the general fund of the city. Also that all fees of whatever kind and nature that may have been heretofore allowed the Treasurer, be credited to the general fund of the city. Should there be any provisions of the statute now undiscovered preventing the amendments herein recommended, I earnestly request your honorable body to petition the General Assembly for their removal, believing that the adoption of this course would enhance the general fund many thousand dollars annually. I also recommend that the chapter above referred to be further amended so as to provide for an annual auditing of the affairs and accounts of the Treasurer's office by a disinterested committee to be appointed at the second regular meeting in December of each year, which committee shall report the result of their findings to the Council at the first regular meeting in January ; and that the Treasurer shall report to the Council at the first regular meeting in each month the average balance in the treasury, giving the amount and place of deposit. I further recommend, on general business principles, that the salary of the Treasurer be fixed at \$5,000 per annum, and that the city also provide him with a clerk at such salary as the Council may fix, the Treasurer, however, to have the right to appoint such clerk. The hardship of stripping the new Treasurer of perquisites that may have heretofore drifted into that department may be used by some as an argument against immediate action, but I appeal to you to be governed only by your honest convictions of duty to your constituents. Let all your ordinances of a penal character be tempered with justice and moderation ; let the penalties imposed be corrective, rather than inflicted for the purpose of enriching the city.

In all acts performed by the Council and city officials as a part of the municipal government, whether legislative or executive, we should all bear in mind that we are the servants of the citizens of Cleveland, and that he serves his party best who serves the people well.

JOHN H. FARLEY,

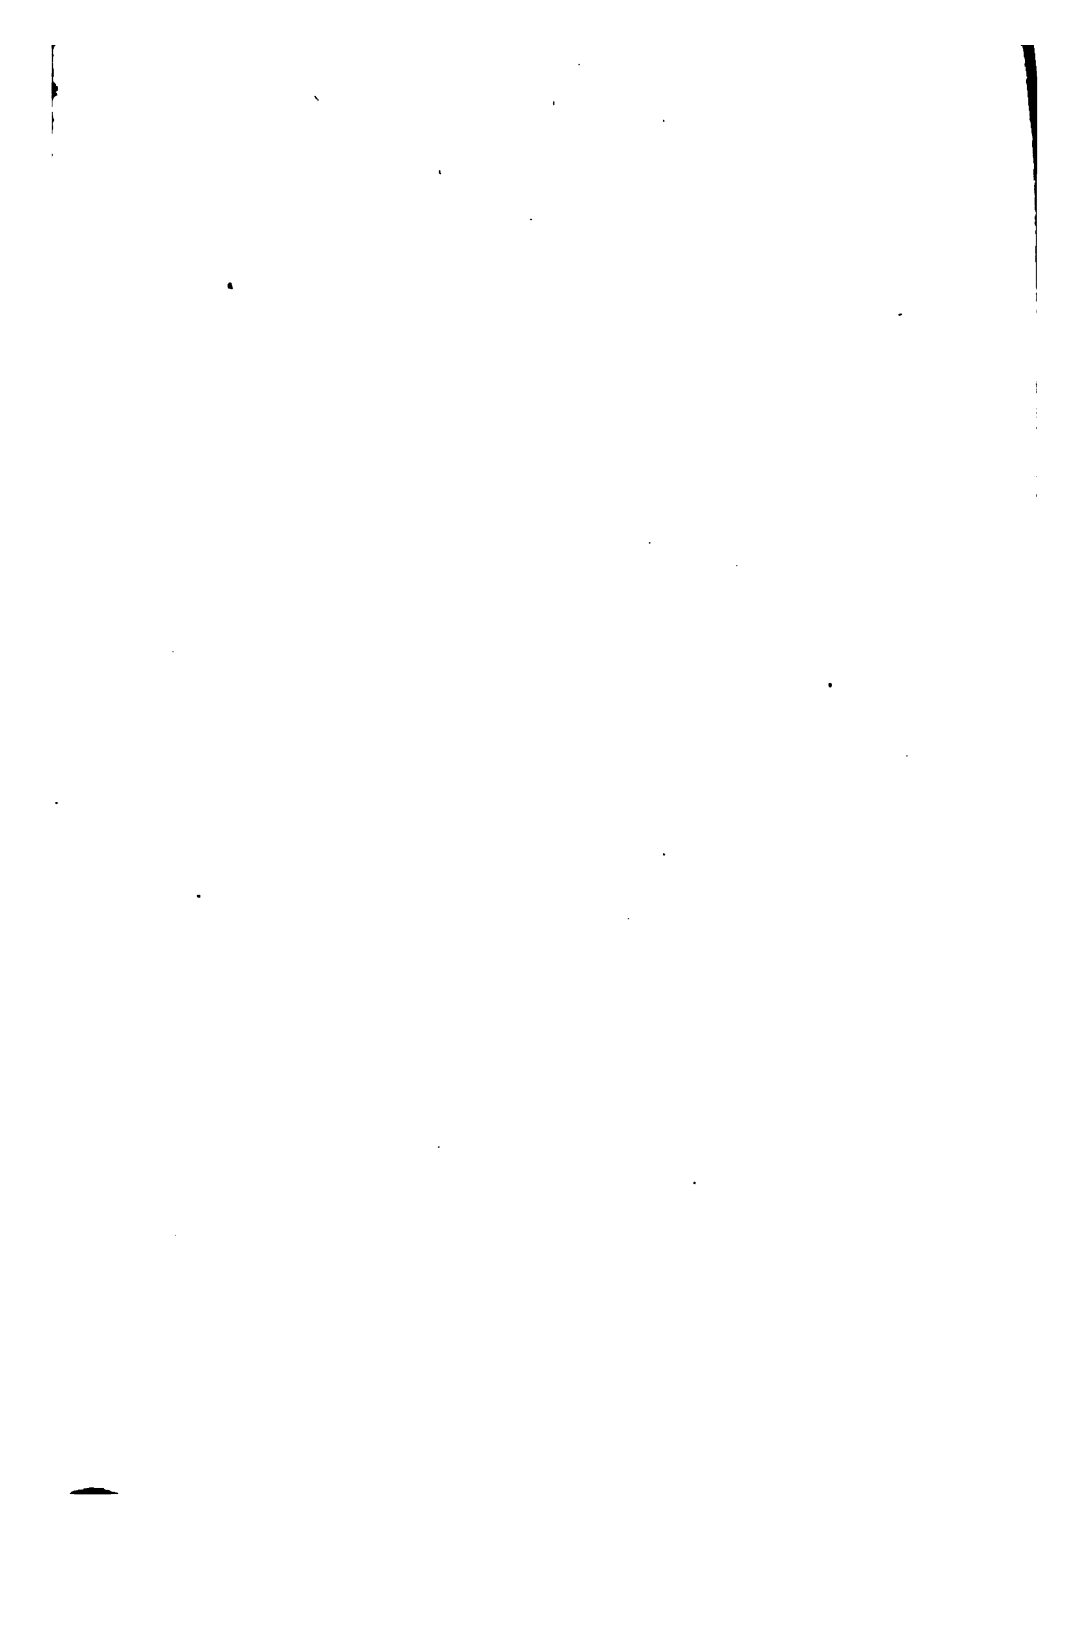

Mayor.

REPORTS OF
CITY OFFICIALS

ANNUAL REPORT
OF THE
CITY AUDITOR
OF THE
CITY OF CLEVELAND,
FOR THE FISCAL YEAR ENDING DECEMBER 31, 1882.

REPORT OF THE CITY AUDITOR.

CLEVELAND, O., January 22, 1883.

To the Honorable City Council:

GENTLEMEN:—I herewith submit the annual statement of the accounts and finances of the City of Cleveland for the year 1882, embraced in tables numbered from one to twenty-four, inclusive, and showing as follows:

TABLE 1.—A general exhibit of resources and disbursements of 1882.

TABLE 2.—An analysis of resources and disbursements of each general fund for 1882.

TABLE 3.—A comparison of ordinary expenses of each department and funds paid by ordinance, for 1881 and 1882.

TABLE 4.—Sums appropriated and sums paid from the sinking fund of 1862 for the city's part of cost of repaving certain streets.

TABLE 5.—Loans authorized and loans made from the sinking fund of 1862, in anticipation of the collection of assessments for repaving certain streets.

TABLE 6.—Aggregate amount paid in 1882 for repaving certain streets.

TABLE 7.—Special debt paid by the city at large to January 1, 1883.

TABLE 8.—Aggregate amount paid from the sinking fund of 1862 to January 1, 1883.

TABLE 9.—The condition of each fund and account, January 1, 1883.

TABLE 10.—Amount, maturity and proceeds of all bonds issued in 1882.

TABLE 11.—Amount and maturity of general bonds outstanding January 1, 1883.

TABLE 12.—Amount and maturity of street improvement bonds outstanding January 1, 1883.

TABLE 13.—Amount and maturity of street damage bonds outstanding January 1, 1883.

TABLE 14.—Amount and maturity of sewer bonds outstanding January 1, 1883.

TABLE 15.—Recapitulation of bonds outstanding January 1, 1883.

TABLE 16.—Temporary loans unpaid January 1, 1883.

TABLE 17.—Certified estimates outstanding January 1, 1883.

TABLE 18.—Comparison of city debt of all kinds, January 1, 1882 and 1883.

TABLE 19.—Principal and interest of bonds and notes maturing in each month of 1883.

TABLE 20.—A comparative showing of items included for twelve years, from 1871 to 1882.

TABLE 21.—The municipal levy for each general fund in the tax of 1882.

TABLE 22.—Comparison of the municipal levy of 1881 and 1882.

TABLE 23.—Amounts levied in the tax of 1882 upon sewer districts to pay bonds and interest maturing in 1883.

TABLE 24.—List of assessments prepared by the City Auditor's department, and levied in the tax of 1882.

TABLE 25.—Balance sheet.

TABLE No. 1.
GENERAL EXHIBIT OF THE RESOURCES AND DISBURSEMENTS OF THE CITY OF CLEVELAND FOR YEAR 1882.

CLEVELAND, January 2, 1883.

ANNUAL REPORT
OF THE
CITY CLERK
OF THE
CITY OF CLEVELAND,
FOR THE YEAR ENDING DECEMBER 31, 1882.

CITY CLERK'S REPORT.

To the Honorable City Council:

GENTLEMEN—I herewith transmit a report of the business transacted in this department for the year ending December 31st, 1882.

LICENSES.

There have been issued during the year 6,946 licenses, for which \$15,904 have been received and paid into the City Treasury, as follows:

To the credit of the General Fund,	\$4,589 00
To the credit of the Infirmary Fund,	5,385 00
To the credit of the Police Fund,	4,780 00
To the credit of the Street Fund,	- 835 00
To the credit of the Armory Fund,	315 00
Total,	<hr/> \$15,904 00

The following is an exhibit of licenses issued in each class, giving the number issued and amount received :

CLASS.	NUMBER.	AMOUNT.
Exhibitions.....	55	\$ 656 00
Peddlers.....	1,224	5,385 00
Cabs, Carriages and Omnibuses.....	118	590 00
Street Cars.....	167	835 00
Drays, Carts and Wagons.....	446	1,190 00
Drivers.....	49	49 00
Pawnbrokers.....	15	714 00
Intelligence offices.....	5	50 00
Dogs.....	4,349	4,780 00
Ferries.....	1	10 00
Public Wharves.....	21	1,212 00
Newsboys and Bootblacks.....	472	118 00
Armory Hall.....	14	315 00
	6,946	15,904 00

The number of licenses issued each month during the year was as follows :

January, 186	July, 1,075
February, 276	August, 2,180
March, 229	September, 174
April, 244	October, 111
May, 456	November, 195
June, 1,669	December, 151

The permanent detail of one patrolman, charged with the enforcement of license enactments has been in a degree successful, but I am thoroughly satisfied that a very large number of persons evade entirely this class of ordinances, and I

am well assured that the city would be very largely the gainer, and that the license paying fraternity would be more justly and equally dealt with if two or three special license policemen were appointed and placed under the direct and exclusive control of this office. A laxity in the enforcement of ordinances of this character works a manifest injustice to those who honestly comply with the law.

STATIONERY, ETC.

The following is an exhibit of the cost of Blank Books and Stationery of every description furnished each department during the year.

Departments.	Blank Books.	Printing.	Paper and Envelopes.	Stationery, Sundries	Litho-graphing.	Engineer's Supplies.	Total.

City Clerk.....	188 05	2,637 32	36 86	172 19	3 75		2,968 17
City Solicitor.....	10 85	155 26	7 50	18 09	30 35		216 45
City Civil Engineer.....	51 56	85 00	23 82	35 87		91 54	206 79
Street Commissioner.....	55 64	1 40	8 29	25 35			90 68
Health Department.....	220 99	369 15	7 93	5 24			603 91

STATIONERY, ETC.—Continued.

Departments.	Blank Books.	Printing Envelopes.	Paper and Envelopes.	Stationery Sundries.	Litho-graphing.	Engineer's Supplies.	Total.
Cemetery Department.....	\$ 55 76			\$ 11 96			\$ 67 72
Hay Weighers				35			35
City Sealer.....	13 40	3 40		9 51			36 81
Markets.....			1 08	2 40			3 48
Codifier.....	85	4 68	1 25	3 56			10 24
Board of Equalization	30						50
Total.....	\$1,707 80	\$4,879 60	\$271 62	\$670 12	\$964 76	\$91 54	\$7,714 98

The system of procuring these supplies under a yearly contract has continued eminently satisfactory.

ANNUAL REPORTS.

The publication of the annual reports for 1881, cost in the aggregate \$1,927 14, as follows:

Mayor's,	-	-	-	\$395	66
Police Department,	-	-	-	119	16
Fire Department,	-	-	-	100	26
Work House,	-	-	-	98	38
Water Works,	-	-	-	92	34
Health Department,	-	-	-	90	66
City Solicitor,	-	-	-	19	80
City Auditor, (including City Treasurer and Sinking Fund Commissioners,				203	24
Consolidated Volume,	-	-	-	807	64

The fact that the fiscal year terminates on the 31st day of December of each year enables the Departments to issue their reports at least four months prior to the commencement of the council year; i. e., the third week in April, at which time the Mayor's message is presented, and, under the present system the issuing of the consolidated volume is delayed in order to include His Honor's communication, the result being that the volume is not ready for distribution until June. Considering the purpose for which the publication is made and its cost, it would seem advisable to adopt some method whereby the volume could be issued much earlier. This might be effected by an ordinance providing that all Department reports should be published in a consolidated volume immediately after their presentation in January of each year, and that the annual message of His Honor, the

Mayor be published in a separate volume in April. This method if adopted would result in a saving of over forty per cent. in the cost of the work.

ADVERTISING.

The cost of all advertising during the year as charged to the several departments has been as follows :

DEPARTMENTS.	AMOUNT.
Mayor.....	478 35
City Clerk.....	6,342 01
City Auditor.....	189 11
City Solicitor.....	45 18
City Treasurer.....	
City Civil Engineer.....	1,481 17
Board of Improvements.....	694 54
Water Works.....	63 07
Cemetery.....	66 12
Police Department.....	68 95
Fire Department.....	58 12
Park Department.....	2 00
Infirmary Department.....	78 58
Health Department.....	41 94
Workhouse and House of Correction.....	44 21
Markets.....	3 20
Total.....	9,641 50

The unusual activity in street improvements during the past year has occasioned the large expenditures charged to this department.

THE REVISED ORDINANCES.

On the 19th day of December, 1881, a resolution of the City Council authorized a revision of the ordinances. After a vexatious delay, assurance is given that the edition of one thousand copies will be issued at an early day. I have prepared, and will have bound in a volume, properly indexed, all ordinances passed since the passage of the new revision; with a similar volume issued semi-annually hereafter, the difficulty of ascertaining the law which has heretofore obtained will be removed.

INDEXING.

The work of indexing the Records has been progressed with as rapidly as possible, and will, when completed, constitute an invaluable epitome of municipal history.

Respectfully submitted.

W. H. ECKMAN, *City Clerk.*

ANNUAL REPORT
OF THE
CITY SOLICITOR
OF THE
CITY OF CLEVELAND, OHIO.
FOR THE
YEAR ENDING DECEMBER 31, 1882.

CITY SOLICITOR'S REPORT.

To the Honorable City Council:

GENTLEMEN — I herewith submit my report for the year ending December 31st, 1882. The following tables disclose the litigation in which the city has been and now is involved, and the disposition of the cases finally determined. In addition to the litigated business of the city, there has devolved upon this department a large amount of labor during the past year in the way of investigating and reporting upon matters referred by the Council, the various Boards, and city officers. This branch of the business has considerably increased over former years, owing to the improvements that have been made and entered upon by the city. The result of the city's litigation during the past year is quite satisfactory, and reflects credit upon my assistants, Mr. W. E. Sherwood and H. C. Bunts, who have discharged the duties assigned them in a very satisfactory manner.

Respectfully submitted,

GEO. S. KAIN,
City Solicitor.

Report of the city's litigation for the year ending December 31, 1882 :

CASES PENDING JANUARY 1, 1882.

“ “ United States Circuit Court.....	0
“ “ Probate and Magistrates' Courts.....	30
Total.....	92

CASES PENDING JANUARY 1, 1883.

In the Supreme Court of the State.....	14
“ “ District Court of Cuyahoga county.....	16
“ “ Common Pleas Court.....	142
“ “ Circuit Court of the United States.....	4
“ “ Probate and Magistrates' Courts.....	0
Total.....	176

Of the cases pending on the 1st day of January, 1882, one hundred and seven (107) were suits, including those for back taxes, in which money compensation was claimed for

injuries to property and person through the alleged fault of the city. The amount claimed in these cases was distributed as follows :

In 97 cases for injury to property, the amount claimed was	\$258,083 41
In 10 cases for injury to persons, the amount claimed was ..	107,055 00
Total	\$365,138 41

Of the cases commenced during the year 1882, thirty-seven (37) were suits, including those for back taxes, in which money compensation was claimed for injuries to property and person through the alleged fault of the city. The amount claimed in these cases was as follows :

In 35 cases for injury to property, the amount claimed was	\$138,260 87
In 2 cases for injury to person, the amount claimed was ..	10,000 00
Total	\$148,260 87

The total amount of damages claimed for injury to the property and person of litigants through the alleged fault of the city, in cases pending on the first day of January, 1882, and commenced during said year, is as follows, to-wit :

In 132 cases for injury to property, the amount claimed was ..	\$396,344 28
In 12 cases for injury to person, the amount claimed was ..	117,055 00
Total	\$513,399 28

SUITS FOR THE CITY.

The number of cases pending on the first day of January, 1882, and commenced during said year, brought by the city, was twenty-one. The amount claimed in these cases was \$89,816.01.

SUITS TO RECOVER BACK TAXES AND ASSESSMENTS.

There were pending, on the first day of January, 1882, and commenced during the year, seventy-five cases against

the present and former County Treasurers to recover back taxes and assessments, collected by them for the city, involving the following amounts :

In 67 cases pending January 1, 1882	\$12,397 91
In 8 cases commenced during 1882	5,406 40
Total	\$17,804 31

Of the said seventy-five cases, seven were disposed of during the year 1882. The amount claimed in these cases was \$2,877.22 ; the amount recovered was nothing.

AMOUNT SOUGHT TO BE RECOVERED IN CASES AGAINST AND FOR THE CITY.

The amount sought to be recovered in various suits for and against the city, pending January 1, 1882, and commenced during that year, exclusive of injunction suits to restrain the collection of taxes and special assessments levied by the city, ejection suits wherein only real property was sought to be recovered, and other suits wherein no pecuniary compensation is demanded, is as follows :

IN CASES PENDING JANUARY 1, 1882.

Against the city	\$365,138 41
For the city	80,292 53
Total	\$445,430 94

IN CASES COMMENCED DURING 1882.

Against the city	\$148,260 87
For the city	9,523 48
Total	\$157,784.35
Total amount sought to be recovered	\$603,215 29

ANALYSIS OF CASES DISPOSED OF DURING THE YEAR 1882.

The following named cases embrace all cases disposed of during the year 1882, in which damages were sought to be recovered for injuries to the property and person of the complainants through the alleged fault of the city.

These cases do not include suits for back taxes, and are eighteen in number.

AMOUNT CLAIMED IN THE ABOVE DISPOSED OF CASES.

In 13 cases for damage to property.....	\$61,028 76
In 5 cases for damage to person.....	90,000 00
Total amount claimed.....	\$151,028 76
Amount recovered for damage to property.....	\$8,721 69
Amount recovered for damage to person.....	205 00
Total amount recovered.....	\$8,926 69

The amount thus recovered was distributed through six cases, as follows :

Title of Case.	Amount Claimed.	Amount Recovered.
Hittell vs. City.....	\$15,960 11	\$2,000 00
Jewett, et al vs. City.....	6,333 35	6,333 35
Powers, vs. City (by settlement).....	10,000 00	200 00
Hecker, vs. City, " ".....	1,546 66	328 34
Cunnington vs. Lohrer.....	50,000 00	5 00
Castle vs. City (by settlement).....	152 32	60 00
Total.....	\$83,992 44	\$8,926 69

The above cases of Hittell vs. the City and Jewett et al. vs. the City, have been taken to the District Court on error, with the view of reversing the judgments of the Court of Common Pleas.

SPECIAL MENTION.

**A BRIEF STATEMENT SHOWING THE NATURE OF SOME OF THE
CASES DISPOSED OF DURING THE PAST YEAR
IS HERE GIVEN.**

The case of C. P. Jewett et al., County Commissioners, vs. The Board of Work House Directors and The City of Cleveland, arose out of the following facts and circumstances, to-wit: During the years 1879, 1880 and 1881 divers persons were convicted in the various courts of this county of offenses under the laws of the State, and sentenced to pay a fine, or fine and costs, and on default of payment, committed to the Work House until paid. During the time above referred to, there was collected from persons so committed, by the Work House authorities, the sum of \$6,333.35, said sum being composed of fines and costs, so as aforesaid imposed, in State cases. This amount so collected was paid into the City Treasury. The County Commissioners seek, in this action, to recover the same from the city, claiming that by virtue of the statutes of the State the money belongs to the county. The Court of Common Pleas awarded judgment in favor of the said plaintiffs. The city has taken the case to the District Court, where the matter is now pending.

HITTELL VS. THE CITY OF CLEVELAND.

The city some years since opened and extended Grand avenue. In improving this street according to the established grade, a large amount of filling was required to be done. The embankments, or lateral walls, thus erected extended over and covered a considerable portion of plaintiff's lands. In this he claims he was damaged to the extent of

\$15,960.11, and at the trial in the Common Pleas Court recovered a verdict for \$2,000 damages. Defendant has taken the case to the District Court, where it is now pending.

The case of *The City vs. Geo. G. Minor et al.*, was an action brought by the city against Minor and his bondsmen in the Common Pleas Court to recover the sum of \$2,782.43, which came into his hands as Secretary of the Board of Police Commissioners, and which he failed to account for to the city on the termination of his office. His bondsmen interposed the defense that it was no part of his duty as Secretary to have the custody of any money, and that the Board could not legally impose such duty upon him. The court decided that he had been entrusted by the Board with certain monies, the custody of which had been made a part of his duty; and that the Board had a legal right to impose such duty upon him; and that his bondsmen were liable in the sum of \$2,822, for which the court rendered judgment. The defendants have taken the case to the District Court on error, where it is now pending.

ANNUAL REPORT

OF THE

CITY CIVIL ENGINEER,

OF THE

CITY OF CLEVELAND, OHIO,

FOR THE

YEAR ENDING DECEMBER 31, 1882.

REPORT
OF THE
CITY CIVIL ENGINEER.

To the Honorable Board of Improvements :

GENTLEMEN — I respectfully submit the annual report of the City Civil Engineer's Department for the year ending December 31, 1882.

The total cost of work done under the direction of this Department during the year is \$568,281.15. This amount does not include the cost of repairs and maintenance of City bridges, which, for the past year, amounts to \$6,424.06, or a total of \$574,705.21.

One new bridge over the railway tracks to the bath-house at the foot of Erie street, has been built, also a new stone abutment to the canal bridge above the paper mills, near the southerly limits of the city. Lower Central Way and Jefferson street bridges have been damaged by being run into by vessels. Aside from the above nothing out of ordinary repairs have been made on the bridges.

The Viaduct draw is in good condition, especially the machinery and the turn-table, and bid fair to wear a long time without renewal. On some of the other bridges considerable repairing will have to be done to the stone abutments during the coming year.

SEWERS.

Sewer district maps have been made for Walworth Run, embracing all the territory drained by that stream, also for the greater part of East Cleveland; and surveys have been made of a part of the Fourteenth, Fifteenth and Eighteenth wards for an intercepting sewer, which will be a continuation of the main sewer from the lake for East Cleveland, or the territory east of District No. 7. The sewer will commence at Lake Erie and run through Madison avenue to Holton street, thence to Chadwick, thence to Atlantic, thence to Madison avenue, thence to Axtell avenue, thence to Groton street, crossing Broadway at its intersection with Fullerton street, thence through Fullerton, Wilcox, Canton, Elmwood and Indiana streets and the Brecksville road to the city limits. This sewer is designed to carry all the sewage east of it, in the Fourteenth, Fifteenth and Eighteenth wards, but not the storm water also, except the territory drained by Mill Creek. The sewage from the Northern Ohio Hospital for the Insane can be run into the sewer in Broadway by an inverted syphon. That part of this proposed sewer south of Woodland avenue, it is proposed to build as an intercepting sewer of sufficient size only to carry off the house drainage for the territory that is tributary to it. There is also a branch sewer to be built in Euclid avenue, each way from the point where the main sewer crosses the avenue, from near Giddings Brook easterly to Fairmount street. East of this street it is proposed to construct an iron syphon running to near Adelbert street, there intersecting the old sewer now in the avenue. This syphon will enable people living on the line of the old sewer, as well as the colleges, to use it for house sewage purposes, which cannot be done at present, as

the old sewer now has its outfall into Doan Brook. The outfall of this proposed sewer in Euclid avenue is not yet determined, a plan has been made to connect it with the Dunham avenue branch of the Willson avenue main, and use that for eight or ten years, or until the East Cleveland District should decide to build a main sewer up from the lake, but this plan has met with some opposition from the fact that, while under present laws the city could build and connect this sewer in Euclid avenue with the Dunham avenue branch, there is no way provided by which to pay District No. 7 for the use of a portion of its sewers.

Plans for a large number of small branch sewers in different parts of the city have been adopted, and the tax assessed for a part of them in advance of their construction. This way of making improvements creates a great deal of dissatisfaction, as the Engineer has to make an approximate estimate of the cost of the work as a basis on which to assess the tax, which is so much per foot of taxable frontage on each side of the street, and on most all streets a part of the corner lots are exempted, they having already paid a sewer tax, so that all evemptions and street intersections have to be charged back upon the other lots; this, together with the catch basins, house connection pieces, man and flushing holes, superintendents, removing surplus material, advertising, etc., runs up the assessment much above what it would cost to build a single foot of sewer. The Engineer, in making estimates in advance of the work being done, from twelve to eighteen months, cannot know what the price of labor and materials will be at the time the work is done. The basis is generally on what work has been done for the year previous, with a small per cent. added for contingencies, so that when the work is advertised and bids received there will be money enough to do it. If there should not be enough, an additional tax would have to be levied to make

up the deficiency. For this reason estimates are made high enough to cover all contingencies, and when the work is completed the surplus will have to be paid back to the taxpayers. On the sewer in Vine and Burnham streets, built this year under contract by the city, a surplus is left of eleven cents on Vine street and nineteen on Burnham street per foot front, which will, in due time, be returned to those who paid it. It is the uncertainty as to what the sewer will cost, when the tax is levied before the work is done, that causes dissatisfaction.

April 1st, 1882, the City Council adopted a resolution authorizing a special committee to employ a consulting sewerage Engineer to look over the city and recommend a plan for a sewerage system and extensions of the present plans.

A special committee was authorized, consisting of His Honor, Mayor Herrick; John Whitelaw, Engineer of the Water Works, and the City Civil Engineer. This committee secured the services of Mr. Rudolph Hering, C. E. of Philadelphia, who spent about two weeks' time here in looking over the city, and made a report which was submitted to the City Council June 26, 1882, which report is too long to be admitted here. Mr. Hering looked the ground over as thoroughly as time would permit, and suggested a general plan for main and intercepting sewers for the city, which I think approximates closely to what will be adopted should the city prosper and increase in population as rapidly as it has for the last few years. However, time may suggest some changes from the plans of Mr. Hering.

DREDGING.

Considerable dredging has been done during the past year, and boats drawing thirteen and a half feet of water have passed up with iron ore as far as the new furnaces of the Cleveland Rolling Mill Company, just below the draw-bridge of the N. Y., P. & O. Ry. The water in the lake and river was very high during the entire season, averaging as much as ten or twelve inches above what it was the year previous. If it had not been for this unusual height of water very much more dredging would had to have been done to accommodate the business on the river.

PAVEMENTS.

There has been 7.688-1000 miles of streets paved and repaved during the past year, as shown by table No. 2 accompanying this report. Of this amount, 876-1000 miles were laid with dressed stone, and contracts have been made to pave with the same materials Euclid avenue, from Perry street to Fairmount street. All other streets have been paved with common or wet stone pavement, and have been done in a substantial manner. There may have been some settlement in places where water pipes have been lowered or laid, or over sewer or gas pipe trenches, as it has been almost impossible to thoroughly reach every point, when so many trenches have been opened as there were last year. There are also some places in the street railway tracks where the water stands, which will be drawn off by openings into the sewers.

The block stone pavement seems to be growing in public favor notwithstanding that it costs one-third more than the common stone pavement. Much more has been accomplished in repaving streets during the past season than was expected, but it is a good thing that the work is done, as the

public will be relieved from traveling over the old wood pavement.

Broadway from top of hill to Union street, St. Clair from Erie street to Willson avenue, and Euclid avenue from Perry street to Fairmount street, are in very bad condition. The first two named are not under contract. When these streets are repaved the greater part of the old wood pavements will be out of the way, and the tax-payers of the present generation will not be called upon for another paving tax where stone has been used.

A large amount of work has been done in looking up the records, in preparing frontage and ownership maps of all streets improved by the city, compiling records of city property, examining and reporting on petitions and remonstrances, and on the valuation of property to see whether the cost of the proposed improvements will exceed twenty-five per cent. of the valuation of the property as listed on the tax duplicate, examining and reporting on all new allotments, plats or street dedications, making surveys and maps for house numbering, etc.

There are now employed eleven assistants, an increase of four since last year, one at \$60, one at \$50, and two at \$40 per month.

The accompanying tables exhibit in detail a part of the work done by the Department during the past year.

B. F. MORSE.

City Civil Engineer.

There are four electric masts, each having eight lamps, of four thousand candle power per lamp, situated as follows: one at the intersection of Superior and South Water streets; one at the intersection of Superior and Oniaro streets; one at the intersection of Lake and Bank streets, and one at the intersection of St. Clair and Erie streets. There are also thirty-three electric lights on Euclid avenue between Monumental Park and Willson avenue. The four masts and thirty-three posts have displaced 515 gas lamps.

ANNUAL REPORT
OF THE
BOARD OF IMPROVEMENTS
OF THE
CITY OF CLEVELAND, OHIO,
FOR THE
YEAR ENDING DECEMBER 31, 1882.

ANNUAL REPORT
OF THE
BOARD OF IMPROVEMENTS.

To the Honorable City Council:

GENTLEMEN:—The Board of Improvements herewith submits its annual report for the fiscal year ending December 31st, 1882.

The reports of the City Civil Engineer and Street Commissioner, giving a specific report of their respective departments are hereto attached and made a part hereof.

The total cost of work ordered, services performed and materials furnished under the supervision of the Board, during 1882, including the expenditures of the departments of the officers above named, was \$814,929.54.

There have been one hundred and four meetings of the Board during the year, of which one hundred were regular, and four special meetings. The year has been an extremely busy one for the Board; in addition to the general routine business of this department it has had the charge and supervision of extensive and permanent improvements which will prove a lasting benefit to the city. There has been laid seven and sixty-eight one-hundredths miles of Medina stone pavement during the year, incurring an expense thereby of nearly five hundred thousand dollars. The sewerage also has been extended four and thirty-seven one-hundredths miles.

The repaving of a portion of Superior, Prospect, Wood-

land, Pearl, Detroit, Bank, Seneca, Erie and other streets has met a much needed necessity. And the replacing of a perishable for a good, durable stone pavement on these streets, and the streets which provisions have been made to repave during 1888, will substantially obliterate the wood and concrete pavements of the city.

Experience has fully demonstrated that stone is the only suitable pavement to adopt, not merely for its durability, but for its economy; but whether the same shall be a "block" or "wet" stone depends more upon its comfort in use and sanitary condition than durability.

Contracts have been entered into with the city to repave Euclid avenue, from Perry to Fairmount streets, with "block" Medina stone, and this portion of Euclid avenue will be repaved, under the contracts, during the coming season.

These permanent improvements should proceed from year to year, where public necessity demands, and especially in the business portion of the city, until our principal thoroughfares are paved with a good, durable pavement.

The question of the extension of sewerage and water is equally as important in promoting the sanitary conditions of the city as the pavement of streets, and should be enlarged as rapidly as funds will permit.

An intercepting sewer, which has heretofore been urged, should be constructed as soon as the necessary preparations can be perfected to commence and prosecute this improvement, which has become to be a public necessity.

Although it is the disposition of the Board to recommend and foster permanent and needful improvements, yet to avoid conflict and litigation the Board is of the opinion that improvements which will necessitate a special tax should not be recommended unless all the property to be assessed therefor will bear the expense under the law.

If this principle is closely adhered to improvements will proceed without apprehension of an abatement or refusal to comply with the provisions of the law.

Authority of the City Council should be given the Board to purchase a horse and cart, or more if necessary, and employ suitable persons to keep our paved streets in thorough repair under the supervision of the Street Commissioner. By this method the pavements would be kept in good condition and would not necessitate relaying as often as might be required under the present system.

The accompanying reports of the Engineer and Street Commissioner are respectfully indorsed by the Board, and herewith referred to your honorable body for your consideration and approval.

The expenditure authorized by the Board, and not included in the reports of the Engineer and Street Commissioner were as follows, to-wit :

ANNUAL REPORT

OF THE

STREET COMMISSIONER,

OF THE

CITY OF CLEVELAND, OHIO,

FOR THE

YEAR ENDING DECEMBER 31, 1882.

REPORT OF THE STREET COMMISSIONER.

To the Honorable Board of Improvements:

GENTLEMEN,— I have the honor herewith to submit the annual report of the Street Department for the year ending December, 31st, 1882.

About one-half of the total amount expended by this Department has been under contracts, specifications of which and prices for performing the work mentioned therein, are embraced in table below.

About October 1st, 1882, contracts were entered into with lowest responsible bidder for doing the work as specified in proposals, for the succeeding fifteen months.

A small percentage only of the gross amount of work enumerated in tables being done under the above mentioned contracts.

The present contract prices which hold to January 1st, 1884, for each street cleaning section, of which there are four, with name of contractor, are at the following rates for work specified:

Contractor.	P. Carroll.	A R Jewett.	S. Beckwith	S. Beckwith
Section.....	1	2	3	4
Paved streets.....	\$22 00	\$30 00	\$26 00	\$28 00

Furnace cinder.....	.40	.70	.40	.45
Cleaning crossings.....	.04½	.04½	.07	.08

Constant watchfulness and attention is more indispensibly necessary in the care of the two thousand catch-basins of the city than is generally understood, carelessness in attention to which would result in great damages to property. Mr. Fred. Kuentz, who has this work in immediate charge, has made himself invaluable in giving his undivided and close attention to it. The catch-basins of the city are cleaned by contract. The price for fourteen months, from November 1st, 1882, to January 1st, 1884, being \$2,545, which is less than one and one-half dollars for each in city. With continual watchfulness over contractor, this is certainly the best and cheapest method that could be adopted.

The market grounds are cleaned by contract; present price, and to January 1, 1884, being \$895. Estimates being made out by this Department for this work semi-monthly..

Repairs to stone and wood pavement, to box gutters and

sluices, flushing sewers, and puddling streets has all been done by men employed by Street Commissioner at day's work. The greater part of the work of repairing cross-walks being done in the same manner.

It will be seen by tables annexed, that there was a large amount of pavement repair done by days work on wood-paved streets; the old blocks from streets being newly paved, were used for this work. Franklin, Garden, Perry and part of Kinsman streets received in this way thorough repairs at comparatively small cost. The stone pavement on Ontario street, from the Public Square to the Market House, was repaired with old stone taken from other streets which were being repaved. All other stone-paved streets were also gone over, and all bad chuck-holes patched up. The amount of work done for the Water Works Department and other parties taking out permits to open streets, was unusually large.

Although less cleaning was done than during the preceding year, the contract prices were about thirty per cent. higher on all work, thus making increased cost on total work done. A larger amount of work was also done on unpaved streets than was done during the year 1881.

The work on Scranton avenue landslide and culvert, amounting to about ten thousand dollars, was done and paid for during the earlier part of the year. The cost of culvert, as given in the Auditor's statement, does not include filling, puddling, paving, and other expenses made necessary in order to place street in proper condition for travel.

The increase of expenditures of the year 1882 over those of 1881 was due to above mentioned causes, together with the higher wages paid to pavers, teams and laborers.

The ordinary expenses of 1882, as given by the Auditor, were \$87,860.01. This was for fiscal year, and includes

Flowers,	78 40
Lighting,	41 40
Park chairs,	106 20
	<hr/>
	\$6,004 57

Document in history of our public parks was dated September 15th, 1882, by transferring to the city as a free gift, a tract of land lying north of Euclid avenue and east of Franklin street, containing about seventy acres.

WADE PARK.

Located within the boundaries of this park, and set out by the donor as a park in 1872, large sums of money were expended in beautifying the grounds, which possess natural beauties, peculiarly fitted for pleasure. Driveways and footpaths were made to ascend the plateau of high ground and through the forest trees and out into the open sun. A bridge had been made to span Doan brook, and a path of course to the lake through the pretty woods of the favored locality; the garden was accordingly called into requisition to supplement the park, and Wade Park had become recognized as one of the best spots in the city.

For a number of years past, the park had been thrown open to the public, the ample test of public appreciation being found in the great number of visitors who found pleasure and recreation within its boundaries.

The tender of the deed of gift was made to the City Council, on September 11th, through a special committee appointed by resolution adopted June 26th, 1882.

A resolution of acceptance and of thanks to the donor was unanimously adopted on the date of the tender, and on September 25th the deed was accepted by ordinance.

The following is a copy of the deed as recorded in Volume 341, page 165, Cuyahoga County Records, and in Volume 1, page 129, City Record of deeds:—

THE DEED.

KNOW ALL MEN BY THESE PRESENTS, That I, Jephtha H. Wade of the City of Cleveland, County of Cuyahoga and State of Ohio, being desirous of securing to the citizens of Cleveland for all time the opportunities of re-creating, having, improving and retaining a beautiful and attractive Public Park therein for the benefit of all the people; and being the owner of lands suitable for this purpose situated near the place where several important institutions of learning are about to be permanently located and on which grounds large expenditures, with a view to such a park have already been made, hereby freely give grant and convey unto the said City of Cleveland and its successors, to have and to hold forever, the following described real property, to wit: situate in the City of Cleveland, Cuyahoga County, Ohio, being parts of lots 394 and 395, and being bounded as follows: referring to accompanying map, which is a part of this description and deed.

Commencing at a stone marked on said map by letters M 2; following the center line eastward on Euclid avenue

DOCUMENTS.

and C, to point D, turn an angle of 32½ degrees and 32½ minutes, extend line to the fence line of Euclid avenue, a point on said map; from thence the Wade Park boundary is shown by the outer edge of the fence line, its easterly, northerly and northerly boundaries being defined by the curved lines formed by the fence line, as set forth on said map, on its easterly and northerly boundaries by the east fence line of Doan's survey marked A 2 to A; and on its northerly boundary by the north fence line of Euclid's survey as shown on accompanying map, containing 10 acres, more or less. It being desired to purchase the piece marked on said map as containing about three and one half acres and as shown, is not embraced in this

shall follow the boundary curve from the map, and its easterly and northerly boundaries from, and parallel to said curved

made to the said City of Cleveland for the following purposes and upon the expense, to wit: That the said city shall, at the request of the Park Commissioners and in accordance with the plan to be adopted by the Board of Public Works, approved by me, expend thereon on or before the first day of January 1883 the sum of five thousand dollars, in fitting preparation for the purposes herein named; the same to be hereafter to be kept and maintained in good repair and condition as to make it an eligible place of resort as a Public Park, to be used by the public; the abutting land owners,

their heirs and assigns to have free ingress and egress through the same, subject however to all rules and regulations prescribed by the Park Commissioners; to be used for no other purpose than a Public Park, and to be called and known forever by the name of WADE PARK.

If fencing shall ever be placed on said park grounds, except along the westerly and southerly boundary it shall be open wrought iron fence. I also reserve for myself and my heirs forever to place and maintain a street railroad in and along the avenues forming the easterly and northerly boundaries of said Park, said railroad to be subject to laws and ordinances of the city, and stipulate that the abutting property owners, their heirs and assigns forever may connect with any water pipe the city may place in said Park at the most proper and convenient places, subject however to water rents and regulations prescribed by the city, and may make all necessary drives and walks to connect with said easterly and northerly avenues.

And if the said city shall fail to comply with the aforesaid stipulations for the expediture of seventy-five thousand dollars, or if the grounds aforesaid, or any part thereof shall be peverted or diverted from the public purposes and uses herein expressed, the said property and every part thereof to revert to me or my heirs forever.

And I, the said Sue. M. Wade, wife of said Jephtha H. Wade do hereby remise, release and forever quit-claim all my right of dower in all of said lands unto the said grantee and its successors forever, on the terms and conditions aforesaid.

In witness whereof we have hereunto affixed our hands and seals at Cleveland, in said County, this 15th day of September, 1882.

of the ordinance of acceptance

IN ORDINANCE

Wade Park.

by the City Council of the City
Jeptha H. Wade has given and
Cleveland certain lands for park
conditions set forth in a deed

from the said Jephtha H. Wade to the City of Cleveland, submitted to the City Council for acceptance September 25th, 1882, now therefore,

SEC. 1. Be it ordained by the City Council of the City of Cleveland, that the said deed of Jephtha H. Wade to the City of Cleveland of the lands therein described, be and the same is hereby accepted, subject to the terms and conditions thereof, that the said lands therein conveyed be and the same are hereby dedicated for a public park, the same to be called and known forever by the name of Wade Park.

SEC. 2. That the said Wade Park be and the same is hereby placed under the control and direction of the Park Commissioners, to be by them maintained in accordance with the provisions of the statutes of the State and of the ordinances of the city, and subject to the conditions of said deed of gift.

SEC. 3. That this ordinance shall take effect and be in force from and after its passage.

On November 14th Mr. E. O. Schwagerl was employed by the Board of Commissioners to make a thorough and complete survey of the newly acquired park, and to prepare all necessary maps, plans, etc. Mr. Schwagerl was at the same time appointed Superintendent of Parks, the appointment to take effect January 1st, 1883.

PROSPECTIVE.

From the northern boundary of Wade Park to the southern boundary line of Mr. W. J. Gordon's park Doan Brook winds through a ravine of no inconsiderable natural beauty, which with but very little labor, and comparatively small expenditure, could be made a continuation of Wade Park, adding measurably to its importance in affording a continuous drive-way on the banks of the pretty stream, over four miles in length, and giving to the park an apparent great extent, and in conjunction with Mr. Gordon's park, which is on occasions open to the public, making an uninterrupted park territory from the avenue to the lake. The rough and broken character of the territory referred to, while being peculiarly adapted to the purpose suggested is so far unavailable for other use that the entire strip could, it is believed, be secured, at this time, at small cost. Your Board of Commissioners commend the matter to your consideration. A glance at the map of the eastern portion of the city in which this territory lies, will at once suggest the future possibilities in the direction of a park and lakeside boulevard extending along the entire lake front of the city opening into Euclid avenue, through Wade Park, constituting in its entirety one of the finest drives in the country, if not in the world, an avenue of uninterrupted natural and artificial beauty and magnificence over twelve miles in length. That the project here outlined will be ultimately consummated is believed. The propriety and wisdom of any action in this direction in the immediate future is for your honorable body to determine.

Some preliminary steps have been taken in the City Council during the past year with the view to increasing the park area.

TWENTY-SEVENTH
ANNUAL REPORT
OF THE
BOARD OF
TRUSTEES OF WATER WORKS
TO THE
CITY COUNCIL,
TOGETHER WITH THE
REPORTS OF THE OFFICERS OF THE BOARD,
For the Year 1882,

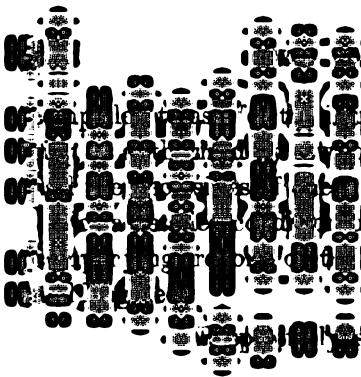

REPORT OF THE
TRUSTEES OF WATER WORKS.

To the Honorable City Council:

The Trustees of Water Works, in compliance with law, submit their report for the year 1882.

The receipts for water, as shown by the Secretary's report, gives a gratifying increase over the previous year, notwithstanding the reduction made by us in the rate for water furnished by measure. The work of the Department for the year consists mainly in the extension of the main and distributing pipe system, of which a large amount was done. Through the concurrent action of your body a portion of the land has been obtained, by purchase, for the site of the proposed lower level reservoir, and legal proceedings have been instituted to procure the remainder of the land for both high and low service reservoirs, as proposed. Therefore, relying upon your assistance in our efforts, we hope during the ensuing season to contract for all of the work contemplated in the enlargement and extension of the works, so as to supply water to the higher portions of the city, and also to construct as much of the same as may be deemed advisable, having in view both the character of the work and necessities of the public, to accomplish which we shall soon be

NO. 1 WORTHINGTON ENGINE.

Continues to give good satisfaction. Six and a half years of of almost constant work has failed to develop any of the defects pointed out by those self-styled mechanical engineers who advertized their ignorance so extensively through the city papers at the time these engines were in course of erection.

NO. 2 WORTHINGTON ENGINES.

At the date of my last annual report No. 2 engine had just been started to see that everything was in working order, previous to putting the walnut lagging upon the cylinders, &c., since that time they have been completed in a manner highly complimentary to the builders, and satisfactory to those in charge. Reference to the tables showing duty of the separate engines will show a duty for these engines much greater than No. 1 has shown. Much of this difference is due to improvements upon the engines, but the greater share can be attributed to the great evaporating power of the boilers attached to this engine.

THE CORNISH ENGINES.

These old patriarchs still occupy a prominent place on our list of machinery. Their days of usefulness, however, are about numbered, unless steps are taken to lower their suction pipes. The reasons for this are clearly set forth in my annual report for 1881, and the practicability of doing it has been carefully considered by your superintendent and myself, in which we agree that it can be successfully done. With this accomplished, many years of valuable service may reasonably be expected. They are in good repair and running whenever the demand will admit.

REMARKS.

Now another safeguard around these circumstances.

My year confirm my opinions, as in 1881, in regard to a new ten ton engine, boiler house, etc. I am gratified in connection with the completion of the works, but as we have the benefits of all these improvements, I would suggest that the works should receive your earliest attention to the reservoir. If the new reservoir is built, the present pumping engine, some time to come, but with the machinery held in reserve of a sufficient quantity of the maximum quantity of

DOCUMENTS.

TO THE HONORABLE MEMBERS OF THE HOUSE OF REPRESENTATIVES,
IN SENATE CHAMBERS, WASHINGTON, D. C., JANUARY 11, 1917.
I have the honor to acknowledge the receipt of your letter of the 10th
inst., in relation to the above-captioned bill, and to inform you that
the same has been passed by the Senate on the 10th inst. by a vote of
83 yeas and 14 nays, and will now go to the President for his
signature. I am, very respectfully,
Yours truly,
C. D. BROWN,
Secretary of the Senate.

**INVENTORY OF MISCELLANEOUS STOCK AND CASTINGS
ON HAND IN OFFICE, BASEMENT, AND YARD,
DECEMBER 31st, 1882.**

2 8-inch Tees.	8 Caulking tools.
2 8 to 4 inch Tees.	5 " " with handles.
4 6 inch tees.	8 Cold chisels.
5 6 to 4 inch tees.	6 " sets.
4 4 inch tees.	2 Monkey wrenches.
2 3 " gas tees.	4 S. wrenches.
1 10 " sprinkler tee.	1 2 ft. square.
2 8 " " "	4 Crowbars.
6 6 " " "	9 Picks.
1 4 " " "	1 Axe.
2 3 " " "	1 Adze.
5 6 inch pipe.	10 Water pails.
1 4 " " "	2 Sledges.
1 3 " " "	1 2 inch augur.
2 8 " $\frac{1}{2}$ bends.	1 Tool bag.
6 8 " $\frac{1}{8}$ "	1 Force pump.
12 6 " $\frac{1}{2}$ "	6 Balls of twine.
6 6 " $\frac{1}{8}$ "	1 8 inch valve screw.
6 4 " $\frac{1}{2}$ "	3 6 inch " "
16 4 " $\frac{1}{8}$ "	4 4 inch " "
2 6 " elbows.	4 3 inch " "
5 10 " sleeves.	10 Lanterns.
10 8 " "	7 Red globes for lanterns.
21 6 " "	5 White globes for lanterns.
13 4 " "	1 Torch lamp.
13 3 " "	2 Mathews hydrant wrenches.
2 12 " clamp sleeves.	1 " hyd't wrench for stuffing box.
6 10 " " "	1 " " " " valve seats.
8 8 " " "	1 Street sprinkler wrench
11 6 " " "	4 Oil cans.
9 4 " " "	1 5 gallon oil can.

7 3 " sleeves.	1 Grindstone.
3 4 to 3 reducers.	1 Hose wrench.
3 6 to 4 "	1 Die for Manning hydrant.
1 10 to 6 "	1 Chain for Mathews hydrant.
6 6 inch reversed curves.	6 Center covers for cylinder valve box.
2 4 " " "	1 Large S. wrench.
12 4 " Mathews' hydrants.	5 lbs of yarn.
1 6 " " "	4 Derrick handles.
1 4 " " " (old)	8 Wheelbarrows.
36 3 " Manning hydrants.	1 Folding derrick.
7 Set of No. 1 V. box plates.	2 sets of differential blocks and chain.
4 " of No. 2 " " "	1 30 inch wrench.
11 " of No. 3 " " "	1 16 inch lever wrench.
4 " of No. 4 " " "	1 6 " " "
31 Top frames for valve boxes.	4 6 " wrenches.
13 Extra top frames for valve boxes.	2 3 " "
15 Valve box covers.	1 4 " "
17 Bottom frames for V. boxes.	1 3 " stop cock wrench.
12 6 inch head sockets.	1 Hydrant claw wrench
18 6 " Cylinder V. box covers.	1 Globe valve wrench.
6 4 " " " " "	1 Air cock "
6 Furnaces.	1 Pet. cock wrench.
4 Lead pots.	2 Ice bars.
1 10 inch valve. (old)	1 Pair grappling tongs.
1 6 inch valve, (new)	4 Yards duck cloth.
5 4 inch valves. (old valves)	1 Combination vise with movable jaws.
11 3 inch valves. " "	25 lbs of white lead.
7 3 inch valves with goose necks.	2 pair of scales.
6 Sprinkler covers.	12 bbl. of cement.
1 Hand saw.	1 Large step ladder.
1 Hatchet.	1 Garden rake.
1 Draw shave.	1 Hoe.
1 Jack-plane.	1 Trowel.
1 Wood-chisel.	9 6 inch wood plugs.
1 Brace and bits from 1/4 in. to 1 1/4 in.	2 8 " " "
3 lbs of brass and copper wire.	2 Tons brass scrap.
2 Screw drivers.	4 " lead.
1 Gimlet.	1 Ton hard coal.

2 Pair of shears.	3 Brass pumps.
1 Scratch awl.	5 Chains.
1 Oil stone.	3 Tunneling shovels.
1 File brush.	1 Spoon shovel.
1 Pair compasses.	2 Mauls.
1 " callipers.	1 Solder pot and ladle.
2 Countersinks.	1 Pair timber grappling hooks.
1 2 inch tap.	1 Screw for 30 inch valve.
1 Claw hammer.	1 2 inch Chapman valve.
4 Caulking hammers.	

METER STOCK.

36 ¾ inch tees.	4 1¼ to 2 inch reducers.
43 ¾ inch sockets.	8 1 " " " " "
18 ¾ inch elbows.	10 ½ " " " " "
26 ¾ inch street elbows.	4 ¾ " ratchets, with center plates.
56 1 inch sockets.	4 1 " " " " "
7 1 inch street elbows.	6 1½ " " " " "
9 1 inch elbows.	3 2 " " " " "

1 30 " " 2 " 11 " "	1 Large derrick for pipe laying.
1 30 " " 2 " 6 " "	

INVENTORY OF MISCELLANEOUS ARTICLES AND MA-
TERIALS AT OFFICE, DEC. 31st, 1882.

5 Desks.	2 Office counters and fixtures.
5 Tables.	2 " partitions.
1 Safe.	1 Marble front grate.
1 Case for books and blanks.	1 Wash-bowl with marble base and splatter board.
1 Clock.	2 Large chandeliers.
7 Pictures and frames.	1 T " "
50 Yards carpet.	3 Drop lights.
50 " lineoleum.	8 Single bracket lights.
3 Stools.	1 Letter scale.
1 Barometer.	1 Level.
4 Large maps.	1 Transit.
3 Service pipe record books.	1 Level rod.
2 Books for pipe records and Eng. duty.	2 Pickets.
1 Record book of pipe in different wards	1 100 feet chains.
1 Abstract book.	4 Waste paper baskets.
1 Cupboard for papers and reports,	Maps, plans of machinery boilers and and buildings.
books, cash ledger, transfer and permit books.	8 Drawing boards.
2 Bureau of drawings.	1 base burner stove.
1 Large drawing table.	

ENGINE HOUSE INVENTORY DECEMBER, 31st, 1882.

1 pair 6 inch blocks.	5 Iron dampers for Cornish boilers.
2 17 inch single blocks.	2 Gas-lighters.
1 14 " double blocks.	1 1½ inch gauge.
8 14 " " "	1 Square.
4 10 " " "	1 Grindstone.
2 Large iron blocks.	1 Screw-feed drill.
19 Fathoms 3 inch rope.	1 Breast "
26 " 3 " "	1 Oil-stone.
9 " 2½ " "	1 Brace and bits.
39 " 4½ " "	2 Hand-vises.
15 " 4½ " "	1 Bench-vise.
16 " 3½ " "	1 Large portable vise.
66 " 6 " "	1 2 inch lifting-screw with pall.
122 Pieces matched lumber.	1 Portable forgè.
2 Dumping coal cars.	4 Pairs blacksmith tongs.
6 Slates.	4 Sledges.
4 Derricks.	3 Hammers.
1 Scoop.	1 Blacksmiths' Hammer.
5 Gate valve wrenches.	1 ¼ inch set figures.
2 Valve-screws, for Cornish Eng.	3 Copper hammers.
1 Piston-rod clamp, " "	1 Steelyard—2,000 lbs.
2 Cant hooks.	1 Platform scales.
1 Cross-cut saw.	1 Counter.
3 Ladles.	1 Portable engine and boiler.
24 Sections of aqueduct gates.	1 Centrifugal pump and pipes.
1 Lawn-mower.	5 Monkey-wrenches.
1 Rake.	3 Pairs gas-tongs.
1 Scythe.	4 Claw wrenches.
1 Sickle.	23 Socket wrenches.
175 Fire brick.	20 pairs eye-bolts.
1½ bbls. Fire clay.	2 Key wrenches.
1 Extra 2 inch valve.	8 Top "
1 4 inch angle iron.	1 Stock and 2 sett dies.
4 Pieces of "I" beam.	1 Combination gas pipe cutter.

1 Blank flange for 12 inch steam pipe.	4 gas taps.
1 Hair brush.	1 Stock and 4 pair dies.
Hand-lamps.	1 Extra steam gauge.
1 Pall drill and bits.	1 Blank flange for sand pipe.
5 Fire shovels.	1 Belt punch.
1 Broom.	1 Pair calippers.
2 Extra pressure gauges.	1 Draw knife.
1 bbl. of lime.	5 Caulking tools.
3 Crow bars.	1 Set of old Worthington pump valves and springs.
20 Bolts 20 inches long.	64 Extra valve weights.
4 Extra valves for Cameron pump.	19 Augers from crib.
25 Water gauge glasses.	4 Coal barrows.
1 Screen Fall.	4 Dirt barrows.
3 Piston rings (old) Cuyahoga engine.	4 Step ladders.
5 Balls Lamp wick.	3 Common ladders in fire-room.
1 Bulletin board.	4 " " in engine-room.
200 lbs. cotton waste.	2 Hose nozzles.
500 tons of slack coal (estimate.)	10 lbs Square rubber packing.
4 Record books.	3 lbs Round " "
1 Account book.	4 1/2 Yards of sheet rubber.
1 Book slate.	2 Dust pans.
1 Looking-glass.	5 Cape chisels.
1 Hat-rack.	8 Flat chisels.
200 Copper washers 7/8 in. x 3/4 in.	2 Set screws.
3 Writing desks and stand.	1 Lounge.
2 Tables with drawers.	1 Face board.
3 Arm-chairs.	4 Spittoons.
8 Common chairs.	6 Water-buckets.
4 Common tables.	2 Watch-falls.
1 Bookcase with drawers.	15 Extra stair stop plates.
3 Tool cupboards.	5 " Fuel valves.
1 Indicator—complete.	1 Check valve, Cornish pump.
2 Thermometers.	7 Deck plates for boilers.
1 Barometer.	1 flue cleaner, gas pipe.
1 Carpenters' work bench.	3 Pieces of 3 inch gas pipe, 4 ft. long.
1 Jack plane.	50 Piston springs (old).
1 Smooth plane.	

1 Hand axe	2 Floor-plates.
1 Hand saw.	1½ bbl. black paint.

**EXTRACT FROM REGULAR MEETING OF THE
BOARD HELD FEBRUARY 28, 1883.**

“The Secretary submitted copies of Annual Report of Police Department.

“*Ordered*, That two hundred and fifty copies of same be printed and bound.”

By order of the Board,

THOMAS KING,
Secretary.

ELEVENTH ANNUAL REPORT
OF THE
BOARD OF POLICE COMMISSIONERS
OF THE
CITY OF CLEVELAND.

OFFICE BOARD OF POLICE COMMISSIONERS, }
CLEVELAND, January 1, 1883. }

To the Honorable City Council of Cleveland, O.:

In accordance with an act of the General Assembly of Ohio, passed March 17, 1876, the Board of Police Commissioners have the honor of submitting their eleventh annual report, showing the present condition of the Department with the number of arrests made during the year. Nature of the crimes committed. Nativity, occupation, age, social condition of persons arrested, disposition made of them by the Police Court, census, tables and such other statistics regarding the condition of the Department as may be of interest to your Honorable Body and the people of the city.

THE BOARD.

Since the last Report there has been one change in the *personnel* of the Board. The time of Commissioner Sprankle having expired, the citizens at the last Spring election elected A. B. Halliwell to fill the place formerly occupied by Commissioner Sprankle.

The Board at present is made up by the following citizens:

	Term Expires
R. R. HERRICK, <i>Mayor and President,</i>	1888
GEO. W. SHORT,	1883

Total.....	<u>\$30,811 53</u>

A word as to the statistical report for the year past may not be out of the way.

There have been ten hundred and eighty-eight written reports of stolen property investigated, and compared with the reports from the pawnbrokers, the number of the latter reaching three thousand, the number of letters, postal cards, circulars and dispatches, which have been attended to for persons from abroad, aggregate thirteen hundred and thirty-six. This may seem like manifesting a greater interest in the welfare of outsiders than we do for the citizens of our own city. We are under obligation to do this work, from the fact, that, we are continually asking favors from the officers of other cities, for which we feel in duty bound to return our most sincere thanks for the courtesies extended to us by the members of the Detective Departments with whom we have done business during the year past.

There has also during the year been a large number of calls for detectives at residences and business places, which upon investigation proved of an advisory nature in criminal

cases, or of private affairs, which precludes us from reporting them for public record.

The work alluded to above, together with the time occupied by the detectives in the several courts, has taken the time and attention, at least of three operatives almost exclusively. At times several detectives have been out of the city as witnesses in criminal cases or in pursuit of fugitives from justice; therefore, instead of having eight men to watch the resort of thieves, and keep track of notorious criminals, we have only three, as my time is occupied principally in doing office work, and detective Schroeder has not time to attend to much general detective duty, on account of being closely confined at the Union depot as emigrant officer.

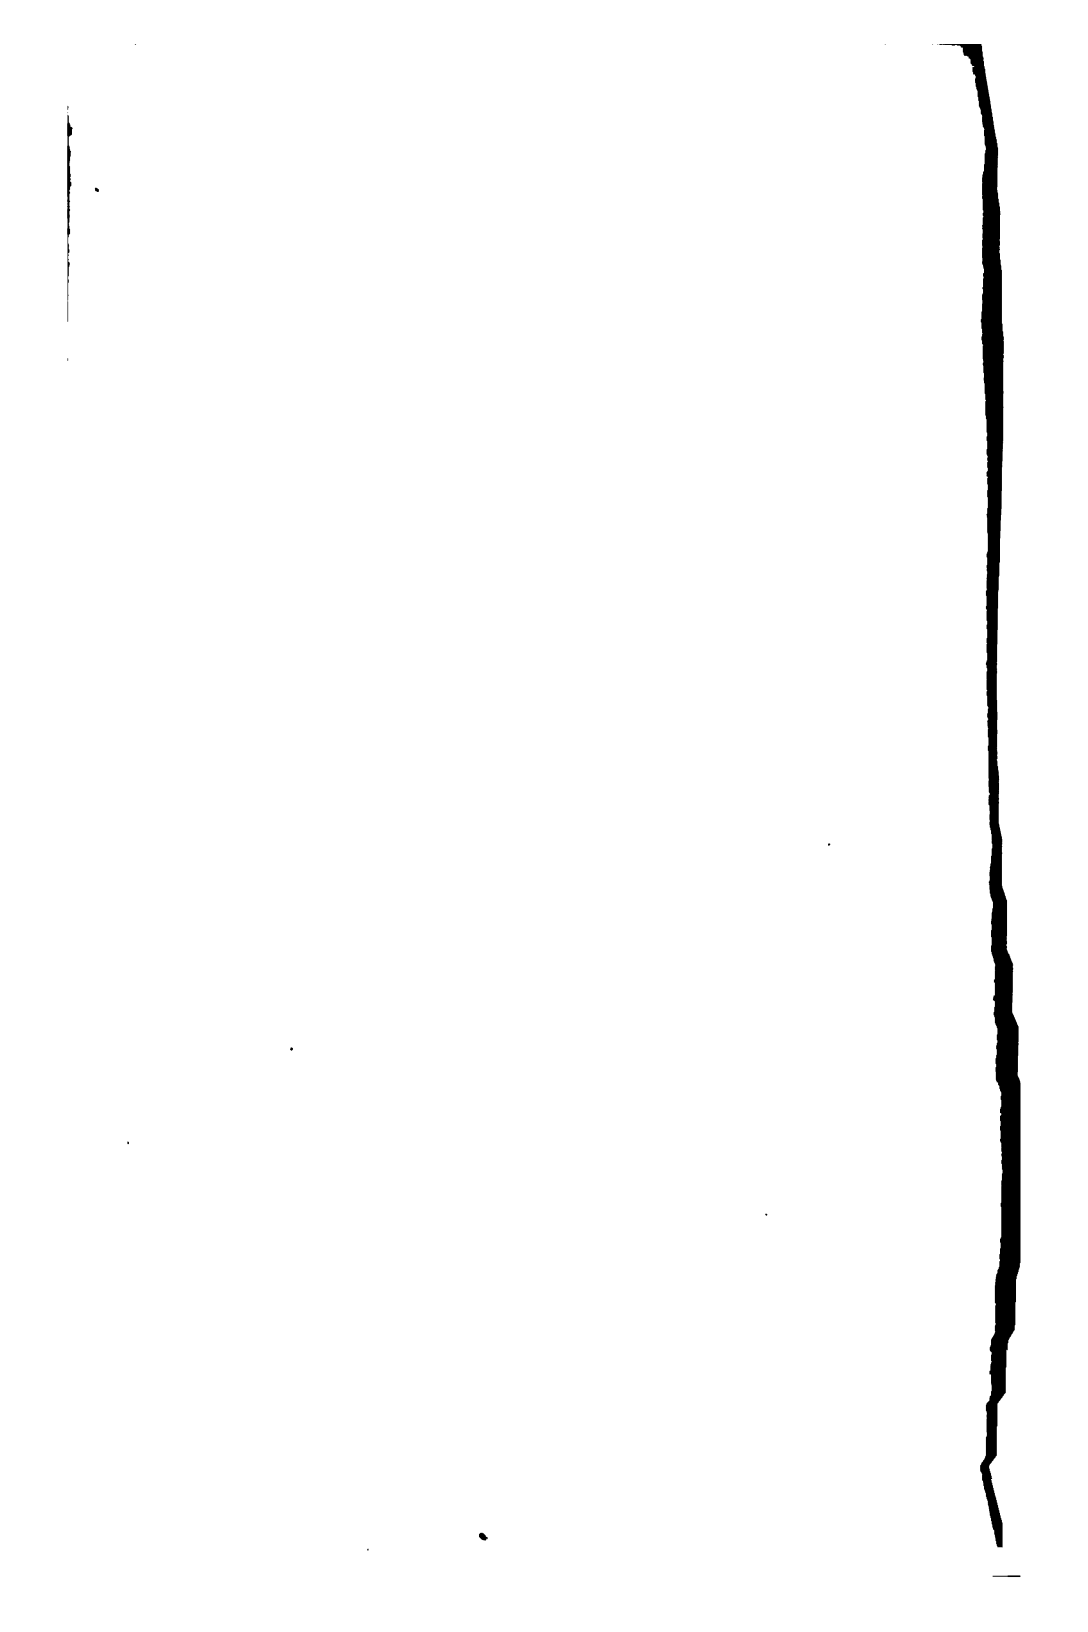

On account of the large increase of population, and consequent addition to our duties necessitating frequent visits to extreme localities, it is highly necessary that some means of rapid conveyance be furnished, and I would most respectfully suggest that a horse and carriage be provided for the detectives' exclusive use on each side of the river.

Hereto annexed please find report of Detective Schroeder, emigrant officer.

Respectfully submitted,

H. M. HOLZWORTH,
Captain of Detectives.

REPORT OF
EMIGRANT OFFICER.

REPORT OF
EMIGRANT OFFICER.

J. W. Schmitt, Sup't of Police:

DEAR SIR:—During the year ending December 31, 1882, 73,118 emigrants passed through this city, of whom 62,058 came via the L. S. & M. S. in 1,259 cars, 7,556 via N. Y., P. & O., and 3,504 via C. & P. R. R.

Nine thousand two hundred and seventy-two emigrants settled in the city from different nations, as follows: Germans, 4,510; Bohemians, 1,896; Irish, 1,010; English, 828; Hungarians, 817; Italians, 60; Swedes, 76, and Hollanders, 75.

Thirty-nine families arrived here without means and without relatives or friends. They were given work on farms in different places—Conneaut, Wickliffe, Medina, Amherst, etc.

Sixty-four and twenty-eight hundredths dollars was spent for bread and cheese.

A Polish girl arrived here who had an address for Cambridge, Massachusetts, and was given a ticket to Cleveland by mistake. She was given a pass to New York, via Pennsylvania railroad.

Julius Nasc, a German emigrant, and his family bought their tickets for Grand Rapids, Wisconsin, at Castle Garden, and had them stolen from him on the N. Y. C. & H. R. R. R.,

arriving here without any means. Through the kindness of Mr. J. W. Cary he was sent free to Grand Rapids, where he had friends.

Two emigrant children died at the Union Depot and were buried by Hogan & Harris, otherwise there were no deaths or contagious diseases among the emigrants that passed through the city ; also, I have the pleasure of reporting to you that no emigrants were swindled while passing through the city.

The following tables show in detail the emigrant statistics by months.

FINANCIAL STATEMENTS.

18
19
20

1818

FINANCIAL.

In comparison with past years the finances of this Department are shown to have been well managed. On January 1st we had one hundred and sixty-three men, while on December 31st we have one hundred and seventy-five, an increase of twelve during the year. The pay roll for 1882 is based on an increase over 1881 of about ten per cent. for patrolmen.

Total for 1882 :

Salaries of the force, - - - - -	\$139,722 35
“ “ “ specials, - - - - -	1,484 00
Miscellaneous expenses, - - - - -	6,832 75
Total, - - - - -	<u>\$148,039 10</u>

or about Twenty Thousand Dollars less than in 1875.

The tax levy for 1883 of 1 17-20 mills, the balance now on hand, with what may reasonably be expected from dog licences and music permits, will be sufficient to meet the ordinary expenses of the Department, with the present force, but no addition can be made.

PENSION FUNDS.

In April, 1881, the Legislature passed an act establishing what is known as the Police Pension Fund. On May 1, 1881, this fund started with a credit of \$3,980.58, and on December 31, 1882, it has a credit of \$10,348.42. The net gain during the year 1882 has been \$4,017.55, with all claims paid. This fund does not come from tax payers to any great extent, but from that class who pay but little or no taxes but manage to get arrested often.

CITY DOCUMENTS.

POLICE COURT FUND.

This fund has been during the entire year expected. The Board have been able to purchase two new Station Houses, make a large addition and at close of year have a balance of \$1,000 of this fund in City Treasury.

CONTINGENT FUND.

On January 1st had a credit of \$7,224.44. The balance on March 31 were \$3,653.50. Expenses, \$4,079.60 on December 31, \$6,798.36; a loss of \$426.08 on June and July, during the strike in 1881, \$1,893.26 was paid from this fund for extra fare and dinners for extra police on duty, otherwise this fund would have made a balance which is all that can be expected under the circumstances. The Pension Fund now receives a handsome amount of moneys that prior to May, 1881, went to the Contingent Fund. Under ordinary circumstances this fund will show a small increase each year.

The Board have purchased ten thousand dollars worth of bonds, Five Thousand for Pension Fund and five thousand for Contingent Fund, all of which was purchased at less than was paid for them, as Cleveland bonds are at par.

CLOTH ACCOUNT.

The purchase of uniforms to members of the force proves to be a heavy item. During 1881 we furnished 149 men with uniforms, hats, dress coats, blouses, vests and pants, for cloth, \$1,358.01; for cutting, trimming, \$1,236.70—total, \$2,594.71, an average of \$17.42 per man. During 1882 we have furnished 159 men with uniforms for cloth of \$1,388.53; cutting, trimming

and making of \$1,177.50—total, \$2,566.03, an average of \$16.14 for each man.

The agent's price for cloth in 1882 has been the same as in 1881, but our contract for cutting, trimming and making has been a trifle less. We make a gain by the transaction—in 1881, \$79.66; in 1882, \$69.66.

Our cloth is all purchased direct from the agents, Sullivan, Vail & Co, 329 Broadway, New York, at net cash prices, and by this means we are able to clothe our men as well as any force in the United States, and at a prices as low as the lowest.

take a just pride in commending this
 following statistical tables to the considera-
 tion of the City Council and citizens generally,
 as a fair and impartial will convince all that the affairs of
 the Department for its charge have been faithfully and
 honestly administered.

in order of the Board,

THOMAS KING, *Secretary.*

POLICE PENSION LAW OF CLEVELAND, O.

AN ACT

To amend sections 1941, 1945, 1946, and 1947 of the Revised Statutes of Ohio.

SECTION 1, *Be it enacted by the General Assembly of the State of Ohio*, That sections 1941, 1945, 1946, and 1947 of the Revised Statutes be amended to read as follows :

Section 1941. All moneys collected by the the police court of such city on account of the service by the police force of writs issued by such court shall be paid to the Board of Police, and such moneys, together with the moneys received by the Board from all sources whatever, the disposition of which is not otherwise provided for by this subdivision, shall constitute a fund, to be called the contingent fund, out of which shall be paid all incidentals or extraordinary expenses incurred by the Board, and the payment of which is not otherwise provided for by subdivision 2, chapter 5, division 5, title XII, of the Revised Statutes of Ohio. In cities of the second grade, class-first, two-thirds of all moneys collected by the police court as aforesaid, together with two-thirds of the moneys received by the Board from all sources whatever, as aforesaid, shall constitute the contingent fund, out of which payment shall be made, as above provided.

Section 1945. Fifteen per cent. of all rewards, fees, proceeds of gifts, emoluments that may be allowed by the Board of Police to be paid, or given on account of extraordinary services of a member of the police force, all unclaimed money, the proceeds arising from the sale of unclaimed property, and one-third of the moneys received by the board from all sources whatever, the disposition of which is not otherwise provided for by subdivision 2, chapter 5, division 5, title XII of the Revised Statutes of Ohio, one-third of all moneys collect-

CITY DOCUMENTS.

on account of the service by the police
by such court, and whenever the name
force appears as prosecuting witness
court, such witness shall be entitled to
day, which shall be charged by the
costs, and collected of defendant in case
of other witnesses, all witness
of the force in the criminal court of
such fees when collected, and all fines
of Police upon members of the force
shall be paid into the city treasury,
money now in the "police life and
fund" which is hereby transferred for that
purpose to constitute the "police pension fund," and
from time to time, constitute the Board of
Trustees of the city, and two members of the
Board to be elected by the members of said force on
the first of January of each year, except the first
election shall take place within thirty (30) days from
the date hereof, and are hereby declared trustees of such
fund, and the President of said Board shall be the
President of the Board of Trustees hereby created, and the
President of the Police Force shall be the Secretary of
said Board, and it is hereby made the duty of said
Board to keep a record of the proceeding of said Board of
Trustees, and on taken by it with regard to said fund,
and the members of said police force, as herein
provided, shall have power to draw such fund
under the warrant of the President, counter-
signed by the Secretary, and may invest the same in inter-
est-bearing securities in the United States, the State of Ohio and
any city or town in the State of Ohio, and have power to draw the same
for that purpose, and shall make report to

the city council of the condition of the fund on the first day of January of each year.

Section 1946. When a member of the police force has become disabled while in the active performance of official duty, or has performed faithful service as a member of such force for a period of not less than fifteen (15) consecutive years since May 1, 1866, he may, by a majority vote of all the members of the Board of Police Commissioners, be retired from active service and placed upon the pension roll, and when so retired, shall be paid from the fund provided for in the preceding section a pension of five hundred dollars a year in equal monthly payments. If at any time there should not be sufficient money to the credit of the police pension fund to pay all claims against it in full, claims on account of the death of members of the force, if there be any such, shall be first paid in full, and with as little delay as possible, after which an equal percentage shall be paid upon all other claims to the full extent of the fund on hand, and shall be accepted as a payment in full by the claimants. No member of the force shall be placed on the pension roll unless the health officer or police surgeon shall certify in writing that he is permanently incapacitated, either mentally or physically, from performing his official duties, nor unless due notice is given him by the Board of its intention to retire him. Officers on the retired list shall be subject to the orders of the Board of Police Commissioners. The Board of Police Commissioners may order them to be re-examined by the health officer or police surgeon, and if reported capable of performing active duty, may return them to regular duty. Officers on the retired list may be brought before the board of police commissioners for trial on charges, and shall be subject to the same penalties as officers in active service. Should an officer on the retired list be dismissed by the board of police commissioners, he shall forfeit all further

H. B. No. 476.

AN ACT

To amend sections 1929, 1930, 1932, 1934 and 1939 of the Revised Statutes of Ohio.

SECTION 1. *Be it enacted by the General Assembly of the State of Ohio*, That sections 1929, 1930, 1932, 1934 and 1939 of the Revised Statutes of Ohio be so amended as to read as follows :

SEC. 1929. The Board shall have power at any time to appoint a superintendent of the police force, a deputy superintendent of police, a captain of police, and an additional captain for each fifty patrolmen more than the first fifty, a lieutenant of the police for each twelve patrolmen, and a sergeant of police for each police precinct, and also regular or compensated patrolmen, not exceeding one for each seven hundred and fifty inhabitants; but the number of patrolmen may be increased with the consent of the Council, and the Board shall have power to appoint patrolmen on probation and discharge them at any time within six months from the date of appointment; provided that, if demanded by such patrolman, the cause of his discharge shall be assigned him by the Board in writing; and the Board shall have the power, in cases of emergency, to appoint as many special patrolmen as it may think proper, which appointments shall be reported to and be subject to the action of the City Council at its next meeting.

SEC. 1930. The Board may, from the members of the force, appoint detectives, not exceeding ten in number, who shall act as secret police or detectives, one of whom shall be detailed as chief detective, bearing the rank of captain; and

CITY DOCUMENTS.

When a vacancy exists in the number so
the Board may appoint to such vacancy the
record required to be kept, as herein.
to be the most meritorious, and the
when they deem it for the greater
relieve any of said detectives from
assign them to such position and service
deem advisable, and change their pay
rank or grade assigned them; provided
change or removal shall be made except
on a public hearing and on due no-
tices to be promulgated by the Board;
also appoint such suitable persons to act
as attorneys of police, police surgeon, and
as telephone operators as the demands of the
city who shall receive such compensation as
the Board may determine, in no case however exceeding
the amount herein provided.

The members of the police court shall be directed
to execute all process and orders of the
police court of police, and shall be executed by
the Board, and the Board shall have the power to
appoint such persons as may be necessary to attend
to the order and execute all process and or-
ders of the court, and such persons shall be the spe-
cial superintendent of the police.

The Board shall have the entire control of
the city, possess full power and authority
to organize, government appointments and
to the city; have the custody and control of
books, records, and equipments belong-
ing to the department and have power to erect and
maintain all such equipments for the rapid

transit of police from one point to another in such places within the city as for purposes of police the Board deems necessary, whenever the Council authorize the establishment of such telegraph line or lines or other means of communication, or the procuring of said equipments and provides for the cost thereof; provided the Board may use for such purposes the police court funds, subject to the conditions and restrictions contained in section 1959 of the Revised Statutes.

SEC. 1934. The Board of Police and the force hereby constituted shall, at all hours of the day and night, within the boundaries of the city and as far as the Board may deem necessary for the welfare of the city within the county, preserve the public peace, prevent crime, arrest offenders, protect rights of persons and property, guard the public health, preserve order, remove nuisances existing in the streets, roads, places and highways, report all leaks or other defects in water pipes and sewers to the proper authorities, provide a proper force at every fire in order that thereby the firemen and property may be protected, protect strangers and travelers at steamboat and ship landings and railway stations, and generally obey and enforce all ordinances of the City Council, criminal laws of the State, and of the United States.

SEC. 1939. The superintendent shall receive a salary not exceeding twenty-five hundred dollars per annum, the deputy superintendent shall receive a salary not exceeding two thousand dollars per annum, each captain shall receive a salary not exceeding fifteen hundred dollars per annum, each lieutenant and detective to receive a salary not exceeding twelve hundred dollars per annum, each sergeant a salary not exceeding one thousand dollars per annum, and each patrolman a salary not exceeding nine hundred dollars per annum; provided the Board shall have power to detail one or more patrolmen to the Superintendent of Police or Secre-

CITY DOCUMENTS.

who shall receive a salary not exceeding
\$1,000 per annum; the pay in all cases to be
paid monthly and the salaries to be paid monthly to
be paid thereto; provided, further, the Board
shall not more than two women to be detailed
from the force to perform such duties as may be as-
signed to them by the Board, the appointment and salaries of
such women to be governed by the rules and regulations
of the Board, the appointment and salary of the doormen of the

and the original sections 1929, 1930, 1932,
and 1933, hereby repealed.

This act shall be in force from and after its

Tenth annual report of the Secretary of the Board of Health for the year ending December 31st, 1882. Approved by the Board at its session April 13th, 1883, and the Health officer was instructed to forward the same to the City Council, with a request that it be printed.

By order of the Board.

R. R. HERRICK,
President.

W. H. FARRAND, *Secretary.*

GEO. C. ASHMUN, M. D.
Health Officer.

ANNUAL REPORT
OF THE
HEALTH OFFICER.

Honorable Board of Health:

GENTLEMEN,—According to returns made to the Secretary of the Board, there were three thousand five hundred and sixty-three (3,563) deaths in this city, during the year 1882, During the year previous, there were three thousand seven hundred and twenty-seven (3,727). Exhibiting a death-rate per thousand of the population (189,000) of 18.85. Of this number, ten hundred and twenty-five (1,025) were of children under one year of age; a percentage of the whole number of deaths, of 28.61. Of those under five years of age, there were sixteen hundred and forty; a percentage of the whole of 46.02.

Among the causes of death which have special interest, there were returned those occurring from small-pox, 8; diphtheria, 208; croup, 105; scarlet fever, 74; typhoid fever, 119; diarrhoeal diseases, 433; consumption, 312; acute lung diseases, 275; deaths by violence, 139.

BIRTHS.

The number of births reported for the year, was five thousand five hundred and twelve (5,512); an excess of births over deaths of nineteen hundred and forty-nine (1,949). The largest number of births in any month was returned

for December, five hundred and fifty-seven (557); and the smallest number for June, three hundred and seventy-five. The returns show a birth-rate per thousand, of the entire population, of 29.16+. (The number of births reported for the preceding year was five thousand one hundred and fifty-two (5,152), an increase for 1882 of three hundred and sixty-one (361).

In regard to the returns made to the Secretary, it is certain that those of deaths are much more complete than those of births. The several checks upon the removal and burial of bodies, after death, secures a more faithful compliance with the ordinance, in this respect, than in regard to births. And while this is true in regard to the number of deaths, the returns in regard to "causes of death," cannot be considered very reliable. Difference in opinion, and difference in the use of terms to describe similar conditions, together with errors from ignorance and want of care, must always render returns obtained through such channels of comparatively little worth. While in respect to returns of births, it is more than probable that quite a large percentage are never reported. The physicians and midwives, from whom such reports are required, appear to be quite generally impressed with the feeling that to them, and the community, it is profitless service. It is certainly creditable to them, that with such a feeling they so promptly prepare and forward the reports required.

In regard to the infectious diseases which have prevailed to some extent during the year, none have become epidemic. Thirty-four cases of small-pox, modified and unmodified, occurred in various parts of the city. In no instance did it spread from the premises in which it was found. And in nearly every instance, the source from whence it came could be determined. The proportion of deaths from this disease

was one in four of all the cases. The deaths, with one exception, were among those not even nominally vaccinated. No case has occurred since August.

The system of placarding houses in which there were cases of diphtheria and scarlet fever, has been continued with a fair degree of efficiency. As knowledge of such cases comes from the attending physician, and as diagnosis may be slowly reached, it has often occurred that "placarding" has been delayed to a stage of great danger. And, although it is scarcely demonstrable what good, if any, has been accomplished by this system, one effect has been observed, i.e., the improved efforts and courage on the part of physicians, nurses, and friends, to insist on more complete isolation of the affected—that the scope and efficiency of truly preventive measures, in this class of diseases, can certainly be increased. There is reason to believe that few physicians appreciate the necessity for careful instructions to their patrons in regard to the manner and means by which such diseases originate and spread. In all of those diseases which are spread by the conveyance of poisonous matters from individual to individual, the necessity for rigid isolation of the affected is apparent, and will certainly prevent a spread of scarlet fever, measles, whooping cough, mumps, etc.

The total number of cases reported during the year; of diphtheria, 837; scarlet fever, 516; small pox, 34; typhoid fever, 56.

It will be observed from the figures already quoted that there were many more deaths reported from typhoid fever than all of the cases! And, while it is thus shown that such cases have not been fully reported, there is good reason to believe that many more cases of diphtheria were reported than actually occurred. In several instances cases of scarlet fever and diphtheria have been reported one day, to be declared convalescent the next by the same physician.

An interesting feature, in a local point of view, is presented by the fact that some parts of the city have been almost exempt from infectious diseases during the year. For example, in the Eighth ward no deaths were reported as occurring from diphtheria, and but few from typhoid fever. The entire central portion of the city was markedly free from these two diseases, while in the outlying wards deaths from these two diseases have been common. A comparison of wards which have been so nearly free with those in which these diseases occurred, in regard to habitations, habits of life, occupation, condition of soil, or relation to other parts of the city has failed to afford light upon the causes of the difference.

MEDICAL CARE OF THE SICK POOR.

The medical care of the sick poor, by district physicians, has been continued. The total number of cases treated by them, belonging to this class, was two thousand and ninety-five (2,095). For this purpose four thousand six hundred and ninety-nine (4,699) visits were made, and six thousand four hundred and ninety (6,490) prescriptions given when no visits were required. Free vaccination was performed upon nineteen hundred and seventy-two (1,972) persons (see table annexed). Medicines have been furnished by the district physician, except in cases of syphilis and consumption, which have been supplied upon the order of the physician, from this department.

The physicians employed by the Board for this purpose have had few complaints made against them, from a very generally complaining class, and there is reason to believe that much relief has been given by them.

SANITARY FORCE.

The Sanitary force has remained unchanged during the year. Nine patrolmen have been employed throughout the year. They have served notices to the number of twenty-one thousand and sixteen, in the aggregate. These "notices" are exclusive of verbal orders, and refer to all varieties of offenses against cleanliness, healthful conditions, and purity of air, water and food.

The service of the patrolmen has, in general, been faithfully rendered, with circumspection and care. Their experience, acquired in service, has enabled them to perform more efficient work during the year than ever before. This has led to fewer complaints from citizens, and an increased respect for the officers and Department.

There can be no question that Sanitary patrolmen, as well as other officers performing police duty, are most efficient when secure in their positions, so long as their work is well done. For this reason, I would recommend that measures be taken to make such appointments permanent, with dismissal impossible, except for cause.

CONTRACTORS.

The contractors employed and under the supervision of this Department, for the removal of night soil, dead animals, and swill and garbage, have given but little cause for complaint. This is especially true of the first named. In regard to the removal of swill and garbage, it will be remembered that the service, in its present form, is new, commencing during the year. Nearly fourteen hundred families, hotels, and restorants have been more or less satisfactorily served. The chief hindrances to this branch of work have arisen from want of care on the part of citizens to place such waste in proper vessels and convenient places; and the employment by the contractors of men not intelligent or

disciplined enough to follow the route given them. The system of serving only those on a street who request such service, or who are forced to receive it, involves a care on the part of gatherers which is not easily attained. If each street within certain boundaries was to be thoroughly patrolled by the scavenger's wagon, at regular intervals, much annoyance would be saved. And the clause of the present contract under which the contractor (in case of failure) is to receive thirty-six hours' notice before any one else can be employed to do the work, might better be left out, so that immediate relief could be furnished in case such failure occurs. The rapid decomposition of such substances, renders prompt removal necessary.

REVIEW.

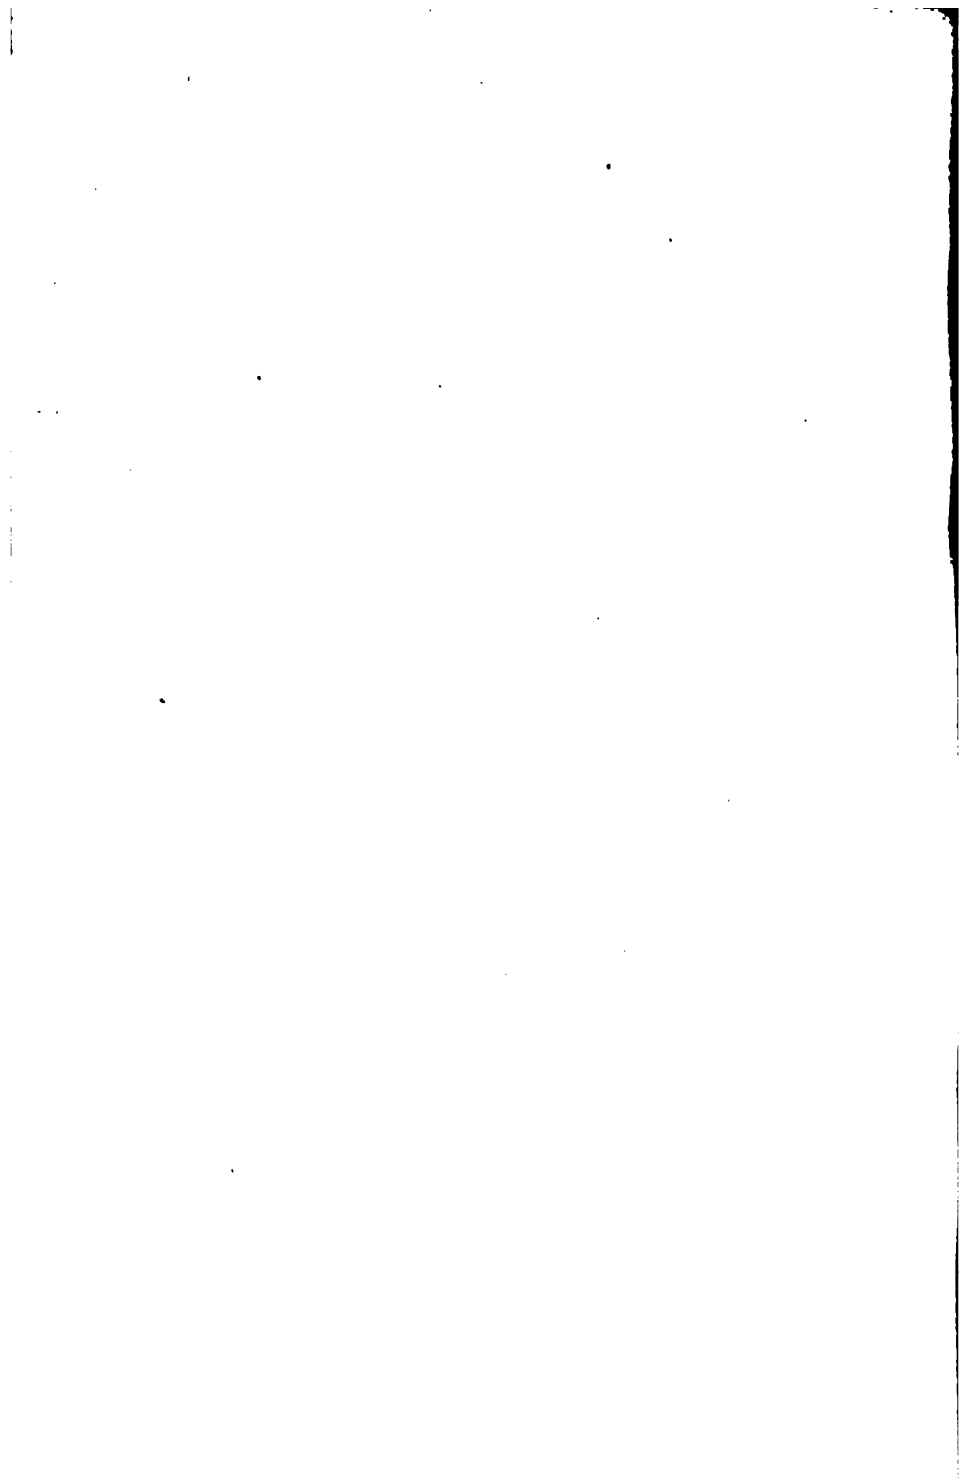

Notwithstanding the great changes made throughout the city during the year, in building, laying of pavements, sewers, and water pipe, no especial ill effects have been observed from soil exposure. The replacing of wood with stone for pavement, and the improved drainage by sewers in unpaved streets, has certainly improved the sanitary prospects of the city. And the fear that such changes involved increased sickness along the streets where they were made, did not prove true. In this connection, permit me to call your especial attention to the recommendations of the Sewer Inspector in regard to improved sewer ventilation. With all the skill of faithful and intelligent workmen, the effects of sewer air in buildings are still observable, and all possible precautions, in addition, are to be commended. And there appears to be no reason to doubt the utility of perforated covers for all street openings into sewers in lessening the danger from this source.

I would also call your attention again to the need of employing some person, whose entire time should be given to

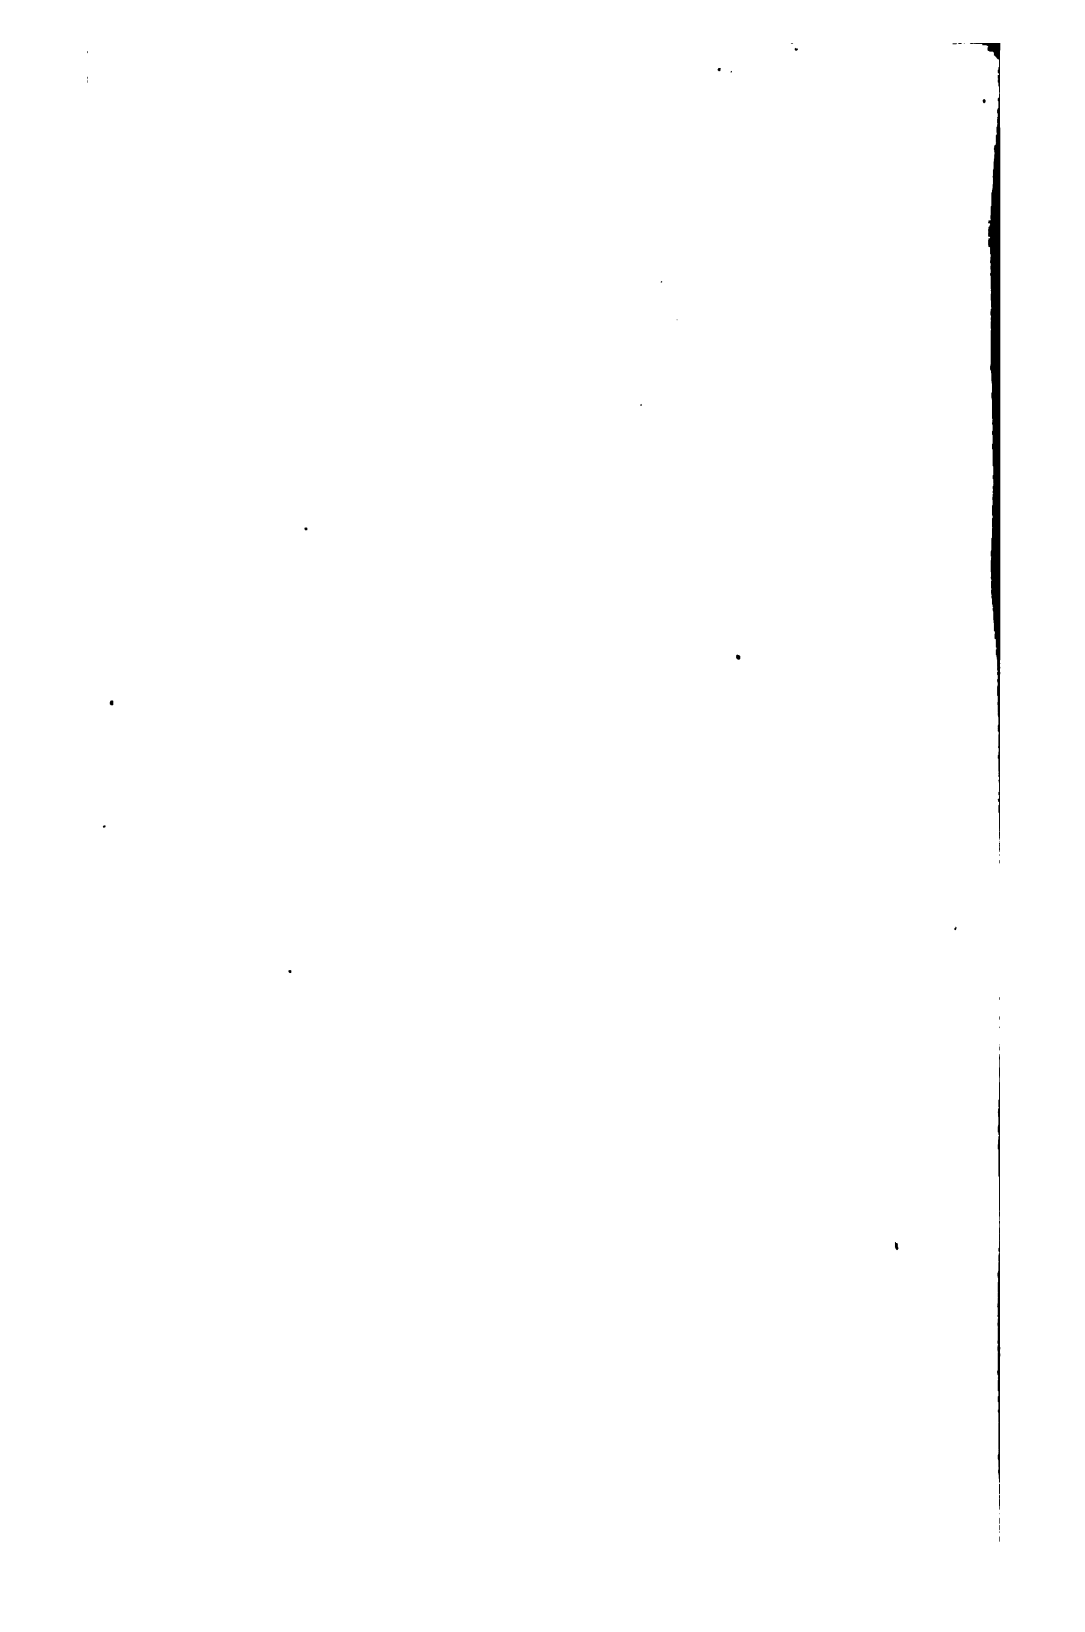

the inspection of food substances. Adulteration of these substances is now so common and easy, that only by constant inspection can the public be protected in their use. Such inspection can be made only by a person educated and skilled to detect. The number of such substances is too great for enumeration here, and is constantly increasing. Scarcely a day has passed during the year, when demands for analysis, or test of some kind, has not been made.

This Department is under renewed obligations to the other branches, and officers of the city government. The relations have been harmonious and helpful; and to this Board for their confidence, support and interest, I express my appreciation.

G. C. ASHMUN,
Health Officer.

TENTH
ANNUAL REPORT
OF THE
SECRETARY
OF THE
Board of Health
OF THE
CITY OF CLEVELAND,
FOR THE YEAR ENDING DECEMBER 31, 1882.

SECRETARY'S REPORT.

To the Honorable Board of Health :

GENTLEMEN :—I have the honor to submit to you for approval the tenth annual report of the Board of Health, for the year ending December 31st, 1882.

Two members are appointed annually by the City Council to serve on this Board. One, Dr. W. J. Scott, was his own successor ; the other retiring member, Mr. John D. Crehore, declining the honor, was succeeded by Dr. Albert J. Cook, and the Board reorganized and re-elected all the old employes, since which time there has been but one change, Dr. Frank Daykin, physician to fifth district, resigned a few days after his election and was succeeded by Dr. F. J. Morton, who is still in the employ of the Board.

The finances to maintain this Department are obtained by a tax levy, and the amount of levy is fixed by the City Council, based on an estimate furnished by this Board. The Council, for reasons best known to themselves, reduced the sum fixed by the Board, and were obliged, in the month of October, to transfer the sum of \$3,500 from the Market to the Sanitary Fund, to prevent the discharge of the employes. There are several other sources from which money is obtained, and are classified under the following heads :

Balance on hand December 31, 1881,	\$ 3,972 20
Amount of levy,	11,906 15
Transferred from Market Fund,	3,500 00
Received from 66 slaughter and rendering licenses,	660 00
“ “ 565 milk permits.	565 00
“ “ Newburgh Fertilizer Co's contract to remove dead animals,	572 50
“ “ sale of milk testers,	6 85
“ “ sale of vaccine virus,	4 30
“ “ sale of garden truck from pest house,	8 09
“ “ patients who were able to pay for care at pest house,	42 00
Total,	\$21,137 10

This sum was expended by order of the Board, and has been sub-divided and classified under two heads, one called General Expenses, which includes all the expenses except that used on the Pest House and farm attached.

The General expenses are for

Printing and stationary	\$ 575 35
Use of horse for Inspector of slaughter houses	240 00
Use of horse for the Health Officer (from May)	143 44
Gas	15 39
Salary of Health Officer	1,900 92
Salary of Secretary	1,116 65
Salary of Inspector of Sewers	815 00
Salary of assistant Secretary for 292 days	298 00
Salary of nine Sanitary Patrolmen	6,788 76
Salary of eight District Physicians	3,128 83
Advertising	41 94
Removing swill and garbage, six months	2,497 34
Medicine for chronic indigent poor	44 39
Rent of telephone	60 50
Chemical apparatus for testing milk, etc	39 56
Vaccine virus	221 00
Printing ordinances and binding	25 49
Buttons for Sanitary Police	7 50
Suene butter	9 69

Cleaning carpets	12 10
Printing and binding Annual Reports	90 00
Directory	5 00
Street car tickets	31 00
Stamps and postal cards	68 72
Miscellaneous	18 57
Total	\$ 18,272 80

There is an increase over 1881 in General Expense account of \$3,415.21, which is accounted for in the contracts for removing garbage and swill, under which work was begun June 7th, and a slight increase in salaries of the employes, with a host of small items incident to an active season, which cannot be accurately estimated in advance.

The Smallpox Hospital, or Pest House, cost \$883.12 more than last year. Twenty-seven cases were treated—an increase of sixteen over 1881. During the year it was found necessary to purchase a new horse, wagon and harness, to replace a horse that died, and the wagon and harness were old and not safe to continue in use. The farm line fences are very much in need of repair, as, in fact, is nearly everything in and about the house and farm.

I have arranged the expenditures for this department in the following manner:

Expenses of Smallpox Hospital and Farm.

Surgeon and physician	\$ 385 00
Salary of Steward and Matron	360 00
Groceries, seed and meat	638 12
Horse, wagon and harness	253 00
Clothing for discharged patients	18 19
Private bedding destroyed	10 90
Messenger taking supplies	18 50
Burial cases and digging graves	20 00
Kitchen furniture, etc	44 14
Load of hay	10 83
Plowing, cutting hay, and extra help	75 75
Coal	50 90
Medicines	24 30
Repairs on building	13 50
Washing	18 25

Horseshoeing.....	8 25
Repairing line and rent of telephone.....	40 00
Horse hire.....	14 30
Sundry.....	36 57
Total.....	\$2,056 52
Total resources.....	\$21,137 00
Total expenses for 1882—	
General account.....	\$18,273 90
Smallpox Hospital, etc.....	2,056 55
Balance on hand.....	807 78
Total.....	\$21,137 10

The Board must remember that the balance on hand has been pledged in the sum of \$235.88; 10 per cent. deducted each month from the swill and garbage contractors, the amount so deducted to be paid when the work contracted for has been completed.

There has been expended annually during the ten years ending with 1882, the following sums:

1873.....	\$28,416 14	1878.....	\$12,496 71
1874.....	25,056 58	1879.....	12,066 52
1875.....	19,549 38	1880.....	12,908 95
1876.....	16,168 05	1881.....	16,030 99
1877.....	14,283 18	1882.....	20,329 32

The season of 1882 cannot be called a hard one, but the open winter and moist summer caused the department to be unusually alert.

One of the most important acts of the Board was its conference with the Committee of the City Council on Health and Cleanliness, and on Sewers and Sewerage, with results eventually causing numerous extensions or branch sewers to be constructed; some of them, as a sanitary necessity, have been desired for several years, and more mains and branch sewers are proposed, and will be completed the coming year, and all the territory in the corporate limits of the city embraced in districts, and the conference was the cause of instructing the City Council on the working of this depart-

ment, so that at the present time complete harmony prevails, and not only with the Council, but all the other Boards and Departments of the City Government, to the mutual benefit of all.

I issued during the year fifty-two licenses to slaughter cattle and hogs, render tallow or dress poultry, at \$10 each. Fourteen hundred and twenty-seven complaints were registered, exclusive of those against the swill and garbage contractors, which were more numerous than could have been expected from the promises made when these contracts were being entered into. Thirteen hundred and eighty-seven applications were received for the removal of swill and garbage, and some of these appear four or five times.

MILK.

There is sold each day on an average 13,064 gallons of milk(?)—7,032 gallons by country dealers; 4,738 by city milkmen, including milk sold by persons owning one or more cows, who do not run a wagon or cart, and 1,294 gallons are re-sold by grocers, bakers and retail milk depots. Sixteen hundred and twenty-three cows are said to be owned by country milkmen, and 432 by city peddlers. Fifty-three city and forty-three country dealers have no cows, and purchase all their milk.

NIGHT SOIL.

Little or no trouble has been experienced with this contract during the year. The system of re-examining vaults by the Sanitary Patrol after they have been reported as cleaned (by the contractor), has worked like a charm, and but few complaints are made. Sixteen thousand four hundred dollars and twenty-five cents were deposited in the office for the removal of 7,289 cubic yards of night soil, an increase over last year of 1,173 yards, and \$276.98 was paid back in rebates.

CITY DOCUMENTS.

ited to clean 344 vaults, for which no
on was made — 232 to George Dart, 104
and 8 to George Gee. George Dart was
onvicted of dumping night soil in the

SEWER INSPECTOR'S REPORT.

To the Honorable Board of Health:

GENTLEMEN,—I herewith present my annual report for the year ending December 31st, 1882.

During the year there were issued 2,728 permits, as follows, viz :

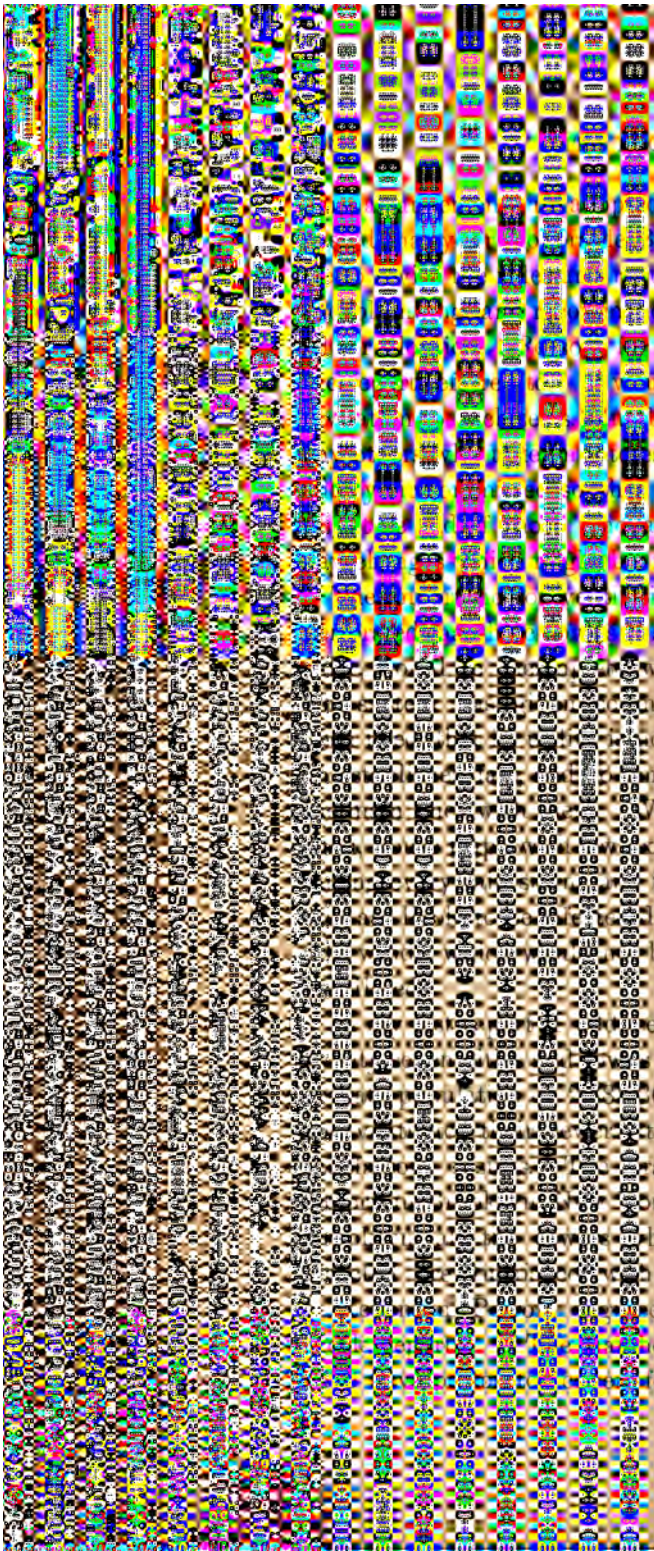

To construct new sewers and extensions,	-	1,085
“ repair sewers,	- - -	555
“ do new plumbing	- - -	819
“ repair plumbing work,	- - -	269
		<hr/>
Total,	- - -	2,728

In presenting this report I would again draw the attention of your Honorable Board to the suggestions and recommendations made in my former reports.

The need of sanitary inspection and the rigorous enforcement of sanitary rules is becoming more and more apparent.

A high death rate and consequent large amount of sickness, are great drawbacks on the protective forces of the nation, in comparison with which the most onerous taxes are light.

It is now about four years since the ordinances pertaining to sewerage and plumbing were enacted, and it would seem that a revision is absolutely necessary, to keep pace with the most improved methods now practiced where proper san-

those of the sewers built previous to 1876, have solid airtight covers, and of these some 1,550 have been fitted with ventilating covers, of which 425 have been done during the past year (1882). The perforated ventilating covers are found to work with satisfaction in all weather, and have been the means of relieving the dwellings in whole districts from the presence of sewer-air that other means had failed to prevent. The substitution of the perforated covers on the old sewers has been necessarily slow, and has been done as funds could be spared from the limited annual appropriation for the maintenance of the sewerage."

O. H. Cheny, Superintendent of Sewerage Department of Chicago, reports that there they are ventilating the sewers, when possible, through the catch-basins (which are constructed without traps) and perforated covers on the man-holes, when the nature of the ground will permit. In some parts of the city the soil is sand, and when the streets are unimproved (unpaved), to avoid running sand into the sewers, close lids are used. "My opinion is, ventilate the sewers in every way possible."

Mr. Wise, Sewer Commissioner of St. Louis, in his report for 1882, says: "No provision was made for ventilation until 1873, when grated or perforated covers were put on some of the man-holes, the use of which was gradually extended, so that for the last four years they have been put on all the new man-holes, except on pipe sewers located on unimproved alleys, when solid covers were deemed necessary to keep the earth from falling into the man-holes. A few years ago objections were occasionally made to such ventilation, too near the premises of the complainants, but none have recently been heard from. On the contrary, frequent requests are made for them, especially in elevated localities and dead ends, where the pressure of sewer-air has been most observed."

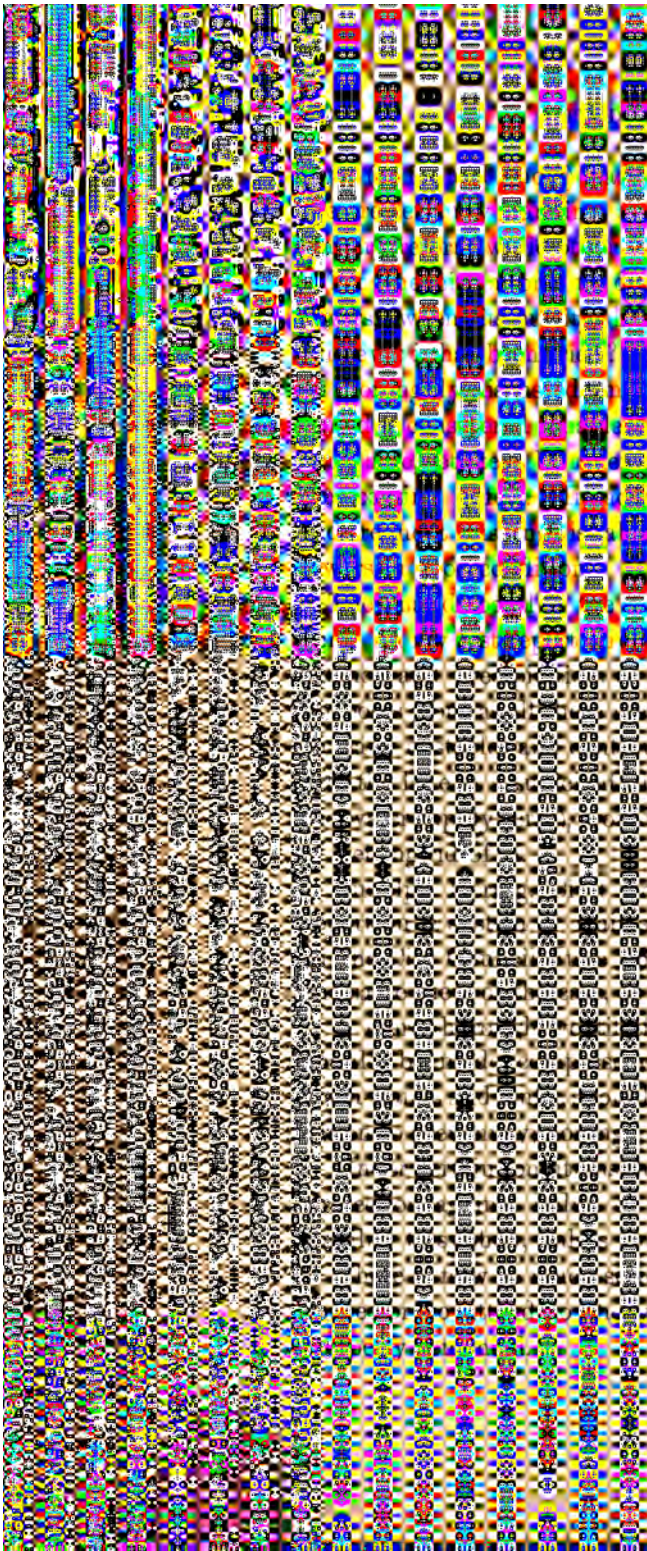

DOCUMENTS.

Department of Public Works, New York City, Superintendent of Sewerage and Sanitation, Report for the year 1880, attention was given to the ventilation generally, and a strong opinion that the only feasible method which the sewerage system could be ventilated was by placing openings in the manholes, and assisting these openings with currents of air passing through the sewer pipes. At the same time the possible objections to these features in connection with the system was frankly admitted, but the objection that the houses as compared with the center of the streets would be the center of the streets was not considered. Objections would apply to the system if the houses were to be dependent upon the system for ventilation. Attention was also given to the fact that at that date, and while the system was in the presence of sewer-gas, the presence of sewer-gas in business houses, were determined to be such that which of itself seemed to be a serious matter, and, in fact, practically added to the certain mitigation of the system of ventilation through the manholes. It was expected, an absolute eradication of sewer-gas was fully expected at an early date. These views were put forth in the report, and participations, alike hoped for, were not realized. During the year 1880, the use of both the open and the closed system of untrapped catch-basins was in use, and to-day there are over 1,000 of the latter in use. The results may be summed up by a

that for the year just closed but two complaints have reached this department in regard to the untrapped catch-basins, both of which were promptly remedied without change of plan, and three complaints about offensive odors arising from the perforated man-hole covers; while the number of complaints of the presence of sewer-gas in dwellings, which, during 1880, certainly averaged from three to five per diem, did not, in 1881, reach twenty cases during the entire year. I consider myself fully justified in recommending a strict adherence to the plan of ventilation now in use, and which, if continued and intelligently extended, cannot fail to attain a safe and reliable sanitary condition at an early day. Some fears have been expressed that the foul air passing through the perforated man-hole covers, and from out the untrapped catch-basins, might reach such proportions as to injuriously affect the surrounding atmosphere, and that the air thus contaminated might find its way into our dwellings and sleeping apartments. Aside from the well-authenticated fact that the currents passing through the man-hole covers and catch-basins are as often inward as outward, the immense disproportion between the largest volume of sewer-gas or sewer-air that could possibly reach the surface, and the volume of the surrounding atmosphere it would come into immediate contact with at that point is, of itself, sufficient to banish all such apprehensions. It is regarded as being within reasonable limits to say that every unit of foul air which passes from out the sewers encounters not less than ten thousand units of pure atmosphere the moment it reaches the surface of the streets, or in an indefinite period thereafter, and as a natural consequence, the absolute dilution and resulting attenuation must be, and is, in a corresponding ratio."

On a subject of so great importance as the ventilation of the main sewers, I regret that your Honorable Board has

MENTS.

the subject under discussion in this particular 'branch' are going ahead.

In accordance with the ventilation system which has been so fully demonstrated, I think not. Let the subject be decided by the evidence herewith submitted, and no unfavorable conditions be allowed as soon as possible to refer to ventilation, though it is absolutely necessary to keep

the subject is still an unsolved problem, referred to its purification by the use of water, as well as its use for irrigation. The methods would be attended to, and the final outlay, I think its distance from the shore and the most desirable method

of the engineer of Philadelphia, who was the sewerage for the city, submitted in 1882, takes substantial account of what I did.

It is more than is generally provided for. All water from bath-rooms should be provided with special

ventilation. There are traps which afford a means of sewer-gas on account of the fact that they are provided with special ventilation. It is impossible to say whether it is a hole, and see that pipe

The method of laying sewer pipe is such that no opportunity is afforded for inspection after the work is done as the workmen cover up the pipe as soon as laid; hence the necessity of some one on the ground in the interest of the owner of the property, as well as the public health, to see that the ordinances are enforced.

In this city the evidence of an imperfectly constructed sewer was so plain that the party's license was revoked, and that there may be others defective, although not quite so bad, is certainly among the probabilities.

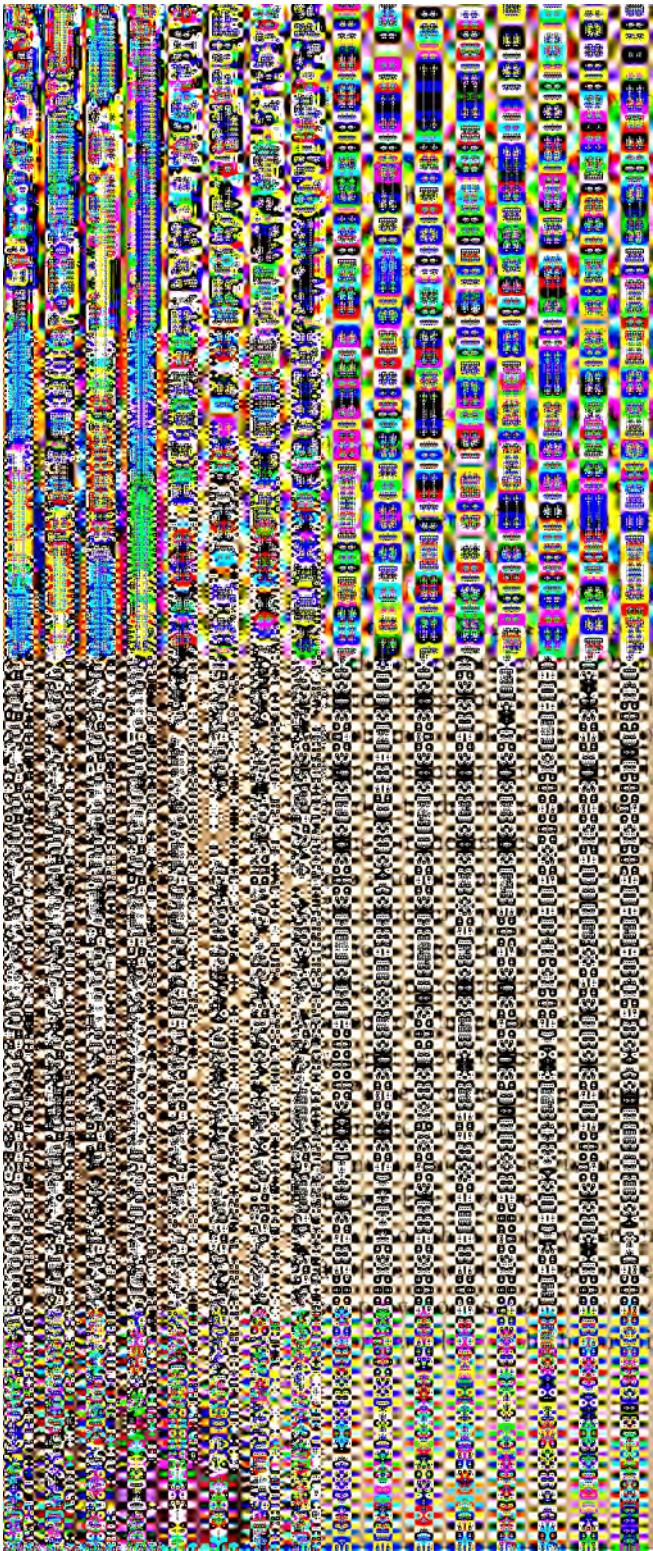

In my opinion the only safe method is to use iron pipe, coated inside and outside, with asphaltum, for all inside work, and placed so that every joint can be inspected. Even cement floors are not considered impervious to sewer gas, and if the sewer pipe is not gas and water tight serious consequences may ensue.

Outside the dwellings vitrified pipe may be used, but too much care cannot be taken, to have all joints perfectly tight.

In the matter of sewerage there is too much contract work done, competition is so great that contracts are made at ruinous rates, and as a result imperfect work. As a rule, I believe, the quality of the work will correspond with the price paid. Low prices, poor work, and vice versa.

It would seem to be the best economy for every one to have their premises in the best possible sanitary condition to ensure good health; and in the case of those who build to rent it would certainly be to their interest to have all plumbing and sewerage properly done, if they were held liable for all damages which might be caused by defective work; it seems that the courts have already made decisions taking that ground.

In this connection I would quote the incisive language of a Health Officer of a neighboring City. "Immanuel Kant,

and in modern times says:

his specification and who ought to be held liable for the omission.

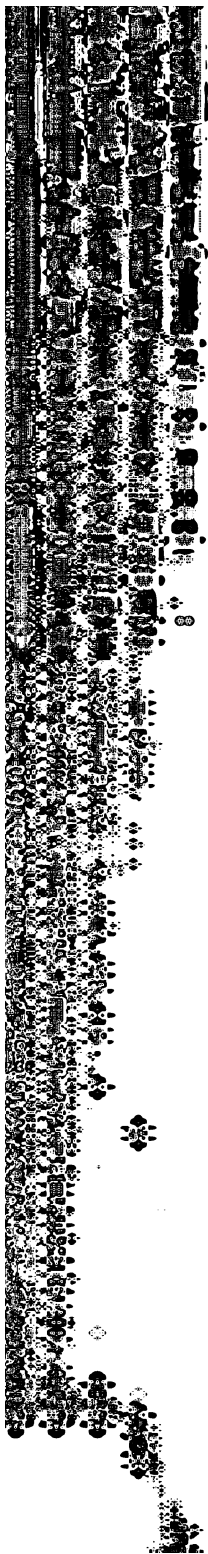

In some cities the registration of competent journeymen plumbers is adopted, and only those who are registered are allowed to do work under the supervision of the Board of Health.

This is a subject which requires your most serious consideration as the justice and efficiency of such a regulation would depend largely upon the ability and impartiality of those who granted certificates of competency. On the other hand, if the trust was faithfully administered, it would be in the interest of the public, as well as, the honest employer and competent employe.

Without entering into fuller details, the foregoing suggestions and recommendations are submitted to your respectful consideration.

GEO. ANDERSON.

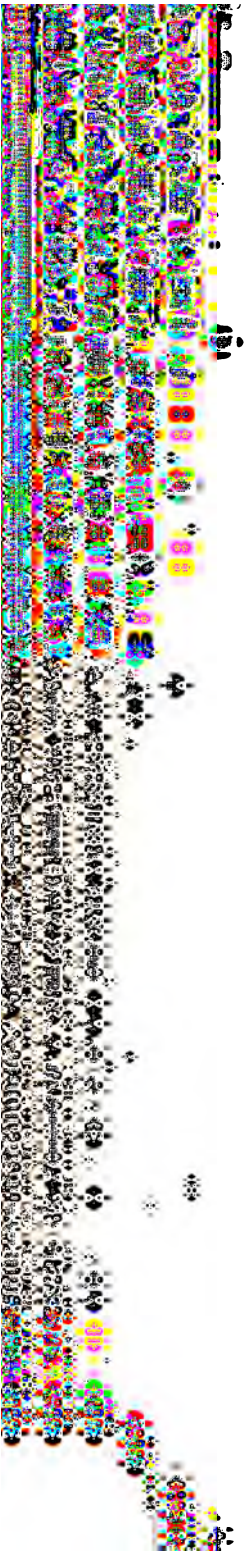

Inspector of Sewers.

COMMITTEE REPORTS.

8

REPORT OF COMMITTEE ON PUBLIC BUILDINGS
HOSPITALS AND SEWERS.

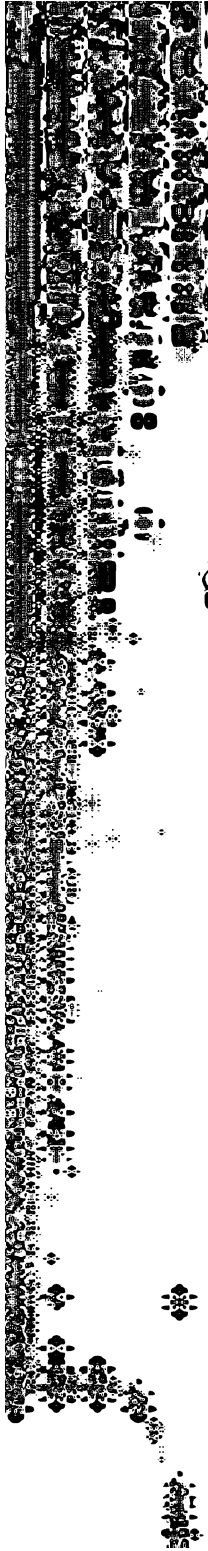

To the Board of Health :

GENTLEMEN,—Your Committee to whom was referred the question of placing a temporary sewer, or open wooden sluice, in Walworth Run; and the duty of designating certain parts of the city which need sewerage without delay, would report as follows :

1st. In regard to employing a wooden sluice for such a valley as Walworth Run, we cannot advise this mode of relieving that district, either for the corporation or for individuals; but we see no objection to individuals adopting this mode of draining their premises, except that it may tend to postpone the inevitable day when a substantial and sufficient sewer shall relieve that far too long neglected region.

2nd. We have not been able to make a thorough investigation into the number and locality of streets and alleys that are in immediate need of sewers as a sanitary measure, but we name the following alleys, streets and tracts as being places where the sewer builder can ply his vocation with great benefit to the inhabitants.

Hamilton street, between Muirson and Alabama streets; Oregon street, between Muirson and Oliver streets; Walnut and Chestnut streets, from Muirson to Dodge; Williams alley; California alley, between St. Clair and Oregon streets; Parkman street; Burnham street; Harmon street; all streets between Perry and Sterling; Cedar and Woodland avenues;

between Woodland
the latter from Perry
on Broadway and N.
up streets; Spence

REPORT OF COMMITTEE ON INVESTIGATING
CHARGES AGAINST THE PUBLIC SCHOOLS.

To the Board of Health :

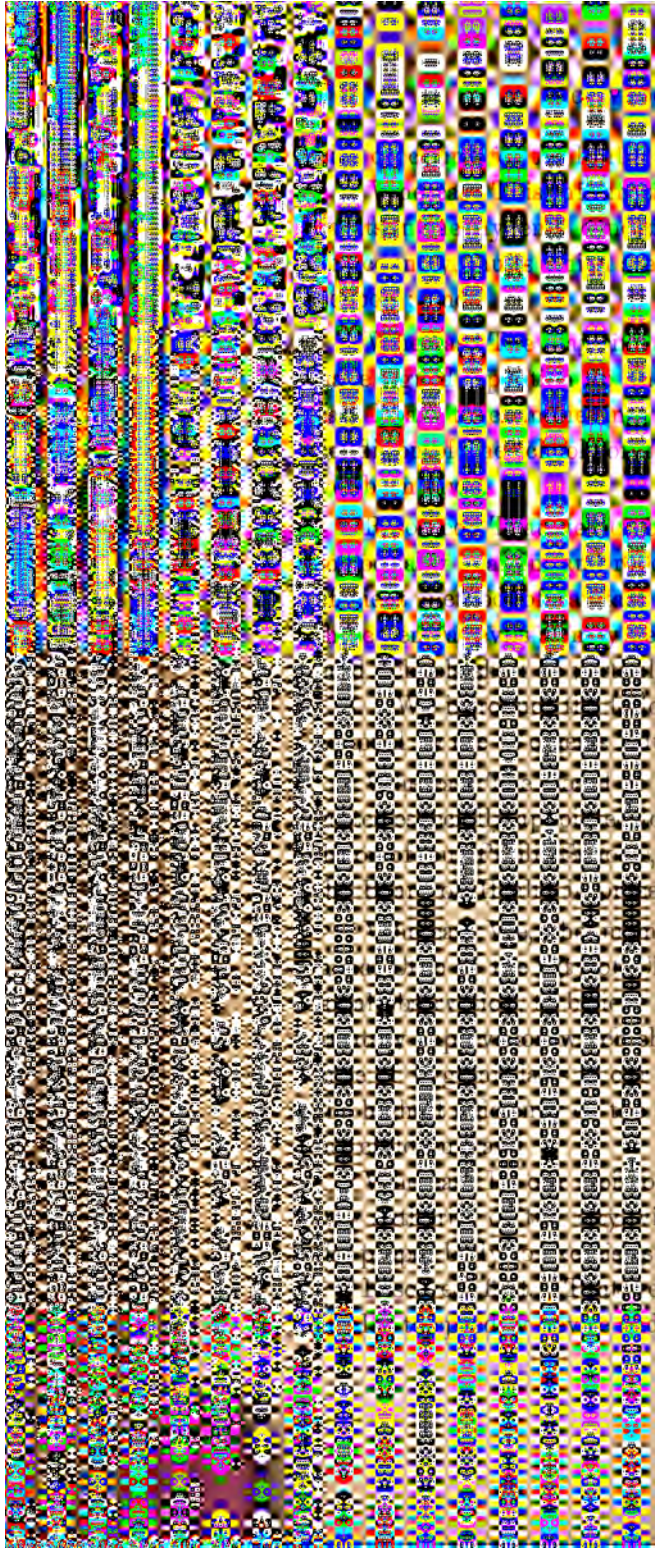

GENTLEMEN:—Your committee to whom has been assigned the duty of investigating certain charges made against the Public Schools of this city, would respectfully submit the following report :

1. We subjoin the petition signed by sixty-eight citizens, including twelve members of the Board of Education, asking for this investigation :

“ To the Board of Health of the City of Cleveland, O. :

“ GENTLEMEN,— Whereas, your Honorable Body is made by law the guardian of the city’s health ; and whereas, it has been charged through the public press that certain features in the buildings and management of the Public Schools are detrimental to the health of the attending pupils, and since it is not for the interest of either the schools or their managers that such charges should pass unnoticed, we, the undersigned citizens and patrons of the school, do hereby petition your Honorable Body to investigate the grounds upon which said charges are based, and if, in your judgment, well-founded, to report to the Board of Education upon the same, suggesting in such report some plan by which any evils found to exist prejudicial to the health of the pupils in our Public Schools, may be effectually corrected.” No date. Presented in summer of 1881.

2. We quote a resolution from the published proceedings of the the Board of Education, which was referred by that body to a special committee, and which formed the conclusion to a report by a member of said Board upon the neces-

DOCUMENTS.

such sanitary supervision can be systematically and thoroughly carried out.

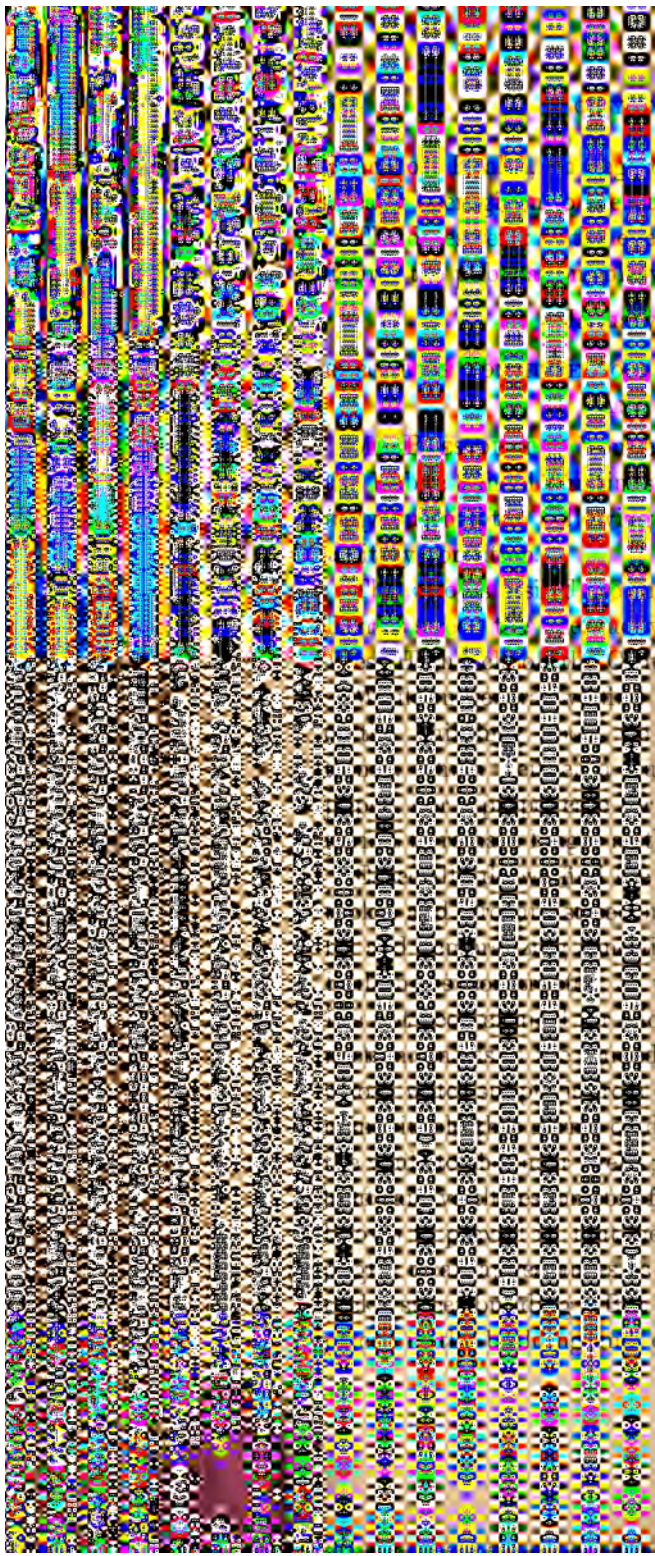

"Second. That we also request said Board of Health to petition the General Assembly of the State of Ohio for such changes in the law in regard to the duties of Boards of Health, as may be necessary to enable them to exercise such supervision.

"Third. That a copy of these resolutions be sent to the Secretary of the Board of Health, and also to each of the daily and weekly journals of the city."

4. We shall introduce the schools themselves, and some of the reports and recommendations made by this Board of Health upon the great need of certain improvements in school buildings to promote the health of teachers and pupils — recommendations made prior to the existence of the foregoing petition and resolutions

In replying to our petitioners, we first call their attention to the indefinite character of the charges named. They say "It has been charged through the public press that certain features in the building and management of the Public Schools, are detrimental to the health of the attending pupils; and they ask the Board of Health to ascertain whether or not these charges are "well-founded," adding, "if, in your judgment, well-founded, to report to the Board of Education upon the same." It will be seen that the framers of the accompanying resolutions, in their importunity for a report, take it for granted that the charges are well-founded, and thus forestall the judgment of the Board of Health, in whose discretion the matter is left by the petitioners.

There can be no doubt that some of the aforesaid sixty-eight petitioners were aware that certain of the charges made "through the public press" had foundation in fact; for the following reports, recommendations, and proceedings of this

time should be lost in completing the arrangements to use these closets, and in abating the present nuisance caused by the old outhouse. In a word, the unwholesome state of the outhouse at these three schools suggests that the strong arm of discipline does not follow the boys to these places, and thus those boys who would not countenance misconduct here are compelled to suffer with the careless and the vicious. Moreover, the placing of closets in the basement of a main building does not relieve supervisors of constant watchfulness over them; for any impurities of air vapor escaping upward from the basement, are laden with all the potency of generating diseases in the occupants of the rooms above.

Our attention has been particularly directed to the appliances in use for warming and ventilating those main school buildings and their adjuncts or "relief" buildings, as the latter are called. All these relief houses and the West High School are warmed by means of stoves, while the main buildings, so far as observed, are supplied with steam radiators, and in one case with hot water pipes, also; and in another hot air from a furnace supplements the steam heat.

Although the winter has been unusually severe, but few complaints concerning the inadequacy of the heat supplied were preferred to us by the teachers. On one of the oldest and most poorly constructed relief buildings at the Orchard street school, the teachers and pupils have shivered from the cold penetrating the thin, unlined floor; a source of suffering which does not exist in the better structures having well-laid double floors. Also the heat of summer is often oppressive to the occupants of this old, low-studded, low-roofed structure bearing the misnomer of "relief" building.

One of the janitors, who finds his time largely consumed in making his two small boilers exhibit five pounds of steam, remarked that "the teachers are in duty bound to open their

windows on one side only, are hard to ventilate, except an opening be cut into the hall, and even then the teachers complain of the great inconvenience of having to open and shut windows continually to guard pupils against extremes of hot, vitiated air, and cold currents falling upon their heads.

An innovation upon both the methods is found in the old Kentucky street building. Here large ventilating flues are placed in the central part of the building, having large registers in the wall at the floor. The steam radiators are located at the windows, and to these radiators fresh air is admitted at the bottom of the lower sash, which is raised a few inches for the purpose. The fresh air is distributed over the radiator tubes by means of a perforated board or diaphragm, and theoretically at least, passes through the radiators and is changed from cold to warm air before reaching the pupils. This arrangement appears to work well; but as it is not automatic, constant care is necessary to insure its efficiency.

The next, and probably the latest ventilation system which our public school buildings exemplify, is found in the Central High School. This system is not essentially different in principle from that in the Kentucky street building, but is somewhat different from the latter in its details. In the Central school each of the four iron smoke flues rises in the center of a much larger ventilating flue having brick walls, or by means of rectangular tin tubes passing between the joists to registers in the floors. Steam radiators are placed at the windows, and fresh air is admitted to them through openings in the center walls, just below the window frames. This air is also theoretically distributed to the vertical radiator pipes by a perforated diaphragm, and so becomes warmed. But practically it is found that often the cold air on leaving the diaphragm falls to the floor, and the pupils'

Committee.

Report adopted, and the secretary instructed to forward a copy to the Board of Education.

W. H. FARRAND, *Secretary.*

UNHEALTHY SCHOOL HOUSES.

Mr. Crehore, from the Committee on Public Buildings, reported as follows:

MR. PRESIDENT: On this day your committee visited the Rockwell, the St. Clair, the Alabama and Case avenue school buildings, and would respectfully submit the following report:

Rumor having come to us that the basement of the Rockwell street building was in an unhealthy condition, in consequence of which there was much sickness among the pupils, we first examined that building, and found that there was some ground for such a rumor, although, as usual, the rumor had considerably exaggerated the facts. It appears that about two weeks before our visit there was an odor in the furnace room as of some dead animal, but this odor had gone and left no trace which we could detect. The janitor's explanation that this stench was due to a dead sparrow did not fully satisfy our idea of cause and effect, if we grant the effect to be as great as reported.

On the day of our visit the basement floor was very damp, owing mainly to the leaking steam and water pipes. These

pipes, of course, should be repaired at once, if they have not already been put in order.

The water closets of the Rockwell and St. Clair street buildings are in their basements, and continually give off offensive odors that mingle with the air rising through the halls to all the floors of the edifice.

It is believed that this source of disease would be nearly if not quite eliminated by separating the rooms of the basement where these closets are situated, entirely from the other rooms, opening an entrance to them from the outside and giving them ample ventilating flues. No odor could then escape except into the open air, with small chance of returning to annoy the schools.

The ventilation of these two buildings is practically by means of open windows and considerable complaint is made of inadequate airing for the middle tiers of rooms, and of the difficulty of adjusting the temperature generally by this mode of ventilating rooms by heated steam.

The Alabama school building, on St. Clair street, is old and heated by means of stoves. No complaints were made here. The privies are outside, and in about the usual condition, requiring early attention.

The Case avenue school house is now heated by steam, and ventilated in a manner similar to the mode adopted for the Central High School building, and described in our previous report. The system as here applied works admirably, as reported by the principal. The privies are outside, and we found them in a very bad condition, which the warm weather will make worse, unless they are at once made clean. They should be connected with the sewer.

In the course of these visits to the different city schools we have not failed to observe the importance of the janitor in carrying out any system of promoting health and cleanliness

in these buildings. Under conditions almost identical, we observe results differing widely, all on account of a difference in the tact or efficiency of different janitors. Would it not be well to make a difference in the compensation of janitors who keep their buildings in the best order, and those who are careless and let things go "at loose ends?" It would probably be better to dismiss the latter and fill their places with competent men.

April 14—Called at Mayflower school, and found new sewer pipes laid and new vaults constructing, old vaults cleaned, but learned that old cesspools had not been disturbed. These should be cleaned out and filled with earth, if it has not already been done.

April 23—Visited the Outhwaite school building. It is heated by steam and ventilated in the manner of the Central High School building and the Case Avenue Grammar School, but the system does not give so good satisfaction in the Outhwaite as in the Case Avenue School.

New water closets have been placed in the basement, with ventilating pipes connecting with the furnace flues. The old outhouses still remain on the grounds, but should be removed immediately, as, indeed, we understand it is the intention of those in charge to do.

We learn that connection with the sewer has recently been made at the Sterling school, and that the same has been ordered for the Orchard School building.

All of which is respectfully submitted,

J. D. CREHORE.

W. J. SCOTT.

December 16, 1880.

PRECAUTIONARY RULES.

In accordance with a previous resolution, Dr. Scott, as chairman of the Committee on Sanitary Affairs, reported the following rules for adoption by the Board, being the same as were in force under the old Board :

1. No child from any family in which a case of scarlet fever or diphtheria now exists or may hereafter occur shall attend any school in this city, unless convalescence in such case shall have been thoroughly established. • In all such cases the attending physician shall certify in writing that the above rule has been complied with, the certificate to be presented to the teacher of the school before the child is admitted.

2. In every case where death has occurred from scarlet fever or diphtheria the body of the deceased shall be thoroughly disinfected and inclosed in a tight burial case, which shall not thereafter be opened. The funeral of such person shall be strictly private, and in no case shall children be allowed to attend, and the room in which the deceased person was, and the clothing and bedding used during sickness shall be thoroughly disinfected.

3. The body of no person who may have died of small pox, scarlet fever, diphtheria, or other dangerous, contagious pestilential, or other infectious disease shall be removed in a carriage or other conveyance used by the public.

THE LAW IN THE CASE.

The city ordinance relating to the matter is as follows :

SEC. 33. That it shall be and is hereby made the duty of every physician having a case of smallpox, cholera, or other dangerous, contagious, or pestilential disease, householder, tenant or agent, in whose house a case of smallpox, cholera,

or other dangerous, contagious, or pestilential disease may occur within the city, to report to the office of said Board within twenty-four hours after having knowledge of the disease, every case of smallpox, cholera or other dangerous, contagious, or pestilential disease, giving the number of the house, the street upon which it is situated, and the name of the occupant or occupants, and the name of such deceased person, or persons, if known.

Dr. Hart moved the following, which was adopted.

That the Secretary be directed to have printed a circular containing said ordinance and rules, together with Section 2118 of the Revised Statutes, and mail to each physician in the city a copy of the same.

That whenever notice is received of the existence of contagious or infectious diseases, it shall be the duty of the Secretary to immediately notify the Superintendent of Education of the same, including name, street, and number of the patient.

A careful examination of these clippings from the "public press," will show our petitioners that this Board of Health had anticipated their request, and had suggested, either expressly or by necessary implication, improvement of the public schools in the particulars given below. Here it is to be understood that an adverse criticism is always to be construed as a recommendation for improvement in the matter criticised. Also, suggestions made with reference to the schools reported, are to apply to all schools, having like defects.

1. Condition of basements, privies, and outhouses, and better discipline of boys in respect to them.
2. Sewer connections required.
3. Pure air to be admitted to rooms.
4. Ventilation. The best system to be adopted in every building.

5. Heating to be under control, and uniform; no cold currents on heads; no cold feet and hot heads.
6. New building for West High School.
7. Better relief buildings.
8. Watchfulness on the part of supervisors.
9. Janitors to be faithful.
10. Method of remedying a defect in the best system of heating and ventilating.
11. Teachers not to be stationed in cold draughts of air in halls, to their injury.
12. Teachers required to have knowledge of ventilation and hygiene.
13. Lighting of school rooms.
14. Proper position of windows and blackboards.
15. Care for pupils eyes.
16. Steam fittings to be kept in repair.
17. Proper location of water closets.
18. Need of more windows in middle tier of large buildings.
19. Discarded structures to be removed from school grounds and old cess-pools filled.
20. Precautionary rules regarding scarlet fever, diphtheria and other contagious diseases.

The foregoing statements in the transactions of this Board of Health, embrace, as we believe, all the charges made against the public school buildings, and some few against the conduct of the schools, whether by the public press or by individuals.

It appears above that some of the wants complained of have been supplied, as, for instance, certain sewer connections, since the first report of this Board. But it is well known that other needs have not been attended to, as, the introduction of the new system of ventilation and heating

into the old buildings, and certain needed sewer connections, etc., etc.

Now, to our urgent resolutionists we would most respectfully say, "Since your chief demand is for more *supervision*, would it not be wise to devote your energies to securing the *execution* of things already abundantly supervised, and recommended by that Board which you are pleased to call 'the legally constituted sanitary authority of the city'?"

When all these recommendations by the Board of Health shall have been executed by the Board of Education in improving the school buildings, the work of supervising the health of pupils will be reduced to its lowest amount. But it will not vanish entirely; neither will it require the daily or weekly presence of a skilled physician in the school room. It will require only the careful and intelligent attention of those who direct the school work of the pupil.

Leaving the subject of school buildings, let us look within them to the management and conduct of the course of education, a subject upon which hitherto this Board has made no special report.

We think we comprehend the principal charges made against the "management" of the public schools, through the public press, in the following list of specifications:

1. The vague charge that the schools are "run" on the high pressure system, without defining exactly what that means.
2. The more specific charge that the course of study is too severe.
3. That too much time is devoted to study and recitation, and too little time to recreation.
4. That the monthly, quarterly or annual examination is the curse and the soul render of the average pupil.
5. That our school buildings are really school houses and not hospitals.

capable mind that a
in spite of known
surdity," although

injudicious or narrow-minded professed friends of the young, may pronounce it so.

But let us review some of these charges more in detail, and endeavor to prescribe needed remedies for the schools of Cleveland.

First, as to the severity of the course of study, we would premise that the normal course should be one adapted to healthy pupils of average ability, and not one specially framed for invalids, dullards or geniuses.

From our observation of pupils through the entire Cleveland course, we believe it to be not too severe for the average pupil. And we especially commend the flexibility or elasticity in the course, that allows pupils, for cause, to take a partial course, or to take additional studies if they can do so advantageously.

Let no patron of the schools be deceived hereafter ; for, if his child is pressed too hard in the regular course, one or more studies may be dropped without any shadow of disgrace to parent or diligent child. This latitude and option is simply a part of the Cleveland school system, though it seems to be not generally understood.

Concerning the "high pressure" and the dreaded final examination in order "to pass," we find that far greater weight is given to the average of the teacher's daily marking than is given to the final examination mark. This is as it should be. But, whether the final examination mark should be dropped altogether is a question not easy to decide. In its favor it is said that it is about the only means the anxious teacher can employ to stimulate lazy pupils who take no pride in keeping up with their class, but are ashamed to be kept back when their fellows enter an advanced grade. Especially does this stimulant seem to be needed since the stimulant formerly administered by Dr. Spanxter appears to be out of the market.

On the other hand it is urged, and often with truth, that the dread of failure "to pass" so oppresses the minds of many diligent scholars that disease is induced.

On this dilemma your committee would recommend, in the interest of health, that the final examination mark be dropped entirely in determining the pupils fitness "to pass" to a higher grade, and that his advancement to such grade be made to depend wholly upon the average of his daily record kept by the teacher. We see no harm in final or stated examinations if the school authorities choose to have them.

As regards the amount of school time devoted to labor and to recreation, we find in the Grammar schools a continuous "session" from 9 to 11 o'clock, then a recess of 15 minutes, after which a session till noon. In the afternoon there is a session from 1:30 to 3:30 o'clock.

These continuous "sessions" do not imply continuity of recitation, or of study, there being at least a change in every 45 or 60 minutes, a remark which also applies to the High schools.

The two daily sessions of the Central High School are divided into intervals as follows :

9:10	o'clock.
9:55	"
10:40	"
11:25	"
11:55	"

the last interval being devoted to music by one-half of the school, and to gymnastics and calisthenic exercises by the other half, the two halves alternating from day to day.

11:55 to 12:25. Recess.

1:10

1:55 Close.

The grades below the Grammar school, have, we understand, shorter sessions and more exercise in their program.

We leave this matter to the wisdom of supervisors and instructors, without recommendation of change.

We have made some inquiry into the condition of pupils eyes, in Grammar schools, and submit our findings in Sterling avenue and Warren street schools,—these two districts exemplifying somewhat different nationalities.

	A Grammar.	B Grammar.	C Grammar.	D Grammar.	A Primary.	B Primary.	No. of Pupils.	No. of Pupils near sighted.	No. having other disease of eye.	No. diseased before entering school.	Total number diseased.

We do not claim that this table is a completely accurate exhibit of the condition of eyes in these 24 school rooms; but our observation convinces us that there is no real cause of alarm in this behalf, and that these children could hardly be educated any where with less detriment to their vision than they will experience in the public schools of Cleveland when the previous recommendations of this Board of Health with respect to lighting and blackboards, shall have been acted upon.

With respect to the charge that the health of girls is impaired by the "modern educational methods," we submit that the charge in our 10th specification is effectually answered and neutralized by the confession at the close of the 13th specification. That is to say, some girls injure their health by too much mental work; and this is not due to the system of education, but "to an overweening desire to cultivate the mind." Now, since we have shown that in the Cleveland system, no disgrace attaches to girls or boys taking a partial course, such as is adapted to their physical and mental condition, it follows of necessity that our "educational method" is not responsible for sickness of girls.

But it is claimed by superficial thinkers and sensational writers, that it requires a "supervising physician" to determine what girls are overworked in the schools. The mere statement of such a claim is sufficient; for, if neither parents nor teachers, nor the regular school supervisors, nor the girls themselves, can find out that their school work is injuring, or tends to injure, their health, it is the plainest teaching of common sense that their health is not in jeopardy. Moreover, the claim that many such cases have been discovered without the aid of such physician, if well founded, proves that a special supervising physician is not necessary for this purpose.

The real truth is probably this: The ambitious father perceives that his ambitious daughter is working too hard in school; and instead of making her drop some of her studies, as it is her privilege to do, he begins to berate the school system and management, and insists that the course of study must be curtailed to suit the physical and mental condition of his daughter; and all the while the great majority of her classmates are doing the assigned work, not indeed without care and diligence, but with entire immunity from harm.

Reverting to the charges of "high pressure," we may add that not a few of the complainants besiege the superintendent's office, when their children fail to reach the standing required for passing to a higher grade, indignant at the supposed disgrace of failing "to pass." Let all such persons know henceforth that disgrace only attaches to the unfaithful, and not to the diligent but slower of apprehension, who often, afterwards, far outstrip their more precocious classmates.

Our attention has been called to one thing in the schools which we most emphatically condemn as tending to promote high pressure; and that is the emulation, as we may call it, among the teachers to have their respective schools stand the highest in the list, as if their own standing in the eyes of their employers and supervisors, would be adversely affected if they simply worked their classes within safe limits of strain. The cause of this evil should at once be taken away. Let every teacher, on the presumption that all are qualified for their positions, have large discretion in the conduct of her classes, both as to method and quantity of work, with no troublesome thought of her work as compared with the work of others, but only of her work as adapted to the particular class she instructs.

Here we will state that the principal in one of our Grammar Schools finds the prescribed Arithmetic too advanced in

character for her class, but does not dare to return to the old textbook lying on her desk, although it is well suited to the needs of her pupils, because the new book is prescribed, and we personally know that the labor of preparing the lesson, virtually without a textbook, is greatly enhanced. However, we do not now report on textbooks, but merely call attention to a complaint whose cause should be removed without delay.

The "public press" which gave us the first set of resolutions quoted in this report, gave us also, in the same issue, the following statement in regard to the public schools of Brussels:

In Brussels, Belgium, the hygienic management of the schools has been, since 1874, under the supervision of the bureau of public health. The method is as follows: Five physicians were delegated to the sole work of medical inspection of the schools. They give attention, first, to fault in construction, heating and ventilation, size of class-rooms, seats, desks, windows, etc.

Second—To the temperature and the daily condition of the air, and the causes tending to vitiate it.

Third—To all circumstances affecting the health of the well child, gymnastics, care of eyes, ears, teeth, skin, body, length of lesson, time of study, light, heat, ventilation, books, swimming lessons, instructive excursions, the immediate closing of schools when the temperature reaches 82 deg-Fahrenheit, accurate anthropometric records as a means of constantly learning the condition as to health of the pupils, and investigation into the best methods of intellectual development.

Fourth—In rigid regulations regarding infectious diseases including vaccination and re-vaccination, and to careful directions for the training of children below the normal standard of health. The result has been that no one of the in-

fectious diseases have reached the height of an epidemic in Brussels, although the other cities of Belgium and Europe have suffered severely — that the general health of the pupils has improved ; that the scholars have much more nearly than before the training that is individually suited to each, and that the public charities and penal institutions are thought to be less resorted to.

We quote this statement for the purpose of showing how small a part of the work delegated to the five physicians, needed the skill of a physician at all, and how much of the work absolutely requiring a physician is, in Cleveland, done through the Board of Health and the family physicians.

With a corps of instructors having the intelligence of the teachers in the public schools of Cleveland, we fail to see the need of specially appointed "medical inspectors" to "give attention to fault in construction, heating and ventilation, size of class rooms, seats, desks, windows, temperature, daily condition of the air, and the causes tending to vitiate it ; gymnastics, care of eyes, ears, teeth, skin, body, length of lesson, time of study, light, books, swimming lessons, instructive exercises, closing school at 82 deg. Fahrenheit, anthropometric records, and investigation into the best methods of intellectual development."

These are not matters requiring greater knowledge of hygienic laws than is presumably possessed by those who conduct the public schools, under the supervision of this Board of Health, with regard to sanitary matters.

Doubtless, as has been said in this report, some teachers are not thoroughly conversant with hygienic laws, and your committees take this occasion to urge the Superintendent of Instruction to require this qualification in all teachers. Also, we find that in some cases when ample knowledge is possessed, the teachers are not supplied with good instruments for observation ; as, for instance, in one building two ther-

thermometers hanging side by side did not accord within five degrees, and probably neither one was correct. Let every school-room be furnished with at least three correct thermometers.

As to the "rigid regulations regarding infectious diseases," we would refer to the action of this Board, above introduced, and constantly in force in Cleveland.

We further quote, with commendation, the recent report of the President of the Board of Education, upon the subject we are examining, in order to bring certain of its topics to your attention :

HEALTH AND VENTILATION.

The following is the complete report of President Jones on the subject of health and ventilation :

Some years ago the Board, recognizing the great importance of preserving the health of the school children, appointed a new standing committee on health and ventilation. It has been the aim of the Board for years to make the sanitary condition of the different school buildings as perfect as possible, but it cannot flatter itself that such a condition has been attained. Some of the older buildings are defective in light as well as in heating and ventilation. These defects cannot be remedied except at a considerable expense, and the Board, on account of its straightened financial condition, is unable to do what it otherwise would do in this matter. Most of the relief buildings located in many parts of the city should be heated and ventilated in a different manner. Some of these buildings, during the cold weather, have, near the floor, a temperature but little above the freezing point, while the air above is heated to about 70 degrees. Perhaps double floors would remedy this defect in part, and make it more comfortable to the pupils. Many of the rented rooms in various parts of the city are quite defective in heating, lighting and ventilation.

The more recent of the large buildings are a decided improvement upon the older. But we cannot flatter ourselves in thinking that these are perfect, although we may say truthfully that none are better.

The Board has, during the year, with a view of improving the sanitary condition, constructed at considerable expense sewers at Mayflower, Sterling, Outhwaite, and Orchard, and has made new vaults at a number of buildings.

Communications have been received by the Board, and articles have been published in the daily papers reflecting unfavorably upon the tendency of the course of study and other school arrangements on the health of the pupils. Some of these articles purport to be founded upon observations of the pupils of our schools; but they are largely composed of extracts from statements made in reference to schools in other places, and are taken in some cases from journals in no way competent to pass an opinion on questions so difficult, and therefore charges originally brought against other schools are brought forward against ours as having a similar course of study and government.

The statistical tables communicated to the Board during the year, in reference to the effect of the course of study on the health of the pupils of the high school, are very defective in that the investigation of facts upon which the conclusions are based does not conform to scientific methods.

From letters which I have received, I judge that these communications are giving a false impression abroad, some seeming to think that they were prepared at the instance and by the authority of the Board.

If, after examination, it be found that abuses exist in connection with the course of study (and this is quite possible), they should be remedied; but it can hardly be expected that the course of study should be changed at the nod of every sciolist who takes upon himself the work of reform.

It is the opinion of your committee that no expense should be spared by the Board of Education necessary to put the Cleveland school buildings in the best known sanitary condition as soon as possible.

If it be true that the great army of tax-payers is sincere in its desire to improve the condition of school children, there is no better way of testing this sincerity than by asking said army to pay for necessary improvements.

To show the pernicious influence of unreliable statistics, noticed in this President's report, we clip the following from a recent New Hampshire paper:

"IS EDUCATION MURDER."

An editorial with the above title appeared in the *New Hampshire Journal* of December 17. Dr. Spalding, the editor, is well known as the firm friend of education, having occupied various positions where his friendship was marked. In the article referred to his pen cries out against the "high pressure principles" applied in the schools of to-day, and queries whether the results intellectually are better than in days ago. This I pass to those whose breadth of vision and experience is larger than mine. But his words are most vigorous as he comes to the application of his text. He illustrates largely from recent statistics of Cleveland high school. "Statistics don't lie," and yet, when not fairly presented, may wonderfully deceive and mislead. They say that "twenty-five per cent. of the number of girls and eighteen per cent. of the number of boys who entered the high school were compelled to withdraw on account of ill-health." They do not say how many of that twenty-five per cent. were allowed to attend parties two or three nights in a week, in over-heated and crowded rooms, remaining till long after the clock told the hour for retiring; nor how many indulged freely in candies and highly-seasoned condiments at all hours; nor in how many the habits of dress were

directly opposed to the laws of health; nor how many of the eighteen per cent., in addition to the above, used tobacco. They do not show how large a percentage of boys and girls as actively engaged in any kind of mind work in doors, with the same outside surroundings, would be compelled to withdraw on account of ill-health." And yet, I think we have a right to demand some statistics on the above points before being asked to believe that all the ill-health among the boys and girls of our schools comes from the "high pressure principles" practiced there.

He says: "We doubt if it can honestly be made out that this is a wholly exceptional case. Town after town, all through the country, if carefully canvassed, would show some most startling figures." Doubtless, not only with reference to the amount of ill-health among school children, but to their habits of recitation, of sleep, of dress, of eating and drinking. It is doubtless true, as Cleveland statistics and Dr. S. affirm, that there is more suffering from "headaches, back or sideaches, nervous disorders and functional derangements" in our schools to-day, than in the good old days of our fathers, but are not the same classes of disease more "appallingly and significantly" prevalent among persons of all ages and occupations? The general cause of this, the physician may state. Dr. S. instances a young man who died last summer with the fresh-plucked honors of Harvard in his hand, and further says: "It is no solitary case. Many and many a town in New England can tell the same tragic story of its most brilliant boy or girl, sacrificed to this Moloch of education." In a neighboring State a rising young lawyer died just as he was winning the laurels of success. Another young man had won his way to a thriving business, and prosperity smiled on him, but he died. "Many and many a town can tell the same tragic story of brilliant boys or girls sacrificed" in their headlong zeal to

attain places of honor in business or profession. The "brilliant" ones fall, for the mediocres and dullards take life too easily. But what do these examples prove? Shall we charge these fatalities to the account of school, profession or business alone? Try the cases by all means. Let nothing be covered. Declare them guilty when so proven. But let not the investigation stop till the life-surroundings and habits are understood. H.

In conclusion, we say to our petitioners and resolutionists, that we have found some of the charges against our public schools true, and have suggested needed reforms: but we do not find it necessary to convert them into hospitals, nor necessary to station medical supervisors within them.

JOHN D. CREHORE,

W. J. SCOTT,

Received and adopted.

Jan. 13, 1882.

NINTH
Annual Report
OF THE
BOARD
OF
FIRE COMMISSIONERS
OF THE
CITY OF CLEVELAND, OHIO,
FOR THE
YEAR ENDING DECEMBER 31ST, 1882.

BOARD OF FIRE COMMISSIONERS.

ORGANIZED APRIL 28, 1882

MEMBERS.

F. G. KAUFHOLZ, PRESIDENT.

Residence, 640 Walton Ave.

Place of Business, 111 Columbus St.

Citizen Member. Term Expires April, 1884.

JOSEPH SLAGHT,

Residence, 825 Logan Avenue.

Place of Business, 825 Logan Avenue.

Citizen Member. Term Expires April, 1883.

WILLIAM H. KING,

Residence 48 Greenwood Street.

Place of Business, 197 Superior Street.

Council Member. Term Expires April, 1883.

NICHOLAS WEIDENKOPF.

Residence, 43 Quincy Street.

Place of Business, 183 and 185 Water Street.

Citizen Member. Term Expires April, 1885.

JAMES D. SHANNON.

Residence, 190 Wason Street.

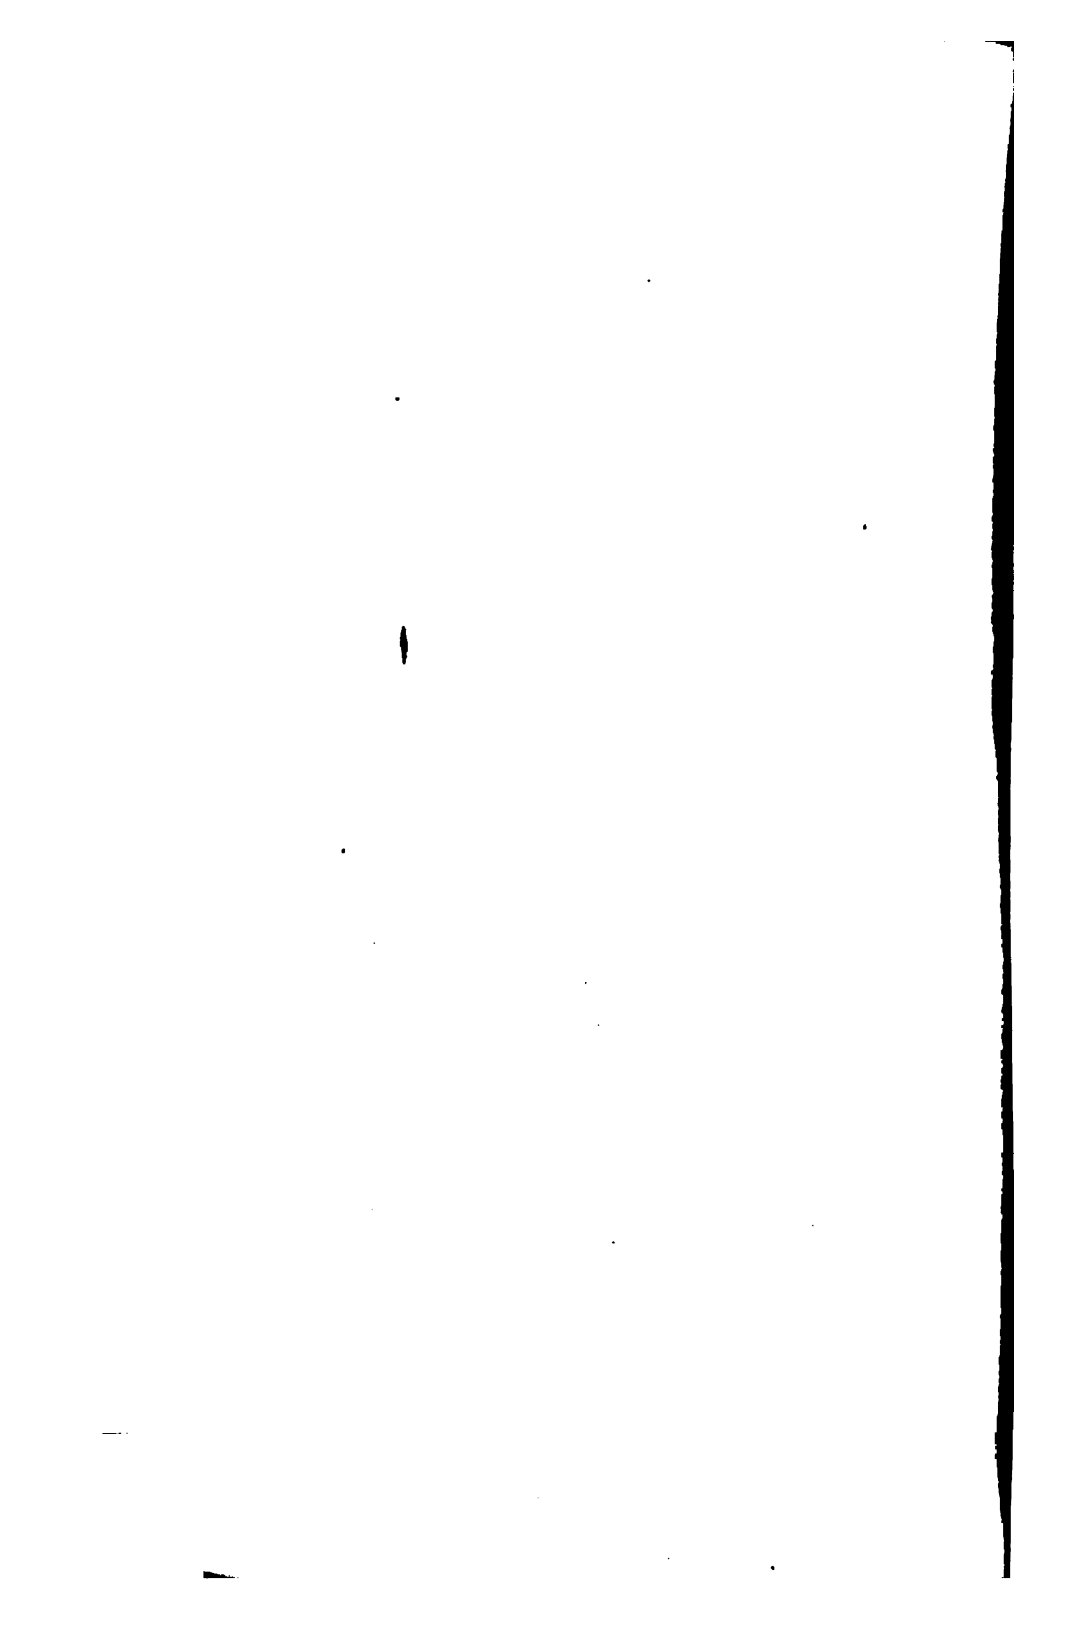

Place of Business, Academy of Music, Treasurer.

Citizen Member. Term Expires April, 1886.

A. J. SPENCER, Secretary.

Residence, Cataract House, 18th Ward.

Term Expires April, 1886.

OFFICERS OF THE DEPARTMENT.

JAMES W. DICKINSON,

Chief Engineer,

Office in the City Hall, Room 11.

H. H. REBBECK,

First Assistant Chief Engineer and Superintendent of Telegraph.

Office in the City Hall, Room 13.

JOSEPH SPEDDY,

Second Assistant Chief Engineer.

Office at Engine House No. 7.

A. A. CAVANAH.

Third Assistant Chief Engineer.

Office at Engine House No. 4.

James Dickinson was appointed Chief December 22d, 1880.

Assistants Rebbeck and Speddy were promoted to their present positions, December 31, 1880.

A. A. Cavanah was promoted to Third Assistant, December 31, 1880.

STANDING COMMITTEES.

Men and Discipline:
Messrs. SHANNON and SLAGHT.

Engines and Apparatus:
Messrs. SHANNON and WEIDENKOPF.

Horses and Horse Feed:
Messrs. SLAGHT and SHANNON.

Buildings and Repairs:
Messrs. SLAGHT, KING and CHIEF.

Equipments:
Messrs. KING and WEIDENKOPF.

Telegraph:
Messrs. KING and SLAGHT.

Water and Supplies:
Messrs. WEIDENKOPF and SHANNON.

Finance:
Messrs. WEIDENKOPF, KING and KAUFHOLZ.

Condemning Committee:
Messrs. SLAGHT, WEIDENKOPF and CHIEF.

UNIFORMED FORCE.

The uniformed force of the Fire Department consists of one Chief, three Assistant Chiefs, eighteen Captains, eighteen Lieutenants, thirteen Engineers, thirteen Assistant Engineers and seventy-nine firemen.

EMPLOYES.

One Veterinary Surgeon, who also acts as fireman.
 One Storekeeper, who also acts as fireman.
 Three Operators.
 One Lineman.

FIRE DEPARTMENT FORCE AND SALARIES PER YEAR.

James W. Dickinson, Chief.....	\$ 2,200 00
Henry H. Rebbeck, First Assistant and Supt of Telegraph.....	1,785 00
Joseph Speddy, Second Assistant.....	1,680 00
A. A. Cavanah, Third Assistant.....	1,575 75
A. J. Spencer, Secretary.....	1,500 00
Eighteen Captains, each.....	1,008 00
Eighteen Lieutenants ".....	781 20
Thirteen Engineers ".....	1,008 00
Thirteen Assistant Engineers, each.....	781 20
Seventy-nine Firemen, ".....	756 00
Three Operators, ".....	840 00
One Veterinary Surgeon.....	840 00
One Line Repairer.....	756 00
One Store Keeper and Harness Repairer.....	756 00

The above schedule of salaries was fixed by the Board and approved by the Council for one year, commencing July 1st, 1882, and ending June 30th, 1882.

It is not expected that every member of your Honorable Body should be as conversant with the details and work-

ings of this department as the members of this Board, and because of this lack of knowledge, a little unjust criticism was indulged in on the part of some of your members.

The opposition to adopting the above schedule, as fixed by this Board, arose probably not on account of prejudice, but undoubtedly from a wrong impression of the workings or management of the department.

The present system of "Captains" about which a little discussion was indulged in, is not a new experiment, but has been established in nearly all the large cities for some time, and its benefits in Cleveland have already been made manifest in several ways. One change alone, that of requiring each Captain to inspect buildings and report, has undoubtedly prevented a number of fires which might have otherwise occurred, had it not been for this system. Some people are very careless, and by being prompted occasionally to be a little more careful with fire sometimes is very beneficial.

In preparing the salaries for your approval the Board was governed by the Fire Department Fund. Gladly would an increase have been made in accordance with the minority report of your committee but the Fund would not permit it.

The force has been increased during the year by one company of six men, located in the Twelfth Ward, with a Hook and Ladder Truck, and a chemical engine combined.

Only one death has occurred in the department during the year.

Capt. John T. Gillson, of Hook and Ladder Co. No. 2, a faithful and an efficient officer, died at his residence April 10th, 1882, having been in service since 1865.

APPARATUS.

The apparatus of the department consists of fifteen steamers, of which five are first-sized rotaries of the Silsby manufacture; four of the second-sized rotaries of the Silsby

manufacture, two of the third-sized rotaries of the Silsby manufacture, two of the second-sized piston of the Amos. keag pattern, two of the third-sized piston, manufactured by C. Ahrens & Co., five hook and ladder trucks, provided with fire extinguishers, ladders, buckets, etc., five four-wheeled hose carriages, eighteen two-wheeled hose carts, eleven heaters, one aerial ladder, one delivery wagon, three heavy open buggies, three fuel wagons, one telegraph wagon and six exercise wagons. One chemical engine not yet in service.

December	16.	Mathias Wilhelmy, glass factory	1,000

The losses amount to about the same as in the year of 1881, being a little less by about \$1,000. The loss at the Southworth fire, March 24th, was nearly one-half the whole sustained during the year, and the usual amount of credit was bestowed upon the department for its excellent work during the year, and it is an acknowledged fact that dangerous fires have been handled in the most skillful and praiseworthy manner.

There were thirty-two fires less in 1882 than in 1881, and it is gratifying to know that the department has been called out so many times with so few accidents. Only four men received injuries while responding to alarms or at work on fires; and accidents to apparatus were trifling to what they might have been.

VETERINARY SURGEON'S REPORT.

To the Honorable Board of Fire Commissioners :

GENTLEMEN — I have the honor to submit to you my annual report for the year ending December 31, 1882. There are sixty-seven (67) horses in service, and three lame and out of service. Only ten horses have been purchased during the year, at an expense of \$2,107.50, and nine horses have been sold for \$918.75. Two horses died — one of them from inflammation of the bowels, and the other dropped dead while on his way to a fire February 1st, of heart disease.

Heretofore it has been inconvenient in giving descriptions, as only the name has been the criterion, and there being several of the same name led to confusion. A system of numbering each horse has been adopted, and the horses hereafter will be known and described by certain numbers.

C. S. BEVERLIN,
Veterinary Surgeon.

FIRE STATION No. 1,

Located at the corner of St. Clair and Academy streets, was known as Fire Department Headquarters until 1881, when Chief Dickinson transferred the title to the City Hall, where all business for the department is now transacted. The building is three stories, with ample means to accommodate Engine Co. No. 1, Hook and Ladder Co. No. 1, Aerial Ladder Supply Co. No. 2, harness shop and store-room. There are ten horses stabled here. Engine Co. No. 1 has three, Hook and Ladder Co. No. 1 has two, Aerial Ladder has two, (which are also used for teaming), Supply Co. No. 2 has two, Telegraph Corps has one.

The steamer is a first-sized rotary, built by Silsby Manufacturing Company, at Seneca Falls, N. Y. It was placed in service in October, 1868, and then known as the "Amos Townsend." It was thoroughly repaired with Silsby's latest improvements, and put in service again in July, 1880. Engine is numbered 200.

ENGINE COMPANY NO. 1.

Names.	Position.	When Appointed.
John Van DeVelde.....	Captain.....	January, 1868.
Charles A. Kyle.....	Lieutenant.....	July, 1880.
Thomas Waters.....	Engineer.....	December, 1870
John McWilliams	Assistant Engineer.....	Septembe, 1870.

Hugh Quay.....	".....	April, 1881.
John Grady.....	".....	August, 1881.
George Hartman.....	".....	May, 1882.

The Hook and Ladder Truck was built by W. Gabriel & Sons, and placed in service in June, 1873.

HOOK AND LADDER CO. No. 1.

Names.	Position.	When appointed.
George A. Wallace	Captain	June, 1869.
Charles Dougherty	Lieutenant	November, 1873.
John McGlooc	Fireman	May, 1876.
Henry Mershon	"	July, 1881.
Henry Kenneman	"	May, 1882.
Charles Sumner	"	May, 1876.
Chas. A. Hunt	"	May, 1882.
Celis La Barge	"	September, 1882
John Clancy	"	December, 1882.
James Price	"	April, 1882.

Fire Station No. 2 is located on Champlain street, near Ontario. The steamer is a second-size piston, Amoskeag pattern, and placed in service January, 1875; was known as the "Chas. A. Otis."

Names	Position.	When Appointed.
Richard Gorman	Captain	November, 1879.
Jos. H. Thomas	Lieutenant	December, 1877.
C. D. Murphy	Engineer	January, 1873.
A. H. Rowe	Assistant Engineer	January, 1879.
Henry Williams	Fireman	November, 1872.
John Cunnan	"	May, 1881.
August Bieber	"	December, 1882.
Ed. Ostrander	"	December. 1876.

There are three horses required for service — two for the steamer and one for the four-wheeled hose carriage, which was built in Albany, N. Y., by P. H. Shaw, at an expense of \$500, and put in service in July, 1882.

Fire Station No. 3 is located on Huntington street, near Gordon. The engine is a first-sized rotary, built by the Silsby Manufacturing Company, at Seneca Falls, New York; was placed in service in November, 1871, and was known as the "F. W. Pelton." In 1873 it was sent back and repaired with new boiler head at Silsby's expense. At the Worthington fire it was considerably damaged. It was rebuilt in 1879, by the same company, at an expense of \$950. The steamer is numbered 313.

ENGINE CO. NO. 3.

Names.	Position.	When Appointed.
William Reynolds.....	Captain.....	June, 1871.
William B. Crane.....	Lieutenant.....	January, 1879.
William H. Clayton.....	Engineer.....	December, 1870.
Erwin Reif.....	Assistant Engineer.....	June, 1880.
Frank Miller.....	Fireman.....	April, 1881.
George Pritchard.....	".....	July, 1881.
Charles Hebbig.....	".....	June, 1875.
Frank Dewey.....	".....	June, 1877.
Thomas Hogan.....	".....	December, 1882.

Fire Station No. 4 is located at the corner of Church and State streets. It is a double house containing two companies, Engine Co. No. 4 and Hook and Ladder Co. No. 2. The steamer is a first-sized rotary, built by the Silsby Manufacturing Company, and was placed in service in March, 1873, and was known as the "John Martin." In July, 1874, it was sent to Seneca Falls, N. Y., and a new boiler head was made at Silsby's expense; also, the feed pump was changed in October, 1873. It is numbered 388. This is Assistant Chief Cavanah's headquarters.

ENGINE HOUSE NO. 4.

Names.	Position.	When Appointed.
William Long.....	Captain.....	{ April, 1868. January, 1865. August, 1874.
John Andrew.....	Lieutenant.....	May, 1878.
Sheldon Wright.....	Engineer.....	" 1869.
Rees D. Jones.....	Assistant Engineer.....	" 1876.
Edward Sewer.....	Fireman.....	" 1869.
Charles Anthony.....	".....	August, 1871.
Frank Anthony.....	".....	{ July, 1878. " 1875
Nelson E. Saunders.....	".....	January, 1878.

Truck No. 2 was built by E. B. Leverick, Brooklyn, N. Y., and placed in service at Fire Station No. 1, in September, 1872, and transferred to its present location in 1873.

HOOK AND LADDER CO. NO. 2.

Names.	Position.	When Appointed.
Ira C. Benton.....	Captain.....	July, 1875.
Carlos E. White.....	Lieutenant.....	August, 1873.
Charles Fogg.....	Fireman.....	April, 1872.
Sanford Stephens.....	".....	August, 1875.
Michael Mulcahey.....	".....	May, 1875.
William C. Evans.....	".....	January, 1882.

Captain John T. Gillson, who had served in the department since 1865, died April 10, 1882.

Fire Station No. 5 is located on Phelps street. The steamer was purchased from C. Ahrens & Co., of Cincinnati, Ohio, it being a third-sized Latta, and placed in service in

May, 1877. The extra engine known as the "Hill" was used here formerly.

ENGINE CO. No. 5.

Names.	Position.	When Appointed.
Fred. P. Farrand.....	Captain..... May, 1876.
Henry Tucker.....	Lieutenant..... Aug. 1872.
Walter McMahon.....	Engineer..... September, 1863.
Frank Weber.....	Assistant Engineer..... May, 1876.
George Eichhorn.....	Fireman..... December, 1868.
Charles Wolf.....	"..... October, 1879.
Charles Larick.....	"..... June, 1882.
David Jones.....	"..... December, 1882.

Fire Station No. 6 is located at the corner of Lorain and Brainard streets. The steamer is a first-sized rotary, built by Silsby Manufacturing Company, and placed in service March, 1873, at Engine House No. 2. It was sent to Seneca Falls, N. Y., in May, 1874, for a new boiler head and to be nickel-plated. It was returned in June, and transferred to its present location in February, 1875. In October, 1879, it was precipitated into the Cuyahoga River from Columbus street bridge, damaging it to some extent. The horses were drowned, and the men miraculously escaped. The engine is numbered 387, and having been in service ten years, needs to be repaired or replaced with a new one.

ENGINE CO. No. 6.

Names.	Position.	When Appointed.
John M. Moffett.....	Captain.....	December, 1878.
Henry J. Delaney.....	Lieutenant.....	May, 1877.
Oliver Hartzell.....	Engineer.....	September, 1867.
Elmer S. Yocum.....	Assistant Engineer..	June, 1872.
Peter McMahon.....	Fireman.....	April, 1873.
John Schwartz.....	".....	March, 1873.
Conrad Wamsor.....	".....	July, 1881.
Henry Harmon, Jr.....	".....	June, 1879.

Fire Station No. 7 is located on Forest street, near Gordon, and has a second-size rotary engine, built by the Silsby Manufacturing Company, and placed in service at Engine House No. 6 in 1864, and in April, 1865, was transferred to Engine House No. 7. In December, 1868, was sent to Silsby Manufacturing Company in May, 1872, for a new boiler. The number is 358.

ENGINE CO. No. 7.

Names.	Position.	When Appointed.
Charles B. Knapp.....	Captain.....	May, 1876.
Edwin A. Shaw.....	Lieutenant.....	May, 1881.
William Korts.....	Engineer.....	July, 1860. } February, 1874.

Henry P. Boulton.....	".....	January, 1879.
Arthur King.....	".....	April, 1881.
William Robertson.....	".....	October, 1881.

Fire Station No. 10 is located on Doan street, and has a second-size rotary engine, built by Silsby Manufacturing Company, and placed in service at Engine House No. 1 in December, 1862; transferred to Engine House No. 5 December, 1865; rebuilt by Silsby with new boiler, August, 1869; transferred to Engine House No. 9, 1873; repainted and transferred to its present location in 1875. It is numbered 211.

ENGINE CO. No. 10.

Names.	Position.	When Appointed.
Andrew R. Brott.....	Captain	January, 1873.
Geo. W. Davis.....	Lieutenant.....	September, 1873.
Frank Hughes.....	Engineer	August, 1873.
Harry Orland.....	Assistant Engineer.....	May, 1869.
Walter Harris.....	Fireman.....	October, 1873.
Leslie Hendershot.....	"	February, 1881.
Celis La Barge.....	"	September, 1882.

Fire Station No. 11 is located on the corner of Sawyer and Home streets, and has a second-size rotary engine, built by the Silsby Manufacturing Company. The engine was used as an extra engine for some time, until May, 1877, Mr. Silsby exchanged it for an engine then in service at this station. Its number is 254.

Hook and Ladder Company No. 4 is located in this house. The truck was built by Pine & Hartshorn, New York City placed in service in the volunteer department of the city in 1855, and named Forest City No. 1, with location on Frankfort street; was transferred to the West Side and numbered Hook and Ladder Company No. 2, September, 1868; transferred to the Seventeenth ward and numbered Hook and

Ladder No. 4, November 1st, 1873, and transferred to its present location in the Eighteenth ward, April 8, 1876, being at the present time the oldest apparatus in service in the department.

ENGINE CO. No. 11.

Names.	Position.	When Appointed.
Philip Walters.....	Captain.....	November, 1868
John F. Aukens.....	Lieutenant.....	August, 1876.
William Tenney.....	Engineer.....	August, 1870.
John McFeeters.....	Assistant Engineer.....	May, 1866.
William Dehaney.....	Fireman.....	August, 1873.
John D. Lewis.....	".....	May, 1876.
John Nesbit.....	".....	September, 1881.

HOOK AND LADDER CO. No. 4.

Names.	Position.	When Appointed.
Albert Stevens.....	Captain.....	May, 1870.
John Steel.....	Lieutenant.....	December, 1876.
John M. Marsh.....	Fireman.....	May, 1876.
Maurice Price.....	".....	August, 1872.
Frank Shepard.....	".....	May, 1882.

Fire Station No. 12 is located on Waverly avenue, near Lorain street, and has a third-size rotary engine, built by Silsby Manufacturing Company, and placed in service May 1877. Numbered 567.

ENGINE CO. No. 12.

Names.	Position.	When Appointed.
Charles E. Varner.....	Captain.....	February, 1872.
James Van Develde.....	Lieutenant.....	October, 1865.
Henry Harmon, Sr.....	Engineer.....	October, 1862.
David Ward.....	Assistant Engineer.....	October, 1878.
William Hartzell.....	Fireman.....	October, 1872.
James Cunningham.....	".....	October, 1878.
Samuel Jacket.....	".....	October, 1872.
Jacob Bruehler.....	".....	September, 1879.

Fire Station No. 13 is located on Broadway, near Petrie street, and has a second-size rotary engine, built by Silsby Manufacturing Company, and put in service at Engine House in July, 1863. September, 1870, it was repaired with a new main pump. April, 1872, it was sent to Seneca Falls and repaired with a new boiler. In 1874 it received a new set of wheels. February, 1875, was sent to Engine House No 9, and in the same year received a new air chamber, a new dome, and new brackets. In 1876, was sent to its present location. The number is 348.

There are two extra engines in service — one known as the "Hill," numbered 150, and the other known as the "Black Jacket," without a number, was rebuilt when Sam Brown was engineer.

ENGINE CO. No. 13.

Names.	Position.	When Appointed.
William H. Ney.....	Captain.....	June, 1873.
William H. Caddy.....	Lieutenant.....	May, 1877.
George Speddy.....	Engineer.....	June, 1878.
John Eldridge.....	Assistant Engineer.....	December, 1880.
Lyman H. Waterbury.....	Fireman.....	June, 1879.
George Messer.....	".....	May, 1877.
Nelson Fairchilds.....	".....	October, 1879.

Fire Station No. 14 is located on Pearl street, a new house completed in May, 1882. It has a Hook and Ladder Truck and Chemical Engine combined, purchased of the Fire Extinguisher & Manufacturing Company, at Chicago, Ill., at a cost of \$2,200.

HOOK AND LADDER CO. No. 5.

Names.	Position.	When Appointed.
James Quarrie.....	Captain.....	May, 1876.
William Welsheimer.....	Lieutenant.....	July, 1873.
Samuel B. Allen.....	Fireman.....	May, 1882.
Frank Smith.....	".....	January, 1873.
George Green.....	".....	May, 1882.
John Waterbury.....	".....	May, 1876.

HOOK AND LADDER CO. No. 3.

Names.	Position.	When Appointed.
John P. Belz	Captain.....	December, 1871.
John A. Moxon.....	Lieutenant	October, 1873.
George Hemerich	Fireman	August, 1875.
Frederick Stockey.....	"	May, 1876.

FIRE DEPARTMENT OF THE CITY OF CLEVELAND.

OFFICE OF THE FIRE ALARM TELEGRAPH, }
December 31st, 1882. }

Honorable Board of Fire Commissioners:

GENTLEMEN — In accordance with the rules and regulations of the department, I have the honor to submit my Annual Report in detail for the Telegraph branch of the department, with suggestions for your consideration, for the year ending December 31, 1882.

The instruments have worked well during the year, and given entire satisfaction through the department.

Five new alarms boxes have been ordered. Four of them have been put up as located, and the other will be as soon as the weather will permit. There have been two private alarm boxes placed in the circuit — one on the Cleveland Milling Company's building on Merwin street, and one on the N. Y., C. & St. L. Railway freight house on Cross street. The private alarm box belonging to the City Forge Company has been removed from the old works on Central Way to the new works on Case avenue, near the lake shore.

The telephones that were in Messrs. Gloyd's and Warner's residences were removed to the residences of Messrs. W. H. King and James D. Shannon; also the telephone in Mr. Sprankle's office was removed to Police Commissioner A. B. Halliwell's office, and made connections with the City Hall exchange. Telephone connections have been made to the new police stations on Willson avenue and Swiss street. The new house on Pearl street has also been fitted up with instruments and connected in circuit.

The old No. 3 fire line on the West Side has all been taken down and replaced with new poles and wire where it was necessary, and still there is more to be done when the weather will permit.

I would suggest that the steel wire put up in the Eighteenth ward be taken down and replaced with new wire in 1884, as, in my judgment, it will not be reliable any longer.

This has been the most difficult year that I have experienced, from the fact that there has been so many wires put up all over the city, causing trouble to keep the lines clear; therefore, I would call your attention to the necessity of having more help in the Telegraph Corps, so that in case of a break in the lines at night there would be a man to send out and repair the trouble temporarily until morning; also the place of an operator, when absent on account of sickness, could be more easily filled.

The work in the office is becoming more laborious, as will be observed by the following connections on the switch boards. There are fourteen fire stations, three department officers, five residences (Commissioners), nine police stations, Superintendent's office, three residences (Police Commissioners), Mayor's office and residence, Street commissioner's office and residence, Infirmary office and building, Central and West Side Markets, Woodland Cemetery, Work House, City Clerk's office, Viaduct, Health office, smallpox hospital, City Civil Engineer's office, Water Work's office, Board of Education, and three trunk lines to the Telephone Exchange, one of which is always kept clear, so that in case of notice of fires being given or received, or a call for police at the Central Telephone Exchange, that line is ready for that purpose without delay, making a total of fifty-five.

I would respectfully suggest that the locks on the fire alarm boxes be changed to what is known as the "trap key

lock," and new keys procured for the same, and that all be numbered and a record be kept in this office of each key holder, and that there be a sign placed on or near each box indicating where the keys can be found; also that the alarm boxes be painted.

The following tables will show the number of alarms given for each hour of the day, each day of the week, the number of alarms from each station.

Respectfully submitted by

H. H. REBBECK,

Superintendent of Fire Alarm Telegraph.

TWELFTH ANNUAL REPORT
OF THE
Directors and Superintendent
OF THE
WORKHOUSE
AND
HOUSE OF REFUGE AND CORRECTION,
TO
THE CITY COUNCIL OF CLEVELAND,
FOR THE YEAR 1882.

CLEVELAND, O., February 19, 1883.

To the Honorable President and Members of the City Council:

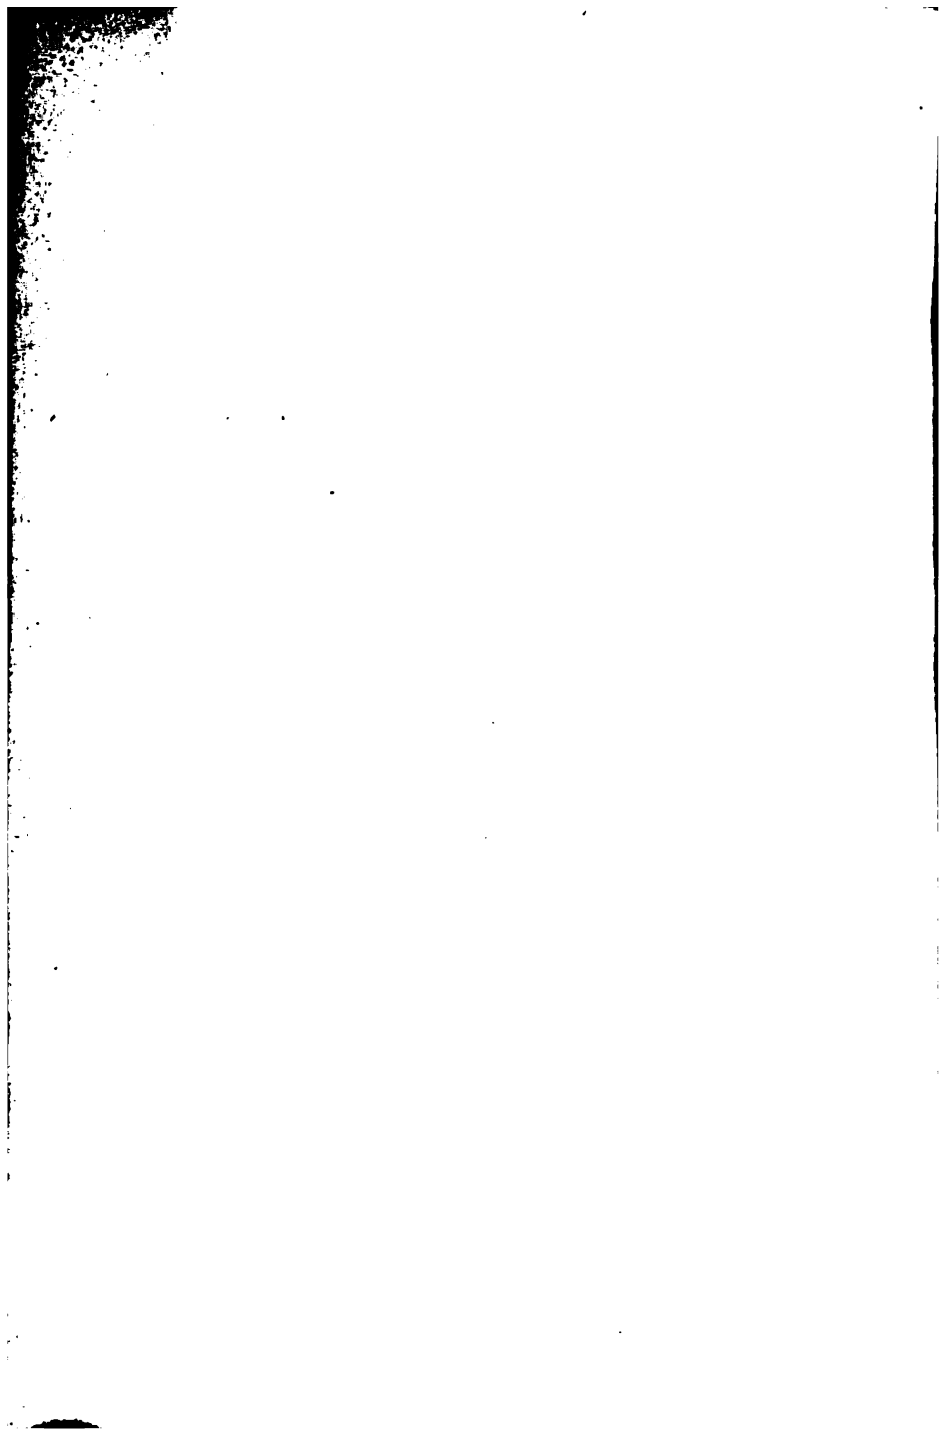

GENTLEMEN:—The Board of Workhouse Directors most respectfully submit to your Honorable body, herewith, their Annual Report of the Institution over which they are placed together with the reports of the Superintendent and Physician for the year ending December 31, 1882.

This being the Twelfth Annual Report of this Institution.

By order of the Board, with the request that the same be printed in pamphlet form.

Respectfully yours, etc.

W. D. PATTERSON,
Superintendent.

Officers.

BOARD OF DIRECTORS.

DR. W. S. STREATOR,
Term expires June, 1784.

L. F. BURGESS.
Term expires June, 1886.

GEO. H. WARMINGTON,
Term expires June, 1897.

S. M. STRONG,
Term expires June, 1885.

CHAS. A. OTIS.
Term expires June, 1883.

OFFICERS OF BOARD.

DR. W. S. STREATOR, - - - - - PRESIDENT.
L. F. BURGESS, - - - - - VICE PRESIDENT.
W. D. PATTERSON, - - - - - SECRETARY.

OFFICERS OF THE INSTITUTION.

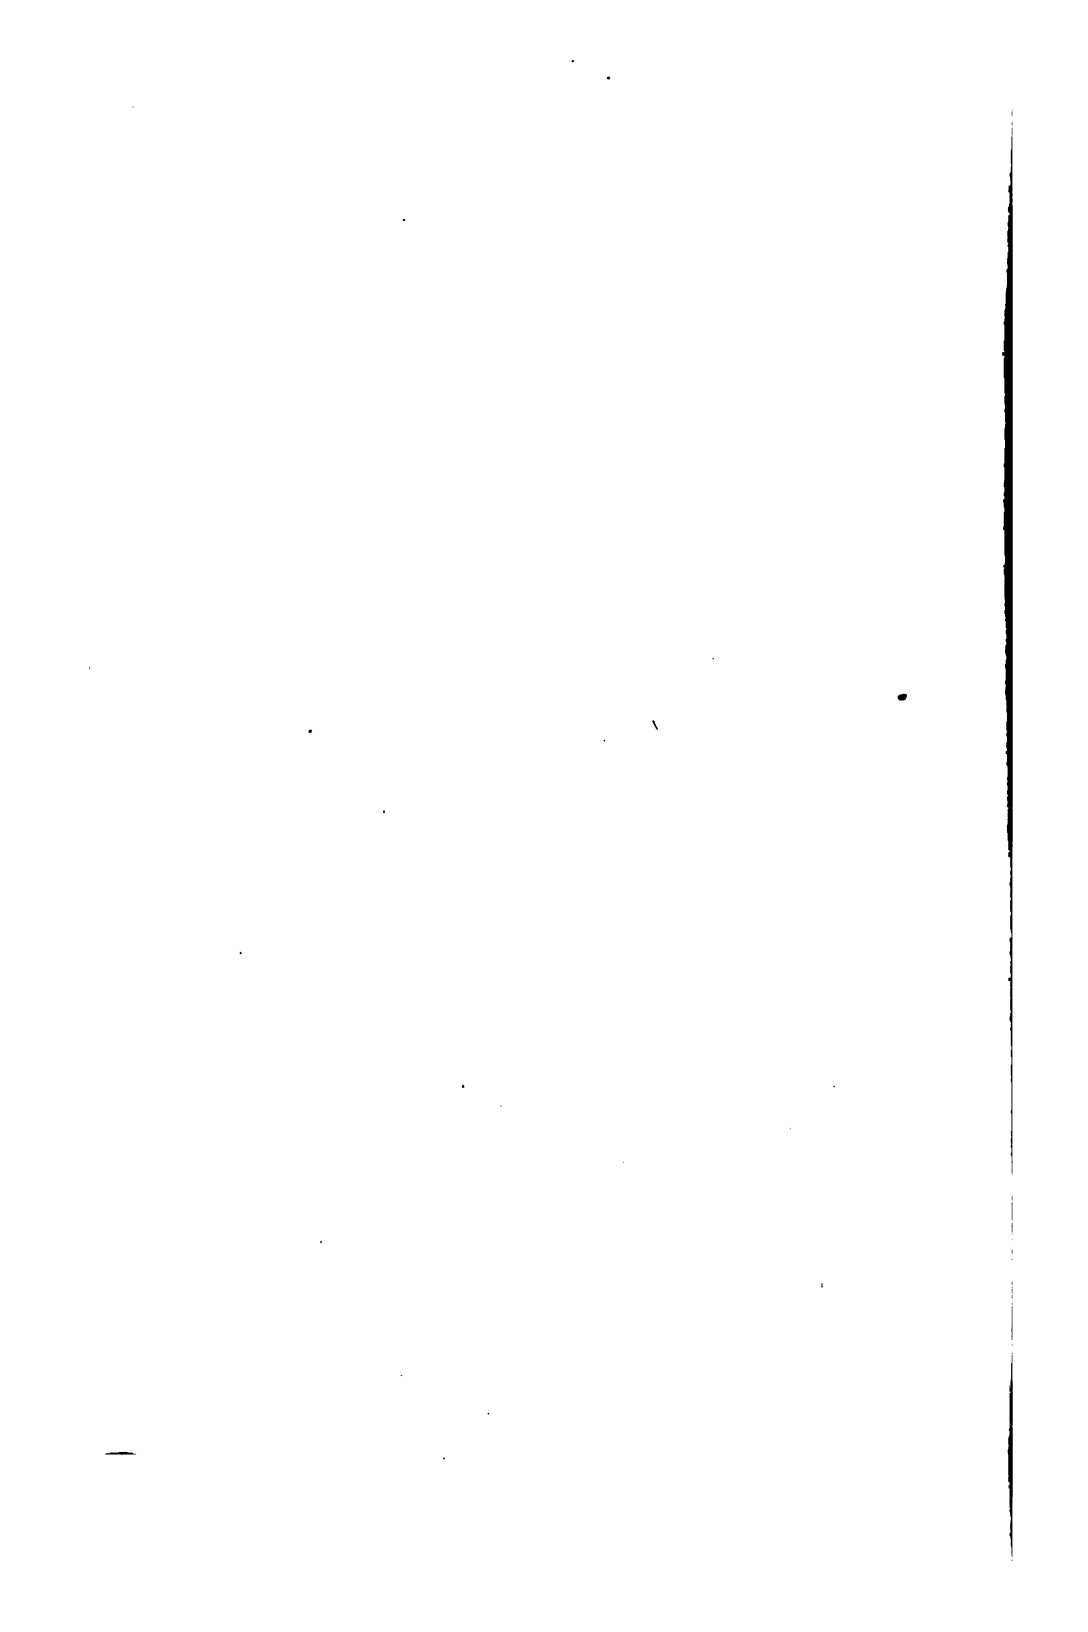

Superintendent, W. D. PATTERSON. *Deputy Superintendent,* JOHN A. McINTOSH.

Deputy Superintendent Refuge Department,
ALEXANDER McBANE.

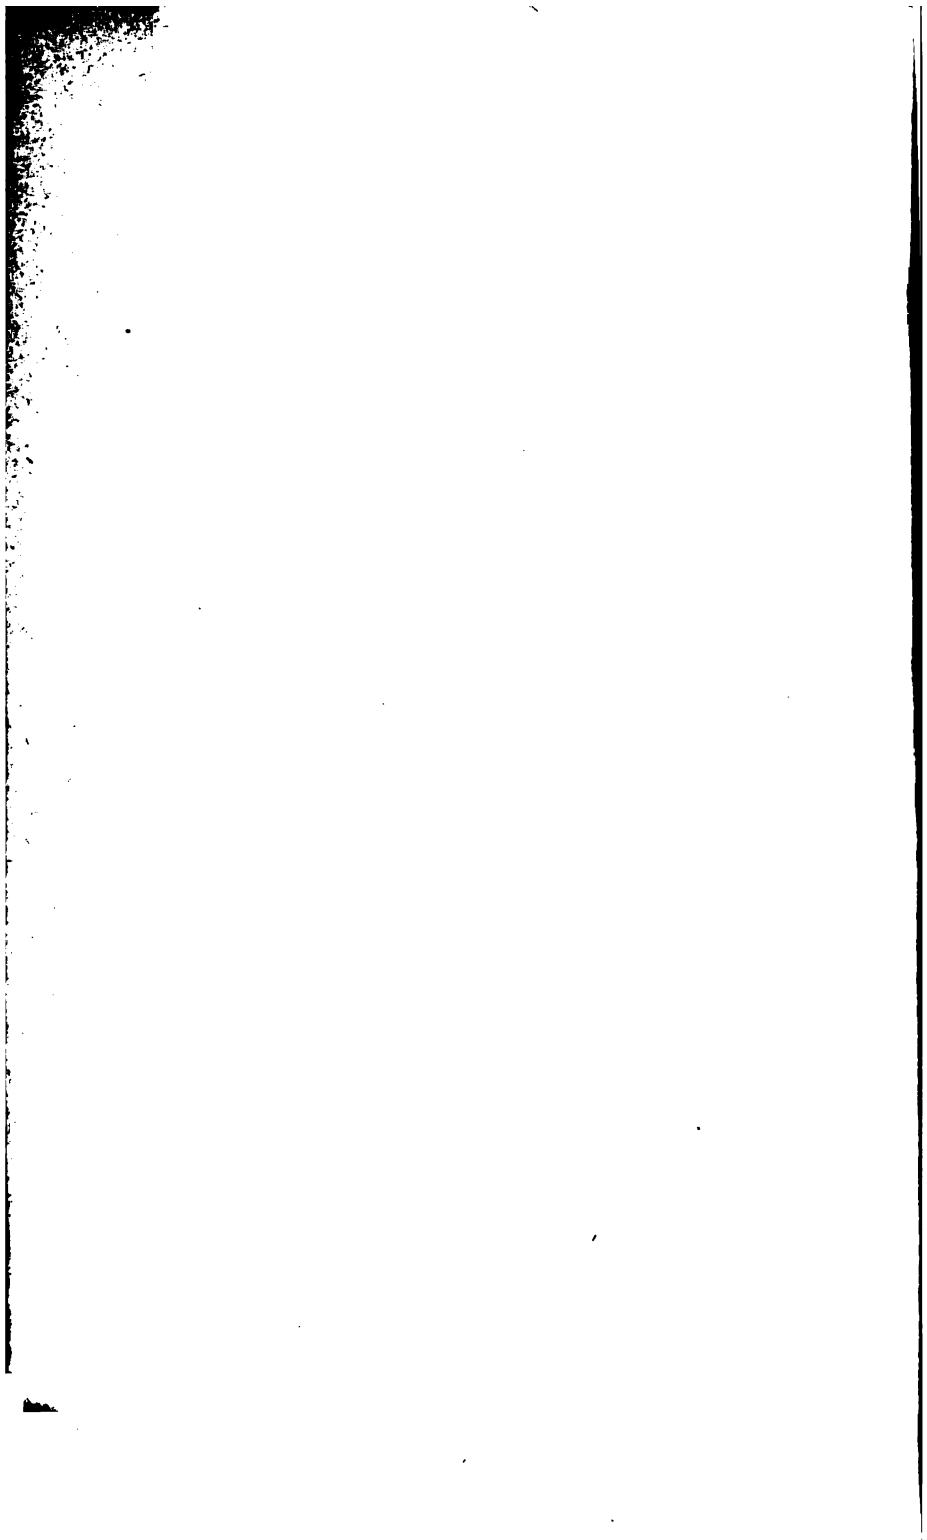

Book-keeper, EDGAR B. PATTERSON. *Assistant,* SAM'L M. WHITE.

Principal Matron,
MRS. M. A. PATTERSON.

Physician,
DR. P. H. SAWYER.

DIRECTORS' REPORT.

REPORT
OF THE
WORKHOUSE AND HOUSE OF REFUGE
DIRECTORS.

To the Honorable Mayor and City Council:

GENTLEMEN—The Board of Trustees respectfully submit the Annual Report for the fiscal year ending December 31, 1882, accompanied by the Report of the Superintendent, with tabular statements as follows: See Exhibits A, B, C, D, E and F. Also the clear detailed report of P. H. Sawyer, M. D.

Cash Account—On hand January 1st, 1882, \$4,650.51. Received from sale of goods produced and sold during the year, \$62,337.54; On Accounts—Bills Receivable, \$38,771.75; Sundries, \$8,403.32. Total receipts, \$109,512.61.

Disbursed by warrants drawn on City Treasurer, \$93,354.94; leaving balance on hand at close of the year, 21,109.11.

For statement of the number of inmates and all improvements and expenditures, we would refer you especially to the full and clear report of the Superintendent.

We desire to call your attention to the fact that there are three classes of persons, or patients, as they may more properly be called—they certainly are not criminals—that are sent to the Workhouse, who should not be, in law or justice.

By sentencing them to the Workhouse it is doing a great injustice and wrong to the subjects, and putting a burden on this institution that does not belong to it, viz: First, Insane persons; second, Epileptics; third, Vagrants, made so by reason of disease. They should be sent by the courts to the institutions to which they properly belong. We have had more or less of these three classes in the Workhouse during the time we have been connected with the institution. Almost every case of discipline in the last two years has arisen directly or indirectly from one of the above mentioned classes. It is difficult to enforce the rules of the prison upon that class of inmates, and if not enforced, when insubordination exists, it demoralizes the whole prison discipline. As a remedy we would suggest that a competent physician be provided, who shall be subject to the order of court, to examine, and pass upon this class of prisoners, before the court renders judgment and sentence in such cases.

HOUSE OF REFUGE.

The Trustees feel deeply the responsibility of the unfortunate class confined herein as their wards.

The school is composed of children of both sexes, and all ages from eight years up to sixteen, and older, if placed with us before they were sixteen.

We find that most of them are received from the courts, charged with petty offenses, incorrigibility, &c., often on complaint of their parents or guardians even, and in many cases the object of their complaints being only to free themselves from the expense and care of their children until such time as they are old enough and physically strong enough, when their labor would not only keep themselves, but be a source of revenue to their parents, and at that stage they almost invariably apply for their discharge. This may be an uncharitable view to take of their motives, but on application

for discharge we often hear such remarks as this: "We only put them there to stay a year," or "until they got a little older and stronger." Notwithstanding this imposition on the institution, the Trustees are doing all within their power for the mental development and education of this unfortunate class, not forgetting that success in this line depends very largely on good health and good physical development. Coming as they often do into the institution with poor, weak constitutions, full of scrofula, consequent upon hereditary taints and poor and improper food in early life, we feel that humanity demands of the guardians of these wards, that everything possible should be done to develop the physical and mental condition of these children. Therefore we again venture to suggest that "legislation should be obtained at no distant day" looking to the removal of the House of Refuge from the Workhouse, to a location where the above objects can be more successfully carried out.

The sanitary condition is good beyond any question. For special information on this subject permit us to invite your careful attention to the report of P. H. Sawyer, M. D.

We are happy to be able to say that the Superintendent and Matron have been untiring in their efforts to comply with every order and wish of the Trustees, and to promote the happiness and comfort of the inmates of the institution.

The employes enjoy the confidence of the Board, are courteous and kind, and the best of feeling prevails between the Trustees, officers and employes.

Respectfully submitted,

W. S. STREATOR, *Pres't.*

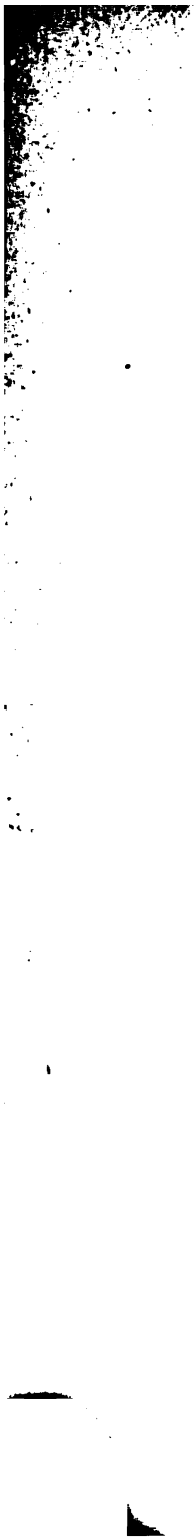

L. F. BURGESS,

C. A. OTIS,

GEO. H. WARMINGTON,

S. M. STRONG,

Directors.

SUPERINTENDENT'S
REPORT.

SUPERINTENDENT'S REPORT.

To the Honorable Board of Directors of the Workhouse, House of Refuge and Correction :

GENTLEMEN :—I have the honor, as well as pleasure, to submit this my Twelfth Annual Report, being for the year closing December 31, 1882. This being the twelfth annual report of this institution.

POPULATION.

	Males.	Females.	Total.
January 1, 1882, in prison.....	252	65	317
Received during the year.....	1,198	260	1,458
Total under care.....	1,450	325	1,775
Discharged during the year.....	1,236	276	1,512
Remaining December 31, 1882.....	214	49	263
Showing a decrease, compared with same date			
last year, of.....	38	16	54
The average number of prisoners in confinement			
for the year, being per month.....	192	49	241
Daily average cost being.....			
Weekly " ".....			2.33
Monthly " ".....			9.34
Yearly " ".....			112.18

The financial statements herewith will show you, in detail, the workings of the institution, together with statistical tables of valuable information.

We commenced the year with

Cash in hands of Superintendent to amount of.....	\$ 300 93
Received by Superintendent from all sources.....	109,512 61
Total to account for.....	109,813 54
Amount paid into City Treasury during the year.....	109,065 51
Balance in hands of Superintendent.....	748 03
Balance in City Treasury at beginning of the year.....	\$ 4,650 51
Deposited by Superintendent of Workhouse, as per Treasurer's receipts.....	109,065 51
Amount in hands of Treasurer to account for.....	113,716 02
Paid out on warrants drawn.....	93,354 94
Balance in City Treasury at close of year.....	20,361 08

In Account "A" it is shown thus—the above two combined:

Balance at first of year.....	\$ 4,951 44
Receipts for year.....	109,512 61
	<u>114,464 05</u>
Warrants drawn on City Treasurer for the year.....	93,354 94
Balance on hand at close of year.....	\$ 21,109 11

The money thus paid out, being for eleven months of the current year, and the last month of the year 1881. According to the system of payments and the drawing of warrants upon the City Treasurer, the bills for the last month of each year are not paid until the first month of the succeeding year. This regulation is made by city ordinance.

The following shows the sources of receipts for the year:	
From bills receivable—on book account.....	\$ 38,771 75
From brush sales during the year.....	62,337 54
From fines in "State Cases" collected.....	6,813 53
From sales sundries.....	1,589 79
Total.....	\$109,512 61

See detailed account Exhibit "A."

BUSINESS.

The business of the year has been the most prosperous and successful of any in the history of the institution. As in the past, the only industry from which any revenue of a considerable amount is derived, being the manufacture of brushes.

During the year orders for our goods have been received in advance of our ability to fill; prices have been well maintained, with gratifying results, as shown in our brush account, the result being the third best in our history, and this, too, with a less number of prisoners than in some of the past years, thus fulfilling my hopes as expressed in my last report.

The revenues of the institution are entirely those arising from our manufacturing interests, with a small amount from individuals and from United States for boarding and care of United States prisoners.

No provision was made for this department of the city government by way of taxation for the years 1881 and 1882, but a tax levy was asked for, by this Board of Management, to be levied in 1882. The same was kindly granted by those in authority, but receipts arising from taxation are not available until in the year succeeding the one in which the tax is levied.

Thus thrown upon our own resources for the past two years, we have subsisted, have made all necessary improvements, kept up repairs, paid all bills and demands against the institution at maturity, and close the year with a balance in the city treasury, of twenty thousand, three hundred and sixty-one dollars and eight cents (20,361.08), and yet fearing for the future, as we have reason to do, there being so many contingencies connected with our business, and having forebodings of a depleted treasury, with bills to pay and nothing to pay with; it was considered prudent to ask for a tax levy, as above stated, to be available in the year 1883.

IMPROVEMENTS.

This account foots up for the year the sum of seven thousand and seventy dollars and sixty-five cents (7,070.65) for permanent and necessary improvements. In our last annual report we referred to new steam boilers being then put up, but not quite completed; the expense for the same, with the steam connections and fitting up for use, costing the sum of four thousand six hundred and one dollars and seventy-six cents (4,601.76), and shown in this year's accounts, as the payments were not made until all were completed.

A large and commodious ice house has been built for the use of the institution, having a capacity for one hundred and thirty-five tons of ice, with cooling room for the better care of fresh meat, milk, butter, etc., the same erected under the most approved patent and plan; the labor for same, excepting foundation walls and slate roofing, being performed by our own mechanics; the expense in cash being five hundred and forty-nine dollars and thirty-five cents (549.35), and will require a small expense yet, in laying up the brick walls on the outside of the wooden frame, the brick being on the premises and paid for, and included in the above expense.

This improvement was considered a necessity, inasmuch as a change was made in the manner of supplying the institution with fresh meats. Now we purchase per carcass, one, two or three at a time, as may appear necessary; and the institution has the benefits of all there is in the whole carcass. Under this new arrangement we do not expect to purchase meat supplies for less money than formerly, but we have the satisfaction of knowing that we are getting a much better supply than in the past.

A new and very complete arrangement was put up in the western wing of the prison for men for washing purposes: in the morning, or at other times, without, as formerly, having to cross the yards, in sunshine, rain or storm, without

roof or protection, to say nothing of inconvenience or danger, and consumption of valuable time. This improvement consists of iron troughs, made in sections, when put together forming two continuous troughs, each forty-eight feet in length, furnishing accommodations for forty-eight men to wash at once; each man being furnished with a tin wash-basin, these troughs serving as a stand, and at the same time to receive the waste water and convey it to sewerage; each four foot section of trough being supplied with a self-closing faucet. This we regard as a very great convenience and comfort, and not expensive; the whole, together with water pipes to convey the water to same, and connections, costing the sum of two hundred and thirty dollars (\$230.00); money wisely and economically spent.

New walks of sawed stone have been laid in western yard, from prison building to shops, six feet wide; and in eastern yard, between prison and female department, four feet in width; these to replace the old ones, dilapidated and worn out. The necessity for these walks was apparent, the cost for same being two hundred and sixty dollars and fifty-three cents (\$260.53).

Some repairs were also made to the stone floors in prison buildings, some worn out pieces removed and new ones placed in their stead.

The walls and ceilings of the halls in front house, formerly kalsomined in plain tints, were thoroughly washed, the ceilings re-kalsomined and walls painted in lead and oil in plain colors; an improvement neat and durable, costing the sum of one hundred and forty dollars and twenty-one cents (\$140.21).

PLUMBING.

In the House of Refuge Department the old wooden floors in water closets, had become a source of trouble and inconvenience; the entire wood-work floor and joists were taken out, iron joists were substituted for the old wooden ones, already decaying, brick arches formed between the same, and upon this was put down a slate floor, laid in cement. The closet seats and stands removed, repaired and replaced, and water pipes for hot and cold water rearranged, with commodious iron slop sink in same room. The walls of the room, three feet up from the floor, have been cemented with best quality of cement, so that there is now no wood or other absorbent material to contend with. Ventillating pipe was carried from this room out through the roof of the building. The ceiling, which was of lath and plastered, and badly broken and damaged, was removed, and replaced with matched flooring and painted. No improvement of the year was a greater necessity, and none made is more permanent and complete.

The entire plumbing of the whole institution has been overhauled and put in complete order.

The worn out wooden floor in the basement of the front house has given place, also, to a floor of broken stone and lime mortar, with a covering of cement, which now has an appearance of neatness and durability.

In all these improvements prison labor has been a prominent part, from which no financial return comes, and yet a saving of hundreds of dollars has been effected by such services.

The great problem is yet unsolved, as to how best to deal with, and what is to be done for, the criminal classes, and more especially with the petty offender, habitual "drunks," vagabonds, &c.

From carefully prepared tables (see tables) annexed, it will appear that the laws, as enforced, have utterly failed in accomplishing the desired result, viz : reformation. When we look at the frequency of arrests, trials, convictions and sentences of the same offender, to the Workhouse, and for the same class of offences, and no outward evidences that the individual has profited by these sad and humiliating experiences, through which he or she may have passed. We naturally ask ourselves the question : Can it be that the penalties for violated law, as administered by our courts, are a failure ? Is the Workhouse and its system of administering discipline in the enforcement of law, under its rules and regulations, and its moral instruction from time to time, or a mistaken sympathy, at fault. Have all these been helps or hindrances to the individual coming under the ban of the law. If these experiences through which these persons have passed have not prompted to repentance and reformation, then some other remedy must be applied for their recovery. It may be profitable to consider the expenses incurred in any one of these cases referred to in their frequent arrests, trials, convictions and sentences, and the same repeated as will be seen by the table, from one to twenty-nine times, in the same individual. The curious can figure out to their satisfaction these expenses. A remedy is at hand for all these failures, if we may call them such. It is a new code of laws ; abandon the old and expensive, and create a new law, so that such persons shall have meted out to them an indeterminate sentence, based upon their reformation, whether that reformation may come in *six* months, *one* year, or *five* years, or longer.

A mistaken philanthropy, so-called, may say this would be excessive when the nature of the offence is considered, our answer is that it would be economy in the end, and better for the individual physically, mentally and morally, and

better for the city financially. Would it not be better in results that these twenty or twenty-five sentences and fines should be served at *once*, than to be distributed over a period of ten, fifteen or twenty years? These intervals between sentences, as now, under existing laws, are only so many helps, in a profligate course, and so many hindrances in the work of reformation. Under an indeterminate sentence, where the offender would be committed until reformed, there is time for meditation and culture; the individual made to contribute largely to his or her support, and all will admit that crime should be made to pay its own expenses.

It is vain to proceed further on the old line, and to expect new results. The new line of policy should be the indeterminate sentence system. Such a system as I have suggested, now is in operation in some of the States, and should certainly commend itself to all good citizens, and especially to those who have given thought to crime, criminals penalties and the results.

HOUSE OF REFUGE.

This department is gradually decreasing in numbers.

	Boys.	Girls.	Totals.
We commenced the year with a family of.....	81	20	101
Received in 1882.....	62	4	66
Under care in 1882.....	143	24	167
Discharged in 1882.....	64	8	72
Remaining December 31, 1882.....	79	16	95
The daily monthly average for the year being.....	76.42	16.80	93

A net decrease of six persons for the year.

The schools in this department have been in continuous operation, throughout the year, under the same corps of teachers and management, as at date of last report. There can be no doubt but that these schools are doing a good work, and

that many children, who have come here from homes of poverty and neglect, or those having no homes, have here received the basis of a good common school education, and in many cases enough to enable them to successfully fight the battle of life.

The separation of the House of Refuge from the Workhouse has so often been referred to, and the necessity for such separation so manifestly important that I need but to call your attention to it at this time.

HEALTH.

The health of the prisoners has been generally good. No contagion or violent disease has visited the institution. Though in such a mixed family, coming in from vagrancy, dissipation and debauchery, it is not to be wondered at that many when received, are in a broken and diseased condition, in some cases both physically and mentally, and with disease so fastened upon them as to require constant care of the physician for days or weeks, and in some instances during the whole term of their imprisonment.

Three prisoners have died during the year in Workhouse department, and two in the House of Refuge department.

Dr. P. H. Sawyer has been in charge of the Medical department during the year, and has been faithful in his attendance, and careful, prudent and economical in his practice. He has, as per agreement, visited the institution every alternate day, and made many extra visits on call, or when a case under care and treatment, required daily visitation, and in a few instances two visits a day have been necessary. The account for medical attendance and medicines shows less than the previous year

RELIGIOUS.

The Sabbath services have been under the new arrangement made a little over one year since. That is—ministers of the city, in turn, have been invited to serve for a month at a time, preaching each Sabbath, which they have cheerfully done. We have had the services of the following denominations—Baptist, Congregational, Disciple, Methodist, Presbyterian and Unitarian, also a Catholic clergyman has conducted services on every alternate Sabbath morning. To all these services all the inmates of the House are required to attend.

The female prisoners and the girls of the House of Refuge have had frequent visits and religious instruction from christian ladies of the city, and though all these services by male and female workers are earnest and practical in character they are, so far as human observation goes, not crowned with abundant success in turning the feet of the erring into new and better paths, and consequently better lives.

Many a sad one—woman or child—has been gladdened by visits from ladies of the Flower Mission, and distribution of flowers; also Sunday school papers and children's books.

The monotony in daily school drill and discipline has given place to joy and gladness, at times, by the reception of baskets of apples, grapes, and lovely picture papers and magazines, sent in by sympathizing christian friends.

Books, magazines and religious papers are always sought after, and eagerly perused by all classes who can read, and are at all times welcomed.

In my intercourse with you, gentlemen of the Board, I have had, at all times, your hearty co-operation in all that

was for the interest of the institution. We have had perfect harmony, and I have had, as has my family, your personal friendship and sympathy. You have our gratitude.

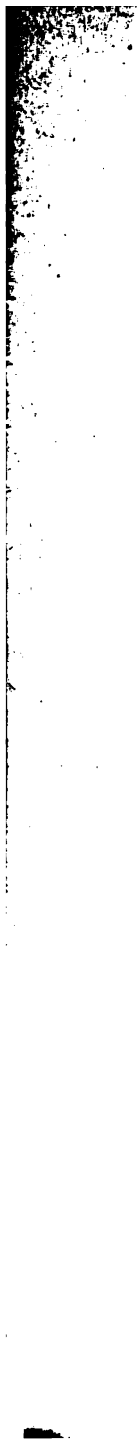

Respectfully submitted,

W. D. PATTERSON.

HOSPITAL DEPARTMENT.

HOSPITAL DEPARTMENT.

CLEVELAND, January 1, 1883.

*To the Honorable Board of Directors of the Workhouse, and
House of Refuge and Correction:*

GENTLEMEN:—In making my first report to you, it is proper that I call your attention to the number and condition of the sick in the Institution at the beginning of my service.

My first visit was on the 21st day of December, 1881. In the Refuge there were two sick with typhoid fever—Charles Keifer, *in extremis*, dying in less than twenty-four hours; the other, Charles Barge, was ordered to bed and removed to Hospital the following day. Died January 8th, 1882.

In the Hospital there were three inmates—James Funchon, with typhoid fever: case ended in recovery. Daniel Daugherty, with erysipelas of head and face; ending in recovery with loss of eyesight. Frank Strieve, in Hospital from October 6th with typhoid fever, having profuse involuntary discharges from the bowels, extreme emaciation, and beyond hope of recovery; died January 8th, 1882. I need not detail the cases of those ill with chronic diseases, as all terminated in either decided improvement or complete recovery.

Of those becoming ill after my service began, three have died: In the Refuge George Crabbe, on February 4th, of perforation of the bowels from ulceration of one of the solitary glands. In the Workhouse Benjamin Smith (colored), of epilepsy, on February 21st; John Gove, on March 10th, of strangulated hernia. He was insane and violent, so that a correct diagnosis was not made in time to save the patient. Since then no deaths have occurred, and at this time none are dangerously ill.

From the 21st of December, 1881, to January 1, 1883, I have made 250 visits, have treated males 650, females 120 in all 770, and have made 2,045 prescriptions. Comparing these items with those of former reports from the Institution, it *appears* that the number treated has diminished in much greater proportion than the number of prescriptions.

This arises from the fact that in former reports the name of a person, when continued from page to page of the record, though treated for the same disease, is counted each time as a separate individual. In this report the name of a person is counted but once while under treatment for the same disease.

It is evident that *statistics* based on the former method of counting are utterly valueless, while the sanitary condition of the Institution is made to appear in the most unfavorable light.

The *expense* of the medical department this year is less than in any year since 1874. In June and July, land scurvy or purpura in its various forms — simple, rheumatic, and hemorrhagic, appeared among the men and boys; some twenty cases in all. Addition of fresh vegetables to the dietary promoted their recovery, and prevented the further spread of the disease.

The sanitary measures instituted during the year, have been attended with marked benefits. Removing the boys'

dining hall from the corridor of the prison to a well-lighted, well-ventilated room, together with a somewhat changed dietary, has greatly improved their physical condition. The removal of the water-soaked ill-smelling floor from the water closet, and placing therein an impermeable floor, and walls, has taken from their midst a prolific cause of debility and disease. The records show a great diminution of medical attendance since the adoption of these measures.

Improved ventilation in the men's department, as suggested by my predecessor, has somewhat lessened the unpleasant conditions necessarily connected with prisons.

The plumbing throughout the Institution has been thoroughly examined by an expert, and found to be in perfect condition.

These, together with the scrupulous neatness and unceasing care exercised by the officials in charge, render the sanitary condition as good as can be with the present construction of the prison.

The problem of prison building to secure the best sanitary conditions, and the requisite safety, is not yet satisfactorily solved.

The food has been of excellent quality, and of sufficient variety, with the exception above mentioned, to maintain a good degree of physical vigor among the prisoners.

The small amount of sickness in the female department is owing to reduced numbers, and to the watchfulness and judicious care of the principal matron, and her assistants.

Three classes of persons occasionally are sentenced to the Workhouse, who should find refuge in institutions of more charitable design; I refer to the epileptic, the insane, and vagrants that are such by reason of disease.

I believe that long *time* sentences for the chronic inebriate would insure to *his* benefit as well as that of the State.

I desire to express my gratitude to the Board and Super-

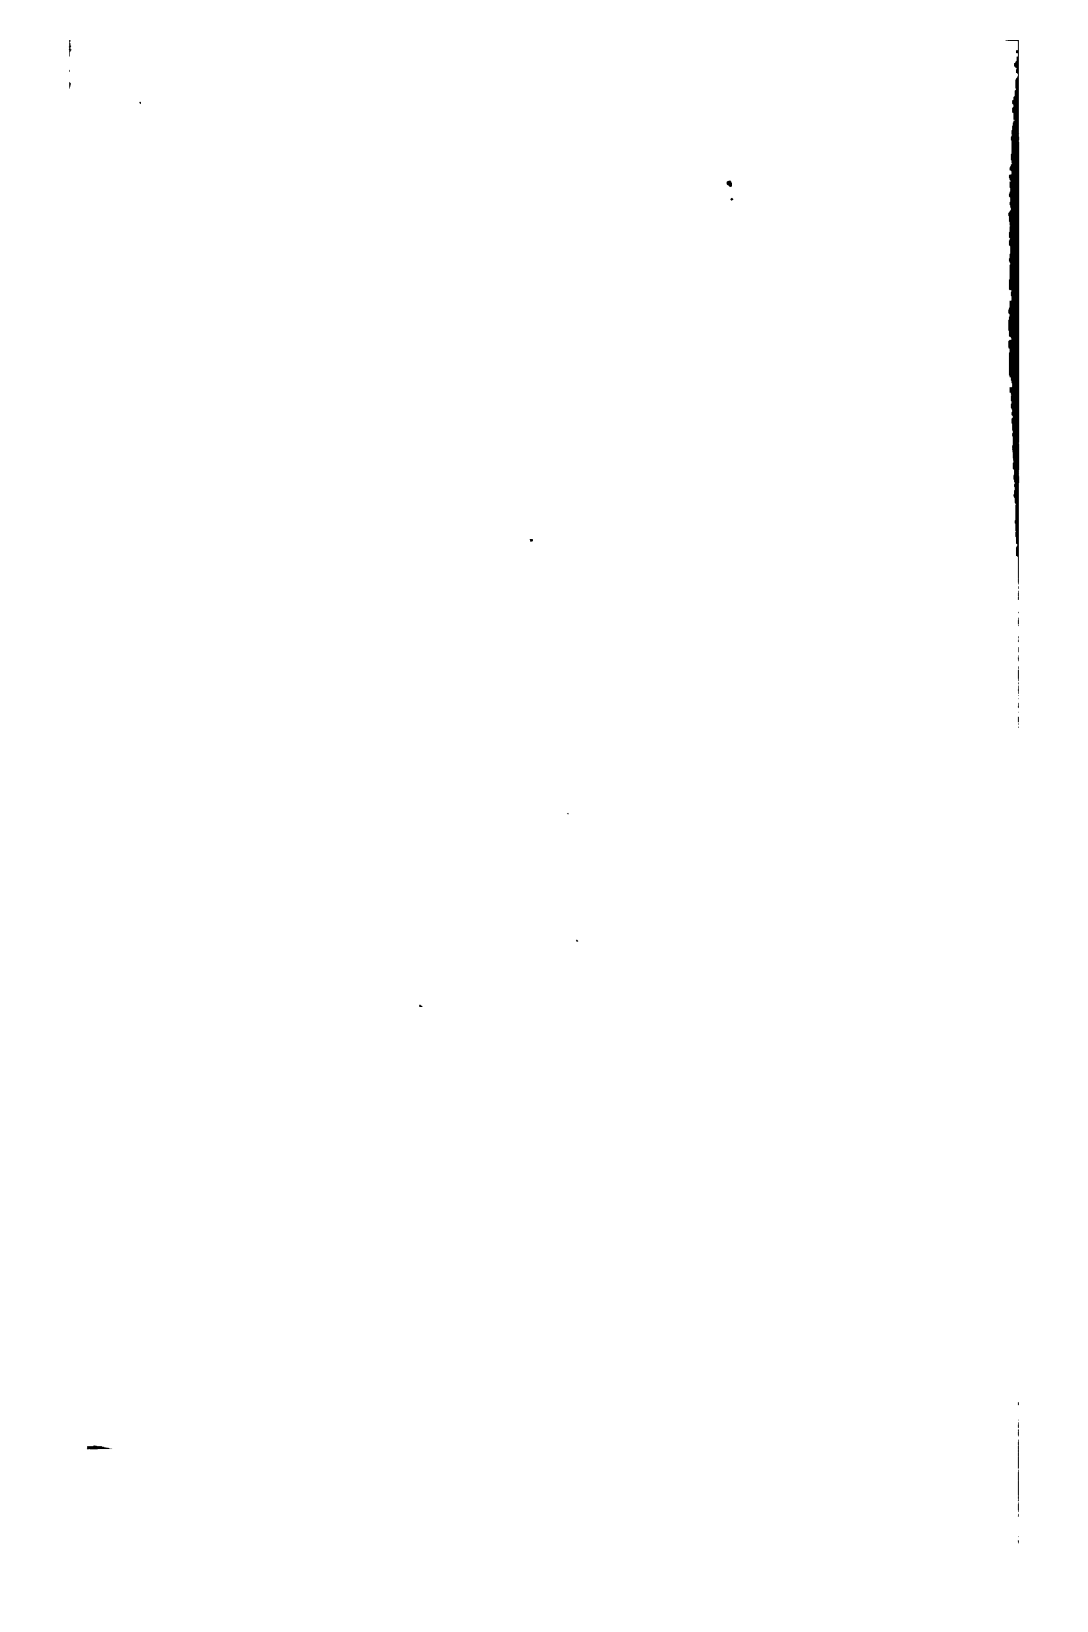

intendent for their prompt and hearty co-operation in matters pertaining to this department, and acknowledge, with pleasure, the uniform courtesy and efficient aid of all of the officials. Especial mention should be made of the valuable services of the Deputy Superintendent in connection with the care of the sick.

Respectfully submitted,

P. H. SAWYER.

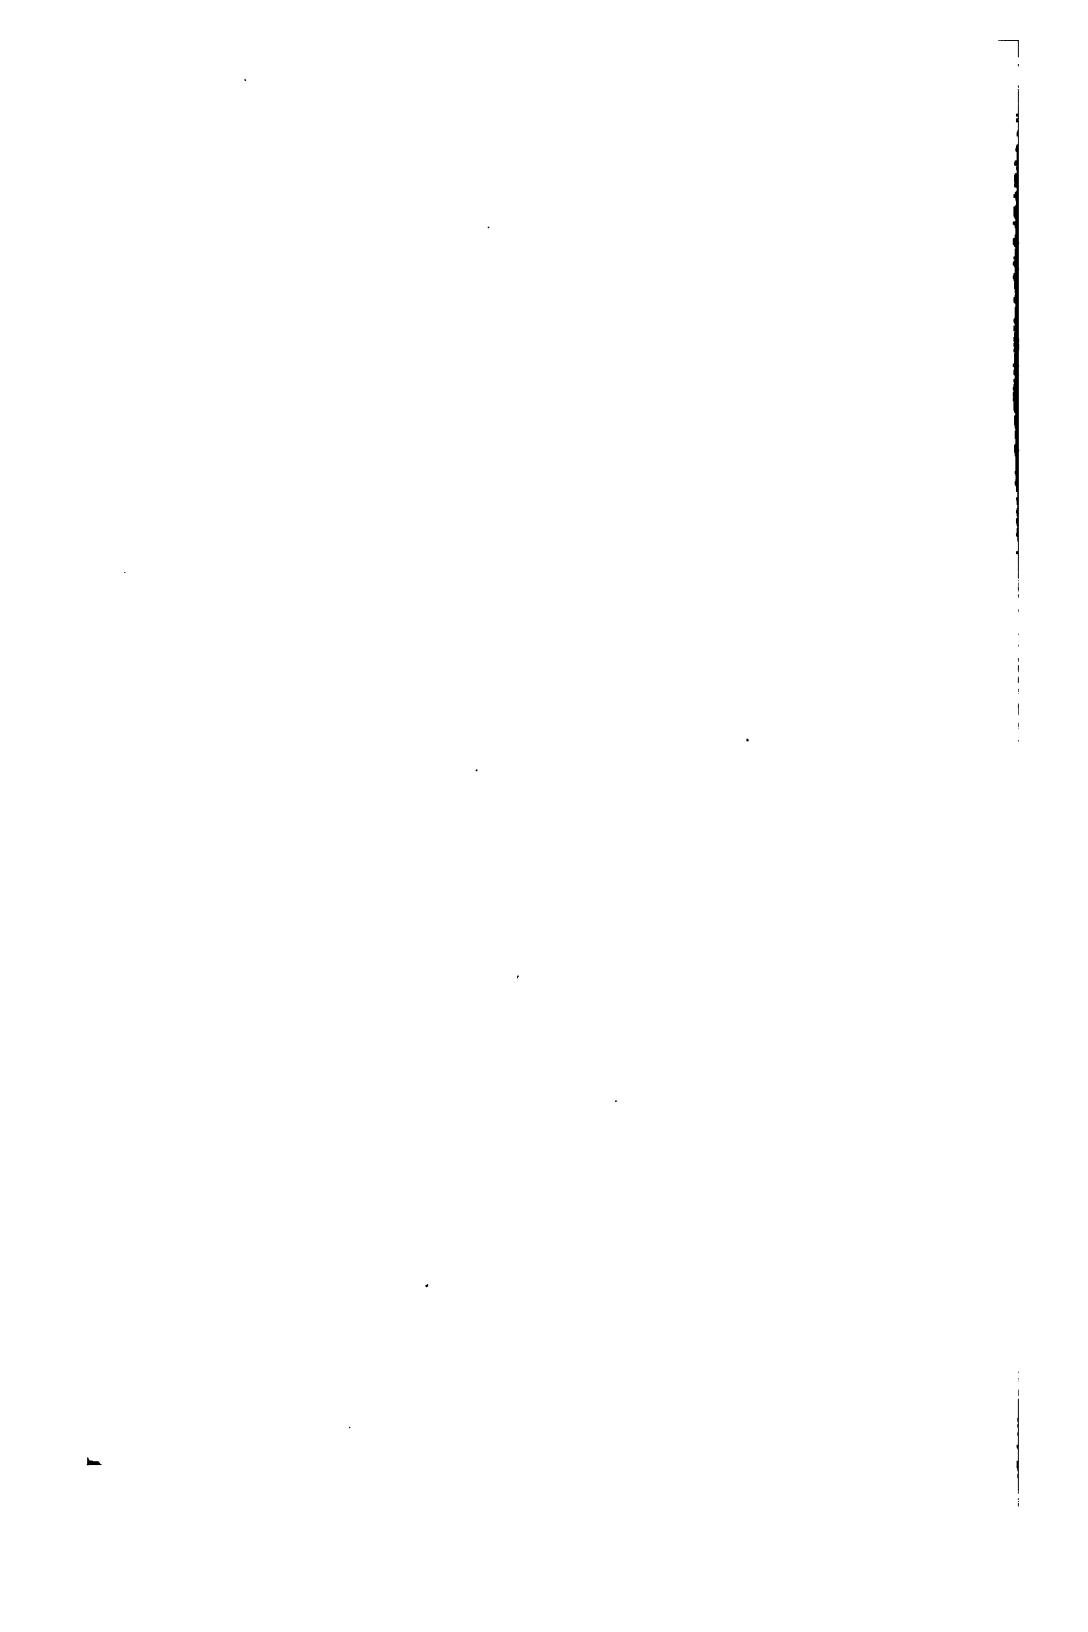

Physician in Charge.

ANNUAL REPORT

With office at Woodland.

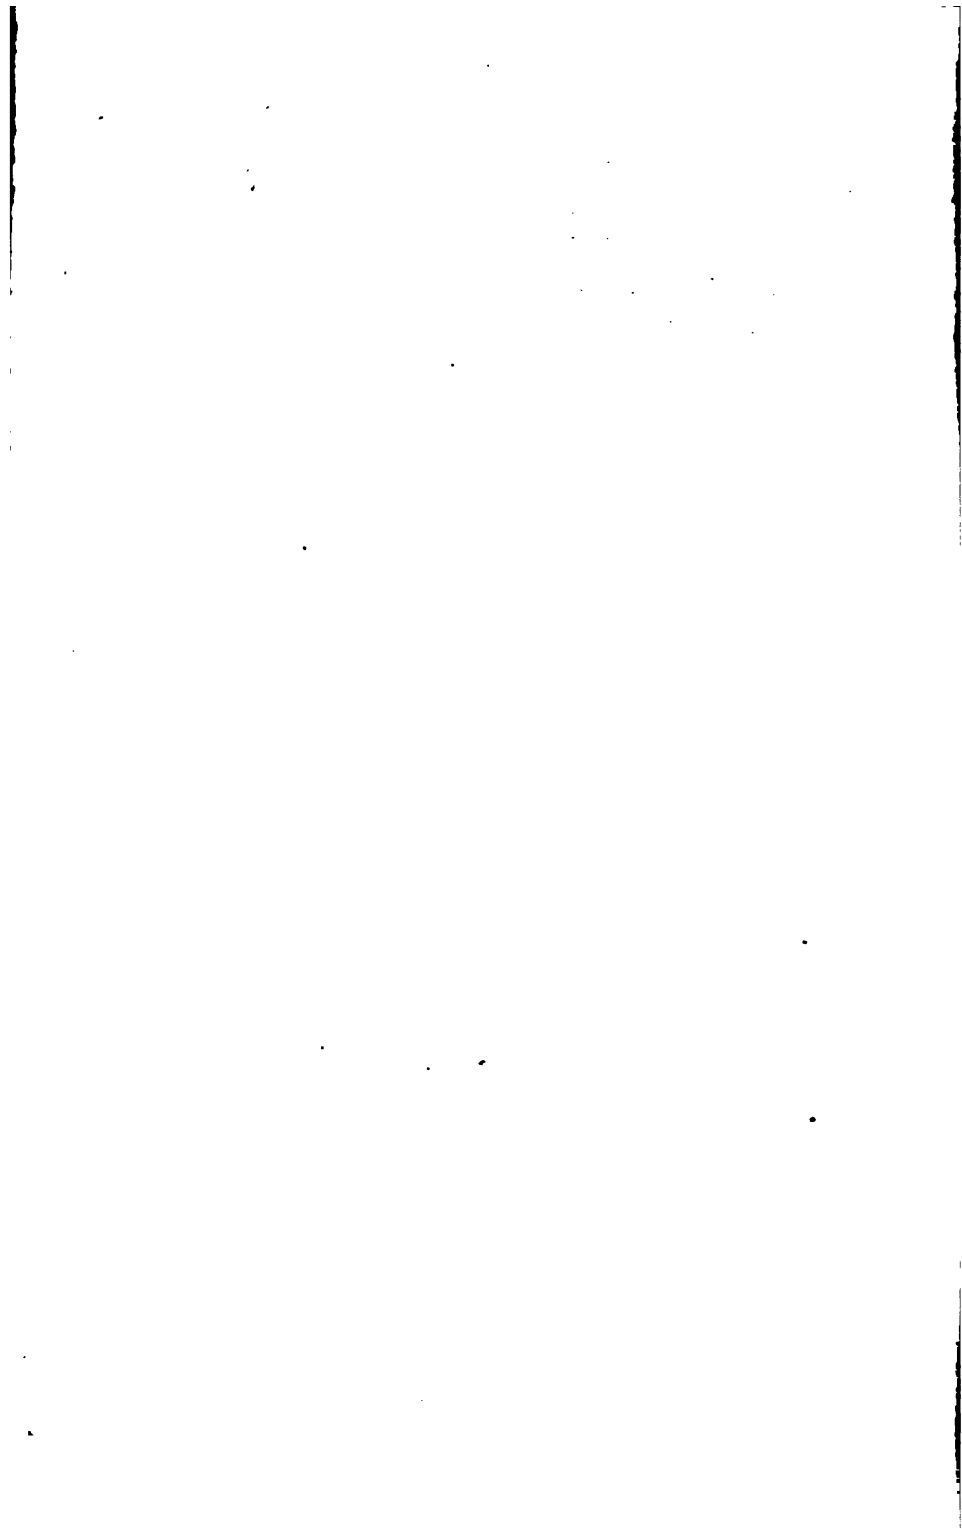

CLEVELAND, O., January 1st, 1883.

To the Honorable City Council of Cleveland, O:

GENTLEMEN:—I have the honor to herewith present your Honorable Body with the Annual Report of this Board for the year ending December 31st, 1882.

Respectfully yours,

L. W. BAILEY,
Secretary.

REPORT OF CEMETERY TRUSTEES.

CLEVELAND, O., January 1st, 1883.

To the Honorable City Council:

GENTLEMEN: — The undersigned Trustees of the City Cemeteries, respectfully submit herewith our annual report for the year 1882, of the business transacted by us, in the management and control of the several cemeteries.

The term of trustee Gustavus A. Hyde expired in April last, and at the municipal election on the first Monday in April, Mr. W. T. Dixon was elected for three years. At the first meeting of the Board after said election, the following organization was perfected, trustee W. T. Dixon having qualified took his seat.

Jacob Meyer was made president, O. C. Scovill was made treasurer, and L. W. Bailey, Secretary.

It has been the policy of the Board to conduct all matters connected with the several cemeteries with economy, which will appear upon perusal of the various tabulated statements.

Improvements have been made during the year to the amount of \$14,241.85, and distributed as follows:

Woodland Cemetery has been improved to the amount of \$1,791.33, in the erection of a tool and hearse house, the lay-

ing out of a large portion of the unoccupied grounds, and enlarging and fitting up the dwellings of the officers.

Erie Street Cemetery has been improved to the extent of \$4,179.41, in the erection of a chapel and receiving vault. (using the material from the old vault taken from Woodland) and in building an addition to the office.

Monroe Street Cemetery has received improvements to the amount of \$516.43 in building new fence along the south side of the grounds and in adding shrubbery. The side hill portion of this cemetery was sold during the year through the legislation of your honorable body, to the New York, St. Louis and Chicago Railroad Co., for the sum of \$5,700.00.

Harvard Grove Cemetery has been improved at an outlay of \$7,754.68, in the completion of a house for the superintendent commenced last year; in the removal of the vault from the old grounds to the new, and in planting trees, also in the erection of a fence. All of the foregoing improvements were an absolute necessity to accommodate the increased amount of business being done at the cemeteries, and to improve the looks at the same time, thereby tending to show strangers, as well as our citizens that the City of Cleveland is not forgetful of its duty in the care of the final resting place of its dead.

It has not come to our knowledge that any grave in the cemeteries under our control has been robbed during the past year.

The Board take this opportunity to return thanks to all officers and others connected with us in the management and control of the several cemeteries, for the efficient manner in which they have performed the duties assigned them.

Following this are the tabulated statements prepared by the Secretary, showing the amount of business done, also

the receipts and disbursements for the several cemeteries under control of this Board during the year, all of which we respectfully submit.

JACOB MEYER,
O. C. SCOVILL,
W. T. DIXON,
Cemetery Trustees.

L. W. BAILEY,
Secretary.

The interments during the year have been as follows:

CEMETERIES.	ADULTS.		MINORS.		GRAND TOTAL.
	Male	Female	Male	Female	
Woodland Avenue	301	286	289	233	1,059
Erie Street	37	37	81	64	219

TREASURER'S SUMMARY—CONTINUED.

Amount to credit of fund arising from sale of lots and grave spaces, January 1, 1882	\$ 4,723 70
Received during the year from the sale of lots and grave spaces	20,760 04
Received interest on deposits	27 61
Total	\$25,511 35
Amount taken from the fund arising from the sale of lots and grave spaces to pay pay-rolls and current expenses	\$ 5,175 20
Expended for improving and embellishing the cemeteries	14,241 85
Total	\$19,417 05
Balance to credit of fund, January 1, 1883	\$4,004 30
Amount to credit of fund for general purposes	000 00
Received during the year for services and vault fees	11,220 82
Received from the fund arising from the sale of lots and grave spaces	5,175 20
Total	\$16,404 32
Pay-roll and current expenses during the year	16,404 52
Balance to credit for general fund	000 00
Amount of running expenses during the year	16,404 52
Amount received for services and vault fees	11,220 82
Amount taken from the fund arising from the sale of lots and grave spaces	\$5,175 20

As will be seen from the foregoing statement, the running expenses, (other than for improvements) of the several cemeteries, are in excess of the receipts for services and vault fees, which receipts constitute the fund from which the running expenses should be paid. This has been the case for years past, and consequently the fund derived from the sale
